Product Description

Factory Flavour & Fragrance Soft(Black) Fragrance Oil For Body Perfume Making / Production With Free Sample

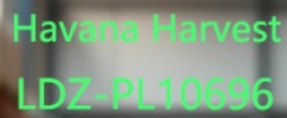

Product Code: LDZ-PL10139

Soft (Black) Fragrance Oil is an artistic fragrance concentrate created for fine perfume, perfume oils, body mists, and luxury personal fragrance production. Inspired by contemporary minimalism and the elegance of dark-toned fashion, this composition expresses quiet confidence through a seamless interplay of luminous fruits, velvety florals, and sophisticated woody accords. Rather than making a bold first impression, it develops with understated refinement, revealing new dimensions as it settles naturally on the skin.

The fragrance is designed to evoke the atmosphere of a modern boutique, an evening art exhibition, or an intimate rooftop gathering where style is communicated through subtle details instead of extravagance. Its smooth olfactory progression offers an elegant contrast between freshness and warmth, making it suitable for consumers seeking fragrances with character, depth, and individuality. This contemporary profile appeals equally to women and men who appreciate versatile scents that transition effortlessly from business settings to evening occasions.

Soft (Black) Fragrance Oil is an excellent choice for Eau de Parfum, perfume extracts, alcohol-based body sprays, fragrance oils, hair perfumes, scented body serums, and solid perfumes. It also supports niche fragrance collections, capsule perfume launches, designer collaborations, and bespoke OEM/ODM developments. Pairing beautifully with fig, black tea, iris, suede, cedarwood, smoky vetiver, ambergris accords, and creamy musk, it enables perfumers to create distinctive signature fragrances that reflect modern sophistication, artistic expression, and timeless urban elegance.

PZAN LDZ-PL10400 Jamine Essential Oil Fragrance

Production Date: April 25, 2026	Application: Daily Fragrance
Production Batch No.: 250425529	Usage: Add in appropriate amounts as needed in production

Fragrance Profile:

Soft (Black) Fragrance Oil is a contemporary woody-floral fragrance that embodies understated sophistication and effortless style. Smooth, elegant, and subtly mysterious, the composition is crafted to reveal its character gradually, creating a refined olfactory experience with remarkable depth and texture. Instead of relying on intense sweetness or powerful spices, this fragrance balances luminous fruits, delicate florals, and rich woods to achieve a modern, gender-inclusive scent profile. Its versatile personality makes it equally suitable for everyday elegance and evening refinement.

Fragrance Notes	Description
-----------------	-------------

Top Notes (Opening)	The fragrance opens with an invigorating combination of Italian bergamot, juicy blackcurrant, crisp pear, and pink pepper. These vibrant top notes introduce a fresh yet slightly spicy brightness, creating an energetic and polished first impression.
Middle Notes (Heart)	The heart develops into a sophisticated floral blend of iris, jasmine sambac, violet petals, black tea accord, and soft rose. Powdery iris lends a velvety texture, while the floral bouquet is enhanced by the subtle aromatic depth of black tea, giving the fragrance a contemporary and distinctive signature.
Base Notes (Foundation)	The base settles into a rich composition of cashmere wood, cedarwood, patchouli, ambergris accord, creamy sandalwood, tonka bean, and white musk. These warm woody and musky notes create a smooth, elegant trail that lingers beautifully on the skin. The overall fragrance is refined, versatile, and quietly luxurious, making it an excellent choice for fine perfumes, perfume oils, body mists, hair perfumes, and niche fragrance collections seeking a sophisticated modern identity.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Soft(Black) Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.952–0.985 g/cm³ @ 25°C

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Soft (Black) Fragrance Oil is developed to deliver a sophisticated fragrance experience that reflects confidence, elegance, and contemporary style. Rather than emphasizing overpowering projection, this composition functions by creating a refined scent signature that evolves naturally throughout the day. Its harmonious blend of fruity freshness, powdery florals, and smooth woody accords provides a balanced olfactory profile that appeals to consumers seeking understated luxury and everyday versatility.

Within perfume formulation, this fragrance oil serves as an effective structure-enhancing accord, adding depth, texture, and fluid transitions between the top, heart, and base notes. The composition also acts as an excellent blending modifier, softening bright citrus elements while enriching woody, musky, and amber accords with a silky finish. Its adaptable character enables perfumers to create fragrances suitable for both masculine and feminine markets as well as gender-neutral collections. Furthermore, the fragrance supports modern branding by expressing an image of urban sophistication, quiet confidence, and timeless elegance. Whether incorporated into

signature perfumes or exclusive seasonal launches, Soft (Black) Fragrance Oil helps establish distinctive olfactory identities that resonate with consumers seeking refined, fashion-inspired fragrances without excessive sweetness or heavy oriental intensity.

Soft (Black) Fragrance Oil is suitable for a wide variety of fine fragrance and premium personal care products, making it an excellent ingredient for modern perfume manufacturing. It performs exceptionally well in Eau de Parfum (EDP), Eau de Toilette (EDT), perfume oils, alcohol-based body mists, hair perfumes, scented body serums, solid perfumes, aftershave products, and fragrance-enhanced body lotions, delivering an elegant scent profile across multiple product formats.

Beyond traditional perfume applications, this fragrance is an excellent option for designer-inspired fragrance collections, niche perfume houses, limited-edition capsule launches, luxury gift sets, travel-size perfume ranges, and private-label OEM/ODM projects. Its versatile composition also suits premium grooming products, including beard oils, hand creams, and personal fragrance accessories designed for lifestyle-conscious consumers. The fragrance blends effortlessly with citrus, iris, violet, cedarwood, suede, patchouli, amber, tonka bean, and clean musk accords, allowing perfumers to create exclusive layered compositions with a distinctive contemporary identity. Its refined and adaptable character makes it ideal for brands targeting fashion boutiques, concept stores, high-end department retailers, and international fragrance markets where originality, sophistication, and commercial versatility are equally important.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
