Product Description

Diffuser Fragrance With Free Sample Rosemary & Eucalyptus Fragrance Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production

Product Code: LDZ-PL30268

Premium fragrance essence for diffusers, reed sticks, scented candles, and home spray productions

Product Overview:

The Plant brand Rosemary & Eucalyptus Fragrance Oil is a refreshing, herbaceous blend designed for both home and professional fragrance applications. Its primary differentiation lies in its therapeutic-inspired profile, combining the invigorating clarity of rosemary with the decongesting coolness of eucalyptus. Unlike purely floral or sweet fragrances, this oil actively promotes mental alertness, respiratory ease, and a spa-like atmosphere, making it ideal for bathrooms, home offices, gyms, and wellness centers.

Another standout feature is its versatility across three core applications: reed stick diffusers, cold scented candles, and DIY fragrance production. Many essential-oil-based fragrances struggle to perform well in cold-scent candle systems without heat, but this oil is specifically engineered to disperse its crisp, camphoraceous character at room temperature, preserving the full therapeutic integrity of both rosemary and eucalyptus notes without any alteration.

The oil also serves as a raw material for custom blending, allowing artisans, small businesses, or hoteliers to create signature diffuser blends, room sprays, or scented candles with complete control over intensity. Whether you want a bold, invigorating blast for a gym locker room or a subtle, clarifying whisper for a study corner, this oil adapts seamlessly.

Additionally, each order includes a free sample, enabling buyers to test performance, longevity, and scent accuracy before committing to larger volumes. This rosemary and eucalyptus blend delivers both functional aromatherapy benefits and creative flexibility.

LDZ-PL30967

Coconut & Vanilla Fragrance

Production Date: April 25, 2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., LTD

Address: No. 1, Xeyuan Road, Baiyun District, Guangzhou, Guangdong, 510540, China

Fragrance Profile & Characteristics:

This Rosemary & Eucalyptus Fragrance Oil delivers a crisp, invigorating, and therapeutic scent profile that stands apart from floral or sweet diffuser fragrances. It is specifically designed to promote mental clarity, respiratory freshness, and a spa-like atmosphere, making it ideal for home offices, bathrooms, gyms, and wellness centers.

Fragrance Notes	Description
Top Notes	The fragrance opens with a bright and penetrating top note. The initial impression is dominated by fresh, camphoraceous eucalyptus, known for its cooling and decongesting properties. This is often accompanied by a sharp burst of rosemary leaf, along with subtle hints of peppermint, lemon, or tea tree oil to enhance the clean, medicinal brightness. This opening is instantly revitalizing and helps clear the mind.
Middle Notes	As the top notes settle, the middle heart reveals a more herbal and slightly woody character. Here, the sharpness softens into a balanced blend of crushed rosemary leaves, lavender, and a touch of spicy clove or nutmeg. This middle stage adds depth and warmth without losing the fragrance's signature freshness, creating a natural, garden-like quality that feels both clean and grounding.

Base Notes	<p>The base notes provide lasting structure and earthy resonance. The fragrance settles into a foundation of cedarwood, pine needle, patchouli, or moss. This dry-down ensures the scent lingers gracefully without becoming medicinal or harsh, leaving a subtle, woody trail that pairs beautifully with the herbaceous top notes. This well-rounded profile is perfect for reed diffusers and cold scented candles, offering hours of refreshing, clarifying aroma.</p>

Technical Specifications:

Parameter	Specification
Product Name	Rosemary & Eucalyptus Fragrance Oil
Fragrance Profile	Sharp Citrus, Zesty Peel, Effervescent
Appearance	Colorless to light yellow transparent liquid
Relative Density	0.880–0.940 g/cm ³ @ 25°C
Refractive Index	1.470–1.500 @ 20°C
Flash Point	90°C (200°F)
Ingredients	Natural & Synthetic Aromatic Compounds
Recommended Dosage	Reed Diffusers: 15% – 25% (Depending on the carrier base and reed absorption). Scented Candles: 5% – 10% (Depending on wax type and desired throw). DIY Room Sprays: 3% – 8%. Soap: 0.5%-3%
Volatilization Rate	Maintains continuous fragrance for 20-30 days, covering 15-25 square meters
Solubility	Easily soluble in ethanol and propylene glycol
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	12-24 months when stored in cool, dark place in sealed container
Standard Compliance	IFRA compliant with passed skin irritation testing

