

Almond Fragrance Essence For Shampoo and Soap Making /Productions with High-Surfactant Stability, IFRA Compliance

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL20058
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Relative Density: 0.880 To 0.910 G/cm³ @ 25°C
- Flash Point: Approx. 71°C (160°F)
- Refractive Index: 1.480 To 1.495 (at 20°C)
- Phthalate-Free: Yes
- Shelf Life: 36 Months
- Solubility: Soluble In Surfactant-based Systems
- Highlight: **Almond fragrance essence for shampoo, High-surfactant stability shampoo fragrance, IFRA compliant soap making essence**

Almond Fragrance Essence For Shampoo and Soap Making /Productions with High-Surfactant Stability, IFRA Compliance

Product Code: LDZ-PL20058

Almond fragrance essence is a warm, sweet, and nutty scent that adds a comforting and inviting character to shampoos and soaps . Its aroma profile often features top notes that are nutty and sweet, with a rich, creamy heart and soft, warm undertones . This makes it a popular choice for crafting products that feel cozy, soothing, and slightly indulgent .

It is highly versatile and commonly used in liquid soaps, bar soaps, shower gels, shampoos, and conditioners . When used in shampoo, it provides a pleasant, lingering scent that can make the hair-washing experience more enjoyable . In soap making, it can be used in both cold process and melt-and-pour soap formulations and is known to behave well in cold process . However, it's important to note that some almond fragrance oils may cause a brown discoloration in soap, and may not be safe for use in products intended for the eye or lip area without specific safety confirmation .

When purchasing, ensure the fragrance oil is formulated for cosmetic use and complies with safety standards like IFRA . Usage rates typically vary, and some suppliers recommend levels up to 8% in the fragrance concentrate , so always follow the manufacturer's guidelines for your specific product.

Fragrance Profile & Characteristics:

Top Notes	The scent typically opens with a sweet, nutty, and slightly powdery burst of almond or almond milk. Some variations include a subtle hint of cherry or a touch of citrus to add a bright, fresh lift that immediately captures attention.
Middle Notes	As the top notes fade, the heart of the fragrance reveals a richer, more rounded character. This often features creamy vanilla, warm cinnamon, or soft floral undertones like rose or heliotrope. These middle notes provide body and depth, creating a comforting and indulgent sensation.
Base Notes	The final, lingering phase is anchored by deep, warm, and long-lasting notes. Common base elements include sweet musk, amber, sandalwood, or benzoin. These heavier molecules act as fixatives, ensuring the fragrance remains noticeable on the skin and hair for hours after use.

Technical Specifications:

Product Name	Almond Fragrance Essence
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.900 to 1.000 g/cm ³ @ 25°C
Flash Point	Approx.71°C (160°F)
Refractive Index (RI)	1.470 to 1.500 (at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shampoo/Conditioner:	0.2–1.0%;
Shower Gel:	0.3–1.2%;
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	1–3%;
Facial Cleanser:	0.1–0.5%

Functions and Applications:

The primary function of almond fragrance essence is to impart a warm, sweet, and comforting scent that significantly enhances the sensory appeal of shampoos and soaps. Its rich, nutty aroma, often accompanied by creamy and slightly floral undertones, helps to create a luxurious and indulgent user experience that can evoke feelings of coziness and relaxation. Beyond simply providing a pleasant smell, the fragrance plays a crucial role in masking the inherent, often less attractive, odors of raw materials like fats, surfactants, and base oils, ensuring the final product is appealing to consumers.

Furthermore, a well-chosen almond fragrance can position a product within a specific market segment, suggesting qualities of nourishment, gentleness, and warmth, which is ideal for products marketed towards sensitive skin or for comforting bath time rituals. The fragrance also adds a lasting scent to the skin and hair after rinsing. Finally, to ensure safety, these fragrances are formulated to comply with international safety standards like IFRA, guaranteeing they are safe for use in rinse-off and leave-on cosmetic applications.

Applications:

Almond fragrance essence is highly versatile and finds extensive applications across a wide range of personal care products. In liquid soap, body wash, and shower gel formulations, it provides a sweet and comforting aroma that makes daily cleansing a more pleasurable experience. It is also widely used in the production of both cold process and melt-and-pour bar soaps, where it behaves reliably in most formulations, though users should be aware that some variants may cause a brown discoloration.

In haircare, this fragrance is a popular choice for shampoos and conditioners, where it leaves a lingering, pleasant scent on the hair. For the most straightforward application, almond fragrance can simply be added to unscented shampoo or soap bases. However, some versions are also suitable for use in skincare products like body lotions and creams, as well as in home fragrance items such as candles, diffusers, and room sprays. It is crucial to always check the specific product's usage rates and safety guidelines, as these can vary between suppliers.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
