

Orchid & Jasmine Scent Fragrance Oil For Shower gel & Shampoo & Scented Soap Making /Productions with High-Surfactant Stability Free Sample

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL20687
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Description

Orchid & Jasmine Scent Fragrance Oil For Shower gel & Shampoo & Scented Soap Making /Productions with High-Surfactant Stability Free Sample

Product Code: LDZ-PL20687

Crafted explicitly for personal care manufacturing, this fragrance oil merges the velvety, exotic allure of tropical orchids with the rich, romantic warmth of blooming jasmine to elevate everyday cleansers. Unlike standard oils that can break down, fade, or alter chemical structures in surfactant-heavy environments, this specialized blend boasts exceptional stability. It resists discoloration and degradation across varying pH levels, ensuring your finished formulations retain their vibrant, true-to-bottle aroma. Engineered for seamless integration, it disperses effortlessly into both transparent and opaque bases without compromising the viscosity of your shampoos, shower gels, or artisan soaps. Furthermore, its advanced formulation incorporates superior fixative properties, allowing the sophisticated floral bouquet to bond effectively with the skin and hair, delivering a lingering, high-end fragrance experience long after the rinse cycle is complete.

Fragrance Profile & Characteristics:

This exquisite fragrance oil features a sophisticated floral and exotic scent family designed to transform ordinary cleansers into a luxurious sensory escape.

Top Notes	A crisp, refreshing opening of dew-kissed green leaves, airy ozone, and a subtle splash of bright citrus that immediately invigorates the senses.
Middle Notes	The lush, captivating core showcases velvety purple orchids and intoxicating, night-blooming jasmine blended with soft touches of lily of the valley for a deeply romantic bouquet.
Base Notes	Warm amber, velvety white musk, and a whisper of creamy sandalwood anchor the blend, adding rich depth, grounding earthiness, and lasting elegance.

Technical Specifications:

Product Name	Orchid & Jasmine Scent Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.950 to 1.020 g/cm³ @ 25°C
Flash Point	Up to 100°C (220°F)
Refractive Index (RI)	1.450 to 1.520 (at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shampoo/Body Washes:	0.8% - 1.5%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

Beyond basic scent delivery, this fragrance oil acts as an active functional component in cosmetic engineering. Its primary role is serving as an advanced odor-neutralizing agent, expertly masking the sharp, industrial baseline chemical smells of raw surfactants, unfragranced bases, and saponified oils without requiring excessive load percentages.

Furthermore, the oil provides crucial viscosity preservation. Unlike volatile additives that can destabilize surfactant networks or thin out liquid formulas, this blend integrates tightly to maintain a rich, uniform product texture. It also incorporates high-affinity aromatic fixatives that promote olfactory substantivity. This chemical affinity allows the rich floral molecules to bind effectively to keratin and skin proteins, ensuring the fragrance survives high-temperature dilution and rinse stages to leave a sustained signature trail on the user. Finally, it functions as a visuo-aesthetic stabilizer, preventing discoloration, phase separation, or cloudiness in clear liquid bases, thereby protecting the overall visual appeal, batch consistency, and market shelf-life of your final manufactured goods.

Applications:

This fragrance oil is expertly tailored for diverse utilization across the personal care and cleansing manufacturing sectors. In hair care production, it is widely incorporated into daily-use shampoos, volumizing hair washes, nourishing conditioners, and deep-treatment masks to leave locks lightly scented. For advanced body cleansing, it is heavily favored in rich shower creams, foaming body washes, exfoliating shower scrubs, and luxury bath gels, where it projects brilliantly in warm shower steam.

It is equally exceptional for solid and liquid soap production. Artisans and commercial scale factories seamlessly blend it into melt-and-pour soap bases, liquid hand washes, and traditional cold-process or hot-process bar soaps, where it withstands alkaline curing environments. Additionally, it finds niche utility in specialized facial and luxury care, such as premium facial cleansers, rich shaving foams, soothing intimate washes, and boutique bath salts. Its reliable solubility profile ensures smooth, uniform dispersion across both clear and opaque bases without ever compromising product performance.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