Functions & Applications:

The Plant Brand Rosemary & Eucalyptus Fragrance Oil serves multiple functional purposes that extend beyond simple air freshening. Its primary function is aromatic air purification and odor elimination. The crisp, camphoraceous eucalyptus combined with sharp rosemary effectively neutralizes a wide range of unwanted household odors, including those from cooking, pets, tobacco smoke, bathroom moisture, and stale indoor air. Unlike heavy, sweet fragrances that simply mask smells, this herbaceous blend actively cuts through and removes

odors, leaving behind a clean, fresh, and naturally ventilated environment.

Another key function is cognitive enhancement and mental stimulation. Rosemary is historically associated with memory improvement and mental clarity, while eucalyptus is known for its decongesting and energizing properties. Together, they help reduce mental fatigue, improve concentration, sharpen focus, and promote alertness, making this oil particularly valuable for home offices, study areas, libraries, and workplaces where sustained attention is required.

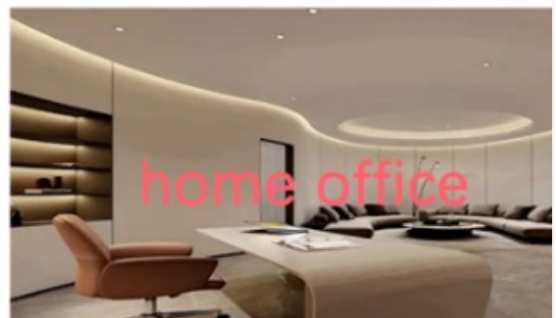

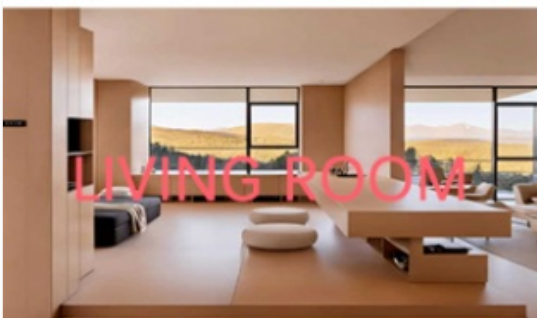

The oil also functions as a respiratory support agent. The natural volatile compounds in eucalyptus and rosemary can help open nasal passages and ease breathing, creating a sensation of clearer airways. This makes it an excellent choice for bathrooms, steam rooms, or during cold and flu season. Additionally, the oil serves as a versatile raw material for DIY production, allowing users to create custom reed diffuser blends, cold scented candles, room sprays, and linen mists with consistent, professional-grade results.

Primary Applications:

The Plant brand Rosemary & Eucalyptus Fragrance Oil is exceptionally versatile, finding application across a wide range of residential, commercial, and wellness-focused environments. The most prominent application is in home office and study area diffusers. When mixed with a compatible carrier solvent at 15% to 25% concentration and placed in a reed stick diffuser, this oil continuously releases an invigorating, clarity-enhancing aroma that helps maintain focus, reduce mental fatigue, and improve productivity during long working hours.

It is also ideal for bathroom and spa diffusers. The fresh, clean, slightly medicinal profile of eucalyptus and rosemary is universally associated with hygiene, cleanliness, and spa-like luxury. In guest bathrooms, master baths, or home spa areas, this fragrance effectively neutralizes humidity-related odors while creating a refreshing, steam-room atmosphere that feels both cleansing and rejuvenating. Another key application is in gym and fitness center diffusers. The energizing properties of this oil help mask perspiration odors, invigorate exercisers, and create a motivating training environment. For cold scented candles, this oil is specifically formulated to disperse its therapeutic character at room temperature without heat, making it safer for locker rooms, yoga studios, and changing areas. Additional applications include DIY room sprays, car vent diffusers, laundry fresheners, vacuum bag scents, and even pet-area deodorizers where a clean, non-toxic herbal fragrance is desired.
