## Fragrance Essence With Free Sample Indian Rose Essence Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production

Product Code: LDZ-PL30270

Premium fragrance essence for diffusers, reed sticks, scented candles, and home spray productions

### Product Overview:

This Indian Rose Essence Oil delivers a rich, authentic, and deeply romantic rose aroma inspired by traditional Indian rose varieties such as Rosa Damascena. Its primary differentiation lies in its distinctively warm, exotic, and multi-layered character. Unlike standard European-style rose fragrances that often feel light, powdery, or overly sweet, this Indian rose oil offers a fuller, more honeyed, and slightly spicy floral profile with subtle earthy undertones, evoking the sensory richness of a traditional Indian garden during full bloom season.

Another key differentiator is its exceptional tenacity and diffusion strength. Many floral oils fade quickly in cold applications, but this oil is specifically engineered for superior performance in reed diffusers and cold scented candles, maintaining its full aromatic integrity for weeks without heat alteration. It resists the common "syrupy" or "synthetic" drift that plagues lesser rose oils when diluted.

The oil also serves as a premium raw material for exotic custom blending. While magnificent alone, it uniquely pairs with traditionally Indian complementary notes such as sandalwood, oud, saffron, cardamom, or patchouli, allowing artisans, boutique hoteliers, or luxury candle makers to create signature diffuser blends with authentic South Asian character that stand out in crowded markets.

Additionally, each order includes a free sample, enabling buyers to test authenticity and longevity risk-free. This Indian rose oil delivers both exotic floral beauty and professional-grade reliability.

### Fragrance Profile & Characteristics:

This Indian Rose Essence Oil presents a warm, exotic, and richly layered fragrance profile inspired by traditional Damask rose varieties, specifically *Rosa Damascena* grown in Indian climate conditions. Unlike lighter, powdery European rose scents or overly sweet synthetic imitations, this oil offers a distinctive honeyed sweetness, subtle spicy warmth, and earthy depth that feels authentic, sensual, and deeply memorable. This makes it truly unique for reed diffusers, cold scented candles, and DIY fragrance blending where a non-generic rose character is desired.

Fragrance Notes	Description
Top Notes	The fragrance opens with a bright, slightly spicy top note. The initial impression features fresh rose petals accented by a hint of green tea leaves, a touch of bergamot for citrus brightness, and a whisper of black pepper or clove bud, creating an immediate sense of exotic richness without sharpness—a key differentiator from standard rose oils that often start too sweet or too light.
Middle Notes	As the top notes settle, the middle heart reveals the signature Indian rose accord in full bloom. Here, the true character shines through—a lush, velvety, intensely sweet floral bouquet with realistic honeyed undertones (not caramel), joined by subtle geranium and a faint whisper of cinnamon or nutmeg, adding warm, romantic depth that feels luxurious and comforting, avoiding the common "candy-rose" pitfall.
Base Notes	The base notes provide lasting structure and earthy resonance. The fragrance settles into a soft foundation of sandalwood, creamy patchouli, and clean musk. A faint hint of warm amber adds gentle sweetness, while a touch of vetiver or oakmoss provides an earthy, grounding quality rarely found in rose fragrances. This ensures the rose lingers gracefully without becoming cloying, leaving a sophisticated, exotic trail perfect for long-lasting home fragrance applications.

## Technical Specifications:

Parameter	Specification
Product Name	Indian Rose Essence Oil
Fragrance Profile	Sharp Citrus, Zesty Peel, Effervescent
Appearance	Colorless to light yellow transparent liquid
Relative Density	0.92–0.990 g/cm <sup>3</sup> @ 25°C
Refractive Index	1.480–1.528 @ 20°C
Flash Point	94°C (200°F)
Ingredients	Natural & Synthetic Aromatic Compounds
Recommended Dosage	Scented Candles: 5% – 10% (Depending on wax type and desired throw). DIY Room Sprays: 3% – 8%. Reed Diffusers: 15% – 25% (Depending on the carrier base and reed absorption). Soap: 0.5%-3%
Volatilization Rate	Maintains continuous fragrance for 20-30 days, covering 15-25 square meters
Solubility	Easily soluble in ethanol and propylene glycol
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	12-24 months when stored in cool, dark place in sealed container
Standard Compliance	IFRA compliant with passed skin irritation testing

## Functions & Applications:

The Indian Rose Essence Oil serves multiple sophisticated functions that distinguish it from standard rose fragrances. Its primary function is atmospheric transformation through exotic floral diffusion. The warm, honeyed, and slightly spicy rose character actively neutralizes unwanted household odors—including those from cooking, pets, tobacco, bathroom humidity, and stale indoor air—while replacing them with a rich, romantic, and culturally evocative ambiance. This creates an immediate sense of luxury, warmth, and emotional comfort that standard rose oils cannot replicate.

