Product Description

Concentration Body Care Fragrance Marly Pegasus Fragrance Oil For Perfume Production / Making With Free Sample

Product Code: LDZ-PL10395

Designed for artisan perfumers and boutique body care manufacturers, this high-concentration fragrance oil captures the metallic, powdery warmth of the iconic Parfums de Marly Pegasus. It serves as a premium raw material, offering a complex, niche-quality profile that elevates any custom product line into a high-end sensory experience.

The scent journey opens with an intriguing contrast of crisp bergamot, herbal cumin, and the sweet, marzipan-like facets of heliotrope. As the initial brightness softens, the fragrance unveils its signature heart: a striking fusion of bitter almond, clean lavender, and dewy jasmine. This refined core eventually transitions into a luxurious, comforting dry-down of creamy vanilla, milky sandalwood, and rich amber, leaving a sophisticated and highly memorable trail.

Unlike standard fragrance oils, this professional-grade concentrate is engineered for superior longevity and skin-safe performance. It acts as an incredibly versatile base, blending flawlessly with perfumer's alcohol to produce high-projection Eau de Parfums at a 15% to 20% dilution. Furthermore, its excellent heat stability makes it a reliable choice for enriching moisturizing body lotions, nourishing beard oils, and artisanal soaps (typically dosed at 1% to 3%), ensuring your creations maintain their upscale aromatic integrity from the first use to the last.

Fragrance Profile:

This high-concentration fragrance oil offers a masterfully balanced, amber-fougère profile characterized by a distinctive interplay of metallic coolness and creamy warmth. Designed to replicate the iconic Pegasus scent, its evolution on the skin is both complex and captivating.

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a vibrant, refreshing burst of crisp bergamot, immediately contrasted by the spicy, herbaceous warmth of cumin. A sweet, powdery touch of heliotrope rounds out the introduction, creating an intriguing, marzipan-like first impression.

Middle Notes (Heart)	At its heart lies the defining signature of the scent—a striking, bittersweet note of bitter almond. This is seamlessly blended with clean, aromatic lavender and a delicate whisper of fresh jasmine, lending the composition its refined, powdery-metallic elegance.
Base Notes (Foundation)	As the fragrance dries down, it settles into a deeply comforting, luxurious foundation. Creamy vanilla and milky sandalwood wrap the skin in a velvet-like warmth, while rich, golden amber ensures a long-lasting, sophisticated trail that lingers for hours.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Marly Pegasus Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.980–1.050 g/cm ³ @ 25°C
Refractive Index	1.480–1.520
Flash Point	>100°C
Dosage	Eau de Parfum (EDP): 15% – 20% (for maximum longevity and sillage) Eau de Toilette (EDT): 10% – 15% Body Lotions, Creams & Oils: 1% – 3% Shower Gels & Liquid Soaps: 2% – 5%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions

The primary function of this Pegasus-inspired fragrance oil is to deliver a highly sophisticated, long-lasting sensory experience across multiple mediums. Formulated as an uncut professional concentrate, it acts as a powerful aromatherapeutic and aesthetic agent. It infuses products with a distinct identity, utilizing its contrasting sweet, powdery, and warm metallic facets to captivate consumer senses. Beyond its immediate aromatic appeal, the oil is engineered with superior molecular tenacity. Its heavy, dense base notes—namely vanilla and sandalwood—serve as natural fixatives. This structural design ensures slow evaporation on the skin, prolonging the shelf life and performance of the scent. Furthermore, it functions as a highly stable raw material, designed to resist discoloration and maintain chemical integrity when blended into complex cosmetic bases. It preserves its exact, upscale scent profile without degrading, transforming standard formulations into luxurious, premium-tier consumer goods that command market attention.

This premium fragrance oil boasts immense versatility, serving as the olfactory cornerstone for a wide array of high-end product formulations. In fine perfumery, its primary application lies in the creation of artisan Eau de Parfums and Cologne sprays, dissolving seamlessly in perfumer's alcohol to offer strong sillage and exceptional projection. Its robust chemical stability also makes it perfect for luxury home-scenting applications, such as reed diffusers, room sprays, and high-end candles, where it retains its complex cold and hot throw.

In the personal care sector, this oil is widely utilized to elevate daily grooming rituals. It blends flawlessly into nourishing carrier oils to create moisturizing body oils, beard serums, and hair elixirs. Additionally, its skin-safe profile allows it to enrich thick body creams, moisturizing lotions, and cleansing shower gels. The oil maintains its rich aroma even in wash-off products, ensuring a lingering, luxurious scent trail.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
