## Product Description

### IFRA Compliance Olive Essence Fragrance Oil For Shampoo and Soap Making / Production, Body Wash Fragrance

Product Code: LDZ-PL20313

This premium-grade Olive Essence Fragrance Oil is a sophisticated, highly concentrated aromatic compound masterfully engineered for superior performance in personal care and cosmetic manufacturing. Designed to capture the serene, Mediterranean soul of the olive grove, this fragrance bypasses the heavy, culinary aroma of cooking oil, delivering instead a refined, upscale olfactory profile. It opens with an invigorating burst of crisp green leaves, dewy ozone, and bright citrus accents, which gracefully transition into a soothing heart of crushed olive fruit, soft floral notes, and herbal accords, all grounded by a warm, earthy base of Mediterranean woods and clean white musk.

Formulated for versatile compatibility, this oil integrates flawlessly into diverse product bases, including traditional cold-process soaps, melt-and-pour bases, sulfate-free shampoos, and conditioning body washes. It exhibits exceptional scent retention and a high flash point, ensuring the fragrance remains robust throughout the high-temperature manufacturing process and beautifully blooms in hot showers. Crucially for artisans, it is meticulously engineered to minimize discoloration and resist premature acceleration or ricing in cold-process saponification. This ensures your clear shampoos remain crystal-clear and your soaps maintain their pristine aesthetic, elevating everyday cleansing into a luxurious, spa-like ritual.

## Fragrance Profile & Characteristics:

<b>Top Notes</b>	The initial, invigorating impression that introduces the fragrance. Crisp olive leaves, dewy ozone, bright bergamot, and a touch of fresh green apple.
<b>Middle Notes</b>	The complex heart that defines the true character and body of the scent. Crushed olive fruit, herbal rosemary, wild cyclamen, and soft, velvety white floral accords
<b>Base Notes</b>	The enduring foundation that anchors the scent for maximum longevity. Mediterranean olive wood, warm cedar, clean white musk, and a subtle touch of earthy amber.

**Technical Specifications:**

Product Name	Olive Essence Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.985 to 1.025 g/cm <sup>3</sup> @ 25°C
Flash Point	>99°C (210°F)
Refractive Index (RI)	1.490 to 1.520 (at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

### Recommended Usage Rates

Application	Usage Rate
Cold Process Soap	1% - 5%
Shampoo & Conditioner	1% - 2.5%
Shower gel & Body Wash	0.5% - 1.5%
Body Lotion & Creams	0.5% - 3%
Candles & Diffusers	5% - 10%

## Functions and Applications:

This professional-grade Olive Essence Fragrance Oil acts as a premium aromatic agent engineered to elevate the sensory profile and perceived value of personal care products. Its primary function is to deliver an upscale, Mediterranean-inspired olfactory experience, transforming everyday hygiene routines into grounding, spa-like rituals. Formulated with advanced scent-bloom technology, the fragrance expands dynamically when exposed to warm water and steam, filling the shower environment with a crisp, botanical ambiance that efficiently masks the raw chemical undertones of surfactant and soap bases. Beyond its experiential benefits, this oil functions as a highly stable, non-reactive component within complex cosmetic formulations. It is meticulously balanced to maintain chemical neutrality, ensuring it does not compromise the viscosity, foaming capacity, or structural integrity of hair and skincare products. In cold-process soap making, it actively prevents common manufacturing defects such as ricing, seizing, or premature acceleration, giving artisans ample time for intricate swirling techniques. Additionally, its vanillin-free composition functions as a reliable color stabilizer, ensuring that finished products retain their intended visual clarity without browning over time.

This versatile fragrance oil is specifically optimized for a wide spectrum of rinse-off and leave-on cosmetic applications, demonstrating exceptional compatibility with diverse chemical bases. In soap manufacturing, it performs flawlessly in both traditional cold-process and melt-and-pour methods. It integrates seamlessly into the lipid phase without disrupting the saponification process, resulting in hard, long-lasting bars that retain a robust, authentic olive leaf scent from the initial cure to the final lather.

In hair care and cleansing formulations, this oil is an ideal additive for clear or opaque shampoos, deep conditioners, and nourishing body washes. Because it is oil-soluble, it easily incorporates into surfactant systems—such as SLS, SLES, or plant-derived glucosides—with the aid of a standard solubilizer, preserving the crystal-clear transparency of premium shower gels. Beyond hair and body washes, its skin-safe, IFRA-compliant profile makes it highly suitable for secondary applications, including hydrating body lotions, massage oils, bubble baths, and liquid hand soaps, offering manufacturers a cohesive scent profile across entire product lines.

## Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
