## Product Description

### Diffuser Fragrance Free Sample Four Seasons Hotel Scent Fragrance Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production

Product Code: LDZ-PL30903

Premium fragrance essence for diffusers, reed sticks, scented candles, and home spray productions

#### Product Overview:

These highly concentrated fragrance oils are designed to replicate the luxurious, location-driven scents found in Four Seasons hotels worldwide—but with a critical distinction: rather than offering one generic "hotel scent," the best versions capture a specific sense of place. Inspired by properties like Maui's tropical lime-and-woods blend or Megève's crisp alpine pine and edelweiss, these oils allow creators to craft atmospheres that feel authentic, not mass-produced.

Choose oils with regional storylines—coastal, forest, or garden-inspired—rather than generic "spa" profiles. This ensures your finished product stands out with character and authenticity, not just luxury clichés.

**Fragrance Profile & Characteristics:**

Fragrance Notes	Description
Top Notes	The scent opens with a crisp, refreshing burst of green fig and ripe pear, underscored by a subtle hint of citrus zest (bergamot or lime). These light, volatile top notes provide an immediate uplift, lasting roughly 15–30 minutes before fading to reveal the heart.
Middle Notes	As the top notes dissipate, a warm and sophisticated floral heart emerges. Dominant notes include night-blooming jasmine and soft violet, balanced with a whisper of cardamom or nutmeg for an unexpected spicy twist. This is the scent's most expressive phase, lingering for several hours and defining the overall character.
Base Notes	The fragrance settles into a rich, grounding foundation of creamy amber, cedarwood, sandalwood, and a touch of velvety musk. In some regional variations, a hint of oud or patchouli adds an exotic, smoky depth. These heavy, low-volatility notes anchor the scent, providing longevity that can last for days in a reed diffuser or throughout an entire candle burn.

## Technical Specifications:

Parameter	Specification
Product Name	Four Seasons Hotel Scent Fragrance Oil
Fragrance Profile	Sharp Citrus, Zesty Peel, Effervescent
Appearance	Colorless to light yellow transparent liquid
Relative Density	0.842–0.861 g/cm <sup>3</sup> @ 25°C
Refractive Index	1.462–1.480 @ 20°C
Flash Point	>100°C (212°F)
Ingredients	Natural & Synthetic Aromatic Compounds
Recommended Dosage	Reed Diffuser: 15–30%; Aroma Sachets: 3–8% Wax Melts: 6–10%; Cold Process Candles: 6–10%; Hot Process Candles: 5–8%; Room Spray: 2–6%;
Volatilization Rate	Maintains continuous fragrance for 20-30 days, covering 15-25 square meters
Solubility	Easily soluble in ethanol and propylene glycol
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	12-24 months when stored in cool, dark place in sealed container
Standard Compliance	IFRA compliant with passed skin irritation testing

## Functions & Applications:

This fragrance oil serves two primary functions: atmospheric enhancement and olfactory branding. Its most essential role is to transform a plain environment into a multi-sensory experience—evoking calm, luxury, or invigoration through carefully calibrated scent layers. The top notes provide an immediate mood lift, the heart notes sustain emotional engagement, and the base notes anchor a lasting sense of

comfort and sophistication. Beyond ambiance, this oil functions as a powerful memory trigger, capable of associating a space with specific positive feelings—whether it's the freshness of a coastal retreat or the warmth of an alpine lodge.

Practically, it also functions as a performance enhancer for other products. When properly diluted, it imparts consistent, long-lasting fragrance throw in reed diffusers, cold-scented candles, and ultrasonic diffusers. Its high concentration ensures economical use—only a few drops are needed per application. Additionally, it serves as a customizable base for DIY blending, allowing creators to mix and match regional profiles to develop entirely new signatures. Importantly, it functions as a safe alternative to burning traditional incense or synthetic air fresheners, offering a cleaner, more refined scent delivery method that respects both user health and indoor air quality.

### **Primary Applications:**

This fragrance oil is versatile across multiple platforms. Its primary application is in reed diffusers, where it is mixed with a compatible carrier oil (like DPG or fractionated coconut oil) at a 10–25% fragrance load to allow continuous, flameless scent diffusion for weeks or months. Another major use is in cold-scented candles—wax warmers or electric melters that heat wax without an open flame—preserving delicate top notes that would otherwise burn off. It is also ideal for ultrasonic diffusers, where a few drops in water create a fine, cool mist perfect for bedrooms, offices, or spa settings.

In candle making, this oil is added to soy, paraffin, or beeswax at the recommended temperature (typically below 85°C) to produce luxury scented candles with excellent hot throw. Beyond home use, it is applied in commercial settings like hotel lobbies, boutiques, and wellness centers for branding and guest experience. Additionally, crafters use it in potpourri, room sprays, or scented sachets. Some enthusiasts even apply it to porous materials like unscented wooden ornaments or clay diffusers for passive, long-term release. Always follow IFRA guidelines for each specific application to ensure safety and optimal performance.

### **Our Advantages:**

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

### Support and Services

Our R&D team includes PhDs and senior engineers, with established laboratories in partnership with universities. We integrate global technology to maintain product advantage through continuous innovation.

### Comprehensive Support Services

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

## Packaging and Shipping

### Product Packaging Options

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

### Shipping Information

Production time: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photos or samples for confirmation before shipping. Shipping options include ship, air, truck, and express delivery.
