Product Description

High Concentration Kardashian Perfume Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10175

This high-concentration Kim Kardashian-type perfume oil is a sophisticated and versatile fragrance designed for perfume production, offering a complex blend of floral, fruity, citrus, and woody accords . The fragrance opens with a fresh and vibrant burst of mandarin orange, African orange flower, and honeysuckle . This vibrant introduction gives way to a rich floral heart of jasmine, gardenia, tuberose, and a hint of spice, adding complexity and depth . The scent then settles into a warm and sensual foundation of musk, sandalwood, tonka bean, woody notes, and orchid, which provides excellent longevity and a memorable trail . This premium oil is phthalate-free and IFRA compliant, ensuring it is suitable for a wide range of product types . It is highly concentrated, so a small amount achieves strong scent projection. For perfume making, the recommended maximum usage is up to 5% . The oil is also suitable for candles (up to 10%), diffusers (up to 25%), and body wash (up to 5%), as well as soaps and shampoos . With a flashpoint above 93°C (>200°F), the oil is stable for various applications and has a typical shelf life of 1-2 years when stored properly in a cool, dry place away from light and heat .

Fragrance Profile:

This Kim Kardashian-type fragrance oil is characterized by a prominent white floral character, transitioning from bright citrus to a creamy, warm finish. The scent is specifically designed to be soft, elegant, and feminine .

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a vibrant and fresh blend of Honeysuckle, African Orange Flower, and Mandarin Orange . This combination provides a light, radiant, and slightly sweet introduction .

Middle Notes (Heart)	As the top notes fade, the heart of the fragrance reveals a rich and sultry floral bouquet. This core consists of Tuberose, Gardenia, Jasmine, and a hint of Spice, creating a creamy, feminine, and complex character .
Base Notes (Foundation)	The scent settles into a warm, sensual, and long-lasting foundation. The base is composed of Tonka Bean, Musk, Sandalwood, Orchid, and additional Woody Notes, providing a smooth and comforting finish that lingers gently on the skin .

Technical Specifications:

Parameter	Specification
Fragrance Notes	Kardashian Perfume Oil
Appearance	Transparent to amber liquid
Relative Density	0.940–0.975 g/cm ³ @ 25°C
Refractive Index	1.465–1.495
Flash Point	>93°C
Dosage	Body Mist: 3–8%; Fine Perfume: 15–30%; Eau de Parfum (EDP): 12–25%; Shower Gel & Shampoo: 0.2–1.0%; Body Lotion/Cream: 0.3–1.0%; Defuser: 25%; Candles:10%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change

Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions

This high-concentration perfume oil functions primarily as a versatile fragrance base for product creation, designed to impart a sophisticated, floral-woody scent signature to a wide range of finished goods . Its primary role is olfactory enhancement—transforming base materials like unscented wax, soap, or carrier oils into products with a distinct, luxury appeal. The oil serves as a customizable ingredient, allowing manufacturers and crafters to control fragrance intensity by adjusting the load percentage to suit different application needs . Due to its high concentration, it also acts as an economical solution, where a small quantity provides significant and lasting scent throw, reducing overall material costs. Furthermore, it functions as a stabilizing component in formulations; with a high flashpoint above 93°C, it remains stable during candle making and other heat-involved production processes . It also facilitates product differentiation, helping brands create items with unique, recognizable scents in competitive markets. Importantly, it functions as a compliant ingredient, being phthalate-free and IFRA-certified for safety across multiple product categories .

This versatile fragrance oil is formulated for use across a broad range of personal care and home fragrance applications. In personal care, it is suitable for body wash, shampoo, liquid soap, and bar soap at recommended usage rates . It is also ideal for perfume and body oil production, where its concentrated nature allows for extended longevity when applied to pulse points . In home fragrance, it excels in candle making (recommended up to 10%), reed diffusers (up to 25%), and incense applications . The oil can also be used in room sprays and laundry detergent at lower concentrations . It is particularly noted for its suitability in cold-scented candles and wax warmers, where gentle heat releases the fragrance without combustion. It is also used in potpourri, scented sachets, and as a lotion mixer for custom-scented body products . Always check IFRA guidelines and the manufacturer's specific safe usage rates for each application to ensure product safety and compliance .

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

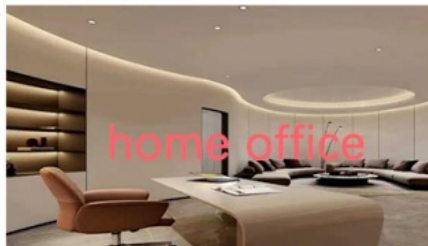

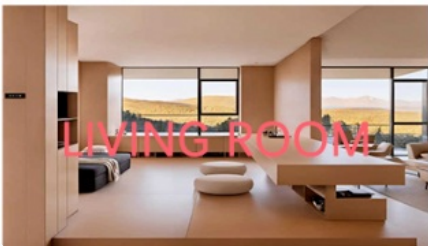

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
