## Product Description

### Body Oil Fragrances High Concentration Bvlgari Omnia Coral Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10631

Body Oil Fragrances High Concentration Bvlgari Omnia Coral Fragrance Oil is an elegant fragrance concentrate created for professional perfume manufacturing and bespoke fragrance development, inspired by the cheerful energy of Mediterranean summers and the brilliance of blooming coral-colored flowers. This fragrance celebrates vitality, femininity, and effortless sophistication through a luminous blend of juicy fruits, delicate blossoms, and soft musky woods. Rather than presenting an overly sweet floral scent, it focuses on freshness, transparency, and graceful refinement, making it particularly attractive to consumers who prefer light yet memorable fragrances with a modern signature.

Developed using precision fragrance technology and carefully selected aromatic ingredients, this concentrate offers a smooth scent evolution that unfolds naturally on the skin. Its vibrant opening gradually reveals a radiant floral heart before settling into a clean, velvety base that creates an elegant second-skin effect. The fragrance is designed to deliver a balanced sensory experience with remarkable clarity and natural diffusion, making it suitable for both everyday wear and premium lifestyle collections.

This fragrance oil is an excellent choice for Fine Perfume, Eau de Parfum (EDP), perfume oils, body mists, scented body oils, hair perfumes, and luxury personal care products. Its versatile floral-fruity profile harmonizes beautifully with citrus, peony, hibiscus, pomegranate, white musk, cedarwood, and soft amber accords, allowing perfumers to develop contemporary feminine fragrances, resort-inspired collections, seasonal limited editions, and exclusive private-label creations. With its elegant Mediterranean character and adaptable formulation, it offers fragrance houses and OEM/ODM manufacturers a distinctive platform for creating internationally appealing products that stand out in today's competitive fragrance market.

| Fragrance Notes         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top Notes (Opening)     | The fragrance begins with sparkling bergamot, juicy goji berries, pomegranate, and sweet mandarin. These refreshing top notes provide an energetic burst of fruity brightness with subtle citrus nuances, immediately conveying freshness and youthful vitality.                                                                                                                                                                                                                                                                        |
| Middle Notes (Heart)    | The heart unfolds into an elegant bouquet of hibiscus flower, water lily, peony, and delicate jasmine petals. These airy floral accords introduce softness and romance while maintaining the fragrance's vibrant character, creating a graceful transition between fruit and wood.                                                                                                                                                                                                                                                      |
| Base Notes (Foundation) | The fragrance finishes with a smooth base of Virginia cedarwood, white musk, cashmere wood, amber, and creamy sandalwood. These comforting notes provide a silky texture, gentle warmth, and impressive longevity without overwhelming the floral freshness. The overall composition is luminous, sophisticated, and versatile, making it an excellent choice for Fine Perfumes, Eau de Parfum (EDP), body oils, perfume mists, and luxury feminine fragrance collections that celebrate confidence, elegance, and contemporary beauty. |

| Long-lasting Fragrance | 8-12 hours (paper strip test)                                                                                                                                                                |
| Solubility             | Soluble in ethanol and oils; insoluble in water                                                                                                                                              |
| IFRA Compliance        | Conforms to International Fragrance Association safety standards                                                                                                                             |
| Heat Resistance        | Stable at 100°C with no noticeable discoloration or odor change                                                                                                                              |
| Lightfastness          | Good (avoid long-term direct sunlight)                                                                                                                                                       |
| Evaporation Rate       | Slow evaporation ensures smoother fragrance evolution                                                                                                                                        |

## Applications & Functions:

This high-concentration raw fragrance base serves as an aromatic foundation engineered to mimic the floral-fruity profile of Bvlgari Omnia Coral. Scientifically, its core function is to deliver a balanced volatile release, opening with vibrant bergamot and goji berry notes before transitioning into a heart of water lily, hibiscus, and pomegranate, anchored by cedarwood and musk.

Unlike alcohol-diluted perfumes, this concentrated oil-soluble compound acts as a powerful fixative. It dramatically enhances scent longevity, stabilizes volatile top notes, and ensures consistent olfactory depth across various batch sizes. Its dense, water-free structure prevents rapid evaporation, allowing formulators to precise-tune fragrance loads, optimize sillage, and maintain strict batch-to-batch consistency. By bonding seamlessly with carrier oils, solvents, and emulsion bases, it guarantees uniform distribution without separating, clouding, or degrading the texture of the final product mixture.

In commercial and artisanal manufacturing, this versatile oil is primarily utilized to blend fine fragrances, ranging from alcohol-based Eau de Parfum sprays to concentrated, oil-based roll-on perfumes. Beyond personal scents, it integrates smoothly into bath and body production, adding a premium signature aroma to body lotions, shower gels, rich body oils, moisturizing milks, and handcrafted soaps without disrupting the stability of emulsifiers or surfactants.

It is equally effective in ambient home fragrance development, serving as the scent driver for wax melts, reed diffusers, room sprays, and scented candles. The inclusion of a free sample serves a crucial technical purpose: it allows formulators to perform essential preliminary R&D, including cold/hot scent throw tests, skin compatibility evaluations, patch testing, and solvent solubility trials before committing to large-scale wholesale production runs.

## Industrial Applications

Primary applications include:

**Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils

**Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

**Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production

**Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques

**Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

## Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