Another essential function is emotional regulation and mood enhancement. Indian rose is traditionally valued in aromatherapy for its powerful calming, antidepressant, and heart-opening properties. The unique honeyed-spicy profile helps reduce anxiety, alleviate sadness, promote emotional balance, encourage restful sleep, and subtly uplift the spirit, making it particularly effective for bedrooms, meditation spaces, spas, and therapeutic environments where deep emotional relaxation is prioritized.

The oil also functions as a premium-grade raw material for exotic custom fragrance production. Unlike single-use commercial scents, this Indian rose oil is specifically formulated to be blended with various carrier bases, including solvents for reed diffusers, cold-process wax for candles, and water-alcohol solutions for room sprays. Its unique molecular structure allows it to pair exceptionally well with traditionally Indian complementary notes such as sandalwood, oud, saffron, cardamom, and patchouli. Additionally, it functions as a cold scenting agent, dispersing fragrance effectively without heat, preserving the delicate spicy-honeyed rose character intact from first diffusion to last.

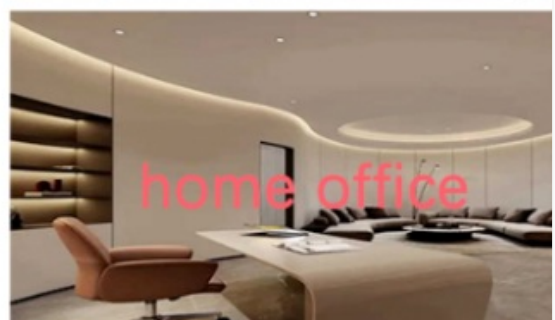

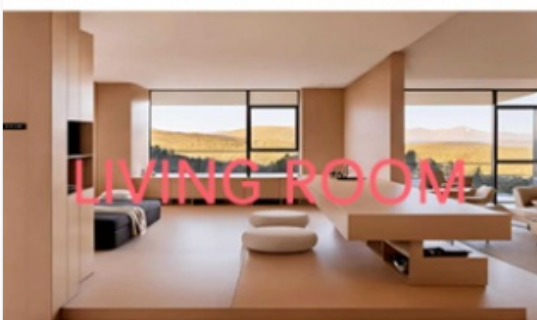

### Primary Applications:

The Indian Rose Essence Oil is exceptionally versatile, finding professional application across luxury residential, hospitality, wellness, and personal care sectors. The most prominent application is in boutique hotel lobby and luxury guest room diffusers. When mixed with a compatible carrier solvent at 15% to 25% concentration and placed in a reed stick diffuser, this oil continuously releases a warm, exotic rose aroma that creates a memorable, emotionally resonant brand signature. This is particularly effective for properties targeting discerning travelers seeking authentic, culturally rich experiences.

It is also ideal for high-end spa and wellness center diffusers. The traditionally recognized calming and heart-opening properties of Indian rose make it perfect for massage rooms, meditation zones, yoga studios, and relaxation lounges. In cold scented candles, this oil is specifically formulated to disperse its delicate spicy-honeyed character at room temperature without heat, making it safer for spa treatment rooms, bedside tables, and hotel bathrooms where open flames may be restricted while still delivering a luxurious aromatic experience.

Another key application is in luxury wedding and event spaces. The romantic, exotic association of Indian rose makes it perfect for bridal suites, reception areas, ceremony backdrops, and high-end retail boutiques seeking a distinctive signature scent. Additional professional applications include premium DIY room sprays, luxury linen mists, high-end car vent diffusers, drawer sachets for fine clothing, potpourri refreshers, and even unscented body oils or lotions for a personalized, naturalistic rose fragrance. Small-scale artisanal candle makers and luxury soap producers also use this oil as a signature, market-differentiating scent for their product lines.

## applications

## Our Advantages:

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

## Support and Services

Our R&D team includes PhDs and senior engineers, with established laboratories in partnership with universities. We integrate global technology to maintain product advantage through continuous innovation.

### Comprehensive Support Services

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services

Assistance with regulatory compliance

Training and education on fragrance formulation

## Packaging and Shipping

### Product Packaging Options

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

### Shipping Information

Production time: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photos or samples for confirmation before shipping. Shipping options include ship, air, truck, and express delivery.
