Product Description

Concentrated Perfume Amber Ambergris Scent Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10264

Concentrated Amber Ambergris Scent Fragrance Oil is a premium perfume essence developed for fine fragrance creation, Eau de Parfum (EDP), perfume oils, extrait-style compositions, and customized perfume manufacturing. Inspired by the rich character of amber and the distinctive marine warmth associated with ambergris accords, this fragrance offers a sophisticated balance of resinous sweetness, soft marine nuances, warm woods, and sensual musk. Its elegant profile is designed for fragrance concepts that require depth, refinement, and a memorable dry-down.

Rather than presenting a simple sweet amber character, the composition can create a more dimensional olfactory experience. A subtle luminous freshness introduces the fragrance, followed by a smooth amber heart with creamy, slightly salty, and mineral-like nuances. As it develops, woody, musky, and balsamic elements provide a warm foundation, creating an enveloping trail that feels luxurious without becoming excessively dense.

The main image shows a large blue metal drum with two handles, positioned in the center of a warehouse floor. To the left of the drum is a silver spray bottle with a white cap and a green label. To the right is a gold perfume bottle with a decorative stopper and a label that reads 'CASAMORATI'. The background is a blurred warehouse with shelves and a forklift.

LDZ-PL30967

Coconut & Vanilla Fragrance

Production Date: April 25, 2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., LTD.

Address: No. 1, Xiyuan Road, Baiyun District, Guangzhou, Guangdong, 510540, China

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The opening features bergamot, grapefruit, marine accord, pink pepper, and fresh aldehydic nuances. These elements provide a sparkling and airy introduction, balancing citrus brightness with a delicate salty freshness. The result is an inviting opening that prevents the rich amber character from feeling too dense.
Middle Notes (Heart)	The heart develops around warm amber, labdanum, soft jasmine, rose, saffron, and creamy balsamic accords. Labdanum adds resinous richness, while saffron provides a subtle spicy dimension. Floral touches soften the composition and create a smooth transition toward the deeper base.
Base Notes (Foundation)	The dry-down reveals ambergris accord, sandalwood, cedarwood, patchouli, vanilla, musk, and soft incense. These notes provide depth, warmth, and a refined lingering trail. Ambergris and musk create a distinctive sensual texture, while woods and vanilla add smoothness and comfort.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Amber Amberggris Scent Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.960–0.990 g/cm³ @ 25°C
Refractive Index	1.470–1.500
Flash Point	>90°C (200°F)
Dosage	EDP:15–30% EDT:8–18% Body Mist:3–8% Perfume Oil:20–40% Grooming Products:0.3–1.0%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Concentrated Amber Ambergis Fragrance Oil functions as a rich and versatile perfume ingredient for developing fragrances with depth, warmth, and a refined sensual character. Its primary function is to establish a distinctive ambergis-inspired olfactory foundation, combining resinous warmth, subtle marine-mineral nuances, smooth woods, and soft musk. This gives perfumers a sophisticated base around which they can construct more complex fragrance compositions.

As a formulation ingredient, it can serve as a base accord, fixative-style supporting component, or character-enhancing material, depending on the overall perfume design. Its warm profile can help soften sharp citrus or aromatic openings, while its woody and musky facets provide continuity between the heart and dry-down. The amber character also contributes richness to floral, spicy, oriental, and gourmand compositions.

Another important function is fragrance differentiation. The distinctive ambergis-style character can give a perfume a more luxurious and niche-oriented personality, helping brands move beyond conventional sweet or floral profiles. It works particularly well in sophisticated

unisex concepts and can be modified with complementary materials to create different olfactory directions. Overall, this concentrated essence provides perfumers with a flexible tool for adding warmth, complexity, smoothness, and an elegant lingering character to premium fragrance formulations.

Functions:

Concentrated Amber Ambergis Fragrance Oil is primarily used in fine fragrance and premium perfume manufacturing, where its warm, sophisticated character can serve as a distinctive foundation for luxury scent concepts. It is suitable for Eau de Parfum (EDP), Eau de Toilette (EDT), extrait-style perfumes, perfume oils, roll-on fragrances, solid perfumes, body sprays, and body mists, subject to appropriate formulation and safety requirements.

Its refined profile makes it especially suitable for niche perfume collections, oriental-inspired fragrances, luxury unisex perfumes, private-label brands, boutique fragrance houses, and OEM/ODM customized perfume projects. It can also be incorporated into coordinated personal-care ranges, including scented body oils, lotions, hair perfumes, and premium grooming products.

For fragrance customization, the essence can be blended with bergamot, saffron, rose, jasmine, vanilla, sandalwood, cedarwood, patchouli, incense, leather, and marine accords. These combinations allow manufacturers to create variations ranging from luminous and contemporary to deep, oriental, and sensual.

It is particularly valuable for perfume developers seeking to establish a signature base accord across multiple products. By maintaining the same ambergis-inspired foundation while changing the supporting notes, brands can build cohesive fragrance families with different personalities and market positioning.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
