Diffuser Fragrance Free Sample High Mountain White Tea Fragrance Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production

Product Code: LDZ-PL31554

Premium fragrance essence for diffusers, reed sticks, scented candles, and home spray productions

Product Overview:

High Mountain White Tea Fragrance Oil is a premium fragrance concentrate specially crafted for reed diffusers, cold-process scented candles, aroma diffusers, and professional home fragrance production. Inspired by handpicked white tea leaves cultivated in pristine high-altitude mountain gardens, this fragrance captures the refreshing purity of crisp morning air, delicate tea buds, and gentle botanical nuances. Its clean, elegant profile creates an atmosphere of tranquility and understated sophistication, making it an ideal choice for modern interiors, luxury hospitality spaces, and wellness-inspired environments. Unlike conventional tea fragrances that emphasize strong herbal or smoky notes, this composition focuses on the naturally smooth, airy character of freshly brewed white tea. Bright green facets blend seamlessly with subtle floral accents and soft woody undertones, producing a fragrance that feels light, balanced, and effortlessly refined. The scent develops gradually, providing a calming aromatic experience that enhances focus, relaxation, and everyday comfort without overwhelming the surrounding space.

Perfect for reed diffusers, cold scented candles, room sprays, linen mists, aroma stones, ceramic diffusers, fragrance sachets, and HVAC scent systems, this fragrance oil also complements luxury hotels, boutique resorts, wellness spas, yoga studios, premium offices, tea houses, upscale retail boutiques, and contemporary residential projects. It pairs beautifully with bergamot, bamboo leaves, white blossoms, jasmine tea, cedarwood, white musk, vetiver, and soft amber accords, allowing fragrance designers to develop signature ambient scent collections with a fresh botanical identity. Combining mountain-inspired purity with exceptional formulation versatility, this fragrance oil offers OEM/ODM manufacturers and private-label brands a distinctive foundation for creating sophisticated home fragrance products with lasting international appeal.

LDZ-PL30967

Coconut & Vanilla Fragrance

Production Date: April 25,2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Fragrance Profile & Characteristics:

Fragrance Notes	Description
Top Notes	The fragrance opens with refreshing bergamot, green mandarin, bamboo leaves, and dew-kissed tea sprouts. These lively top notes deliver a clean, invigorating introduction, evoking the cool mountain breeze and the freshness of newly picked tea leaves.
Middle Notes	At its heart, elegant high mountain white tea, white peony, jasmine petals, lily of the valley, and cotton blossom unfold gracefully. The floral accords soften the herbal nuances while preserving the tea's naturally delicate and slightly sweet character, resulting in a harmonious and serene aromatic experience.
Base Notes	The fragrance concludes with a comforting base of white cedarwood, soft vetiver, cashmere musk, amber crystal, and light sandalwood. These smooth woody and musky accords provide a clean, velvety finish that enhances the tea notes without adding heaviness. The overall fragrance is tranquil, sophisticated, and versatile, making it an ideal choice for reed diffusers, cold-process scented candles, room sprays, spa collections, boutique hotels, wellness retreats, and premium ambient fragrance programs that seek a naturally elegant botanical identity.

Technical Specifications:

Parameter	Specification
Product Name	High Mountain White Tea Fragrance Oil
Appearance	Colorless to light yellow transparent liquid
Relative Density	0.936–0.968g/cm³ @ 25°C
Refractive Index	1.456–1.486@ 20°C

Solubility	Easily soluble in ethanol and propylene glycol
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	12-24 months when stored in cool, dark place in sealed container
Standard Compliance	IFRA compliant with passed skin irritation testing

Functions & Applications:

High Mountain White Tea Fragrance Oil is designed to introduce a refreshing botanical atmosphere that promotes clarity, balance, and quiet sophistication within interior spaces. Inspired by the pure aroma of tea leaves cultivated in high-altitude mountain regions, this fragrance functions as a sensory element that refreshes the environment without becoming overpowering. Its crisp tea accord combined with subtle green and floral nuances creates an ambiance associated with cleanliness, mindfulness, and natural elegance, making it particularly suitable for hospitality, wellness, and contemporary residential settings.

From a formulation perspective, this fragrance oil acts as an effective bridging accord, harmonizing citrus, herbal, floral, and woody fragrance families into a cohesive composition. It softens sharp green notes while adding freshness to musky or woody bases, enabling perfumers to develop balanced ambient fragrances with a refined character. The composition is also well suited for creating daytime scent experiences, where a light and transparent fragrance is preferred to encourage concentration, relaxation, and emotional well-being. By supporting consistent scent identity throughout different environments, the fragrance helps establish memorable spaces that reflect modern lifestyle values centered on simplicity, nature, and understated luxury.

Primary Applications:

High Mountain White Tea Fragrance Oil is widely incorporated into premium home fragrance and commercial scenting collections that emphasize freshness, serenity, and botanical elegance. It performs exceptionally well in reed diffusers, cold-process scented candles, room sprays, ultrasonic diffusers, linen and fabric refreshers, scented wax tablets, aroma ceramics, fragrance sachets, and passive air diffusion products, providing a clean and inviting aromatic atmosphere across diverse environments.

Its application extends beyond residential products into boutique hotels, wellness resorts, tea lounges, meditation studios, luxury spas, executive offices, contemporary libraries, designer furniture galleries, premium retail boutiques, and upscale residential developments. The fragrance is especially suitable for spaces where a calm, sophisticated environment enhances customer comfort and strengthens brand perception. It also supports OEM/ODM fragrance development, eco-inspired home fragrance collections, wellness lifestyle brands, hospitality scent branding, and limited-edition botanical series. Thanks to its adaptable tea profile, the fragrance blends seamlessly with citrus, bamboo, white florals, aromatic herbs, light woods, and clean musk accords, enabling fragrance creators to develop distinctive scent collections that align with modern wellness trends while offering consumers a refreshing, nature-inspired sensory experience with broad international market appeal.

Our Advantages:

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support and Services

Our R&D team includes PhDs and senior engineers, with established laboratories in partnership with universities. We integrate global technology to maintain product advantage through continuous innovation.

Comprehensive Support Services

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation
