## Product Description

### Concentrated Perfume Rooftop Garden Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10266

Rooftop Garden Fragrance Oil is a concentrated perfume essence created for fragrance manufacturers and perfumers seeking a fresh, green, floral, and naturally uplifting scent concept. Inspired by the atmosphere of a flourishing garden above the city, its character combines crisp botanical freshness with delicate flowers and a clean, softly textured base. The overall impression is contemporary and airy, offering an alternative to conventional heavy floral perfumes.

This concentrated fragrance oil is suitable for Eau de Parfum (EDP), Eau de Toilette (EDT), perfume oils, roll-on perfumes, body mists, hair fragrances, and solid perfumes. It can also be used for private-label fragrance collections, boutique perfume projects, seasonal launches, gift sets, and OEM/ODM customized development.

## Fragrance Profile:

Rooftop Garden Fragrance Oil presents a fresh, green, floral, and slightly aquatic fragrance profile inspired by the feeling of a flourishing urban garden. Its character emphasizes natural-looking freshness rather than dense floral sweetness, creating a

clean and contemporary scent journey. The composition moves from sparkling botanical freshness into a soft floral heart before settling into a subtle woody-musky base.

| Fragrance Notes         | Description                                                                                                                                                                                                                                                                                                 |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top Notes (Opening)     | The opening features bergamot, lemon, green leaves, mint, and fresh watery accords. Citrus notes provide brightness, while leafy and minty nuances create a crisp, revitalizing sensation reminiscent of cool morning air among freshly watered plants. The aquatic touch adds transparency to the opening. |
| Middle Notes (Heart)    | The heart develops with jasmine, peony, neroli, rose, green tea, and delicate herbal accords. Jasmine and rose introduce graceful floral depth, while peony keeps the bouquet light and airy. Neroli contributes a subtle citrus-floral character, and green tea reinforces the clean botanical impression. |
| Base Notes (Foundation) | The dry-down combines cedarwood, sandalwood, soft amber, white musk, and earthy green nuances. These elements provide gentle warmth and structure without overpowering the fresher facets. Cedarwood adds dry woody definition, while sandalwood and musk create a smooth, comfortable finish.              |

### Technical Specifications:

Its balanced technical profile makes it suitable for fine perfumes, body mists, perfume oils, hair fragrances, and nature-inspired personal-care products. The green-floral composition can also be modified with citrus, tea, herbal, woody, or musk accords for customized fragrance development. Final dosage should be determined according to the finished product, intended application, and applicable fragrance-safety standards.

## Applications & Functions:

Rooftop Garden Fragrance Oil functions as a versatile concentrated fragrance ingredient for creating fresh, green, floral, and contemporary scent concepts. Its primary function is to establish a natural-inspired aromatic identity, combining crisp leafy nuances, sparkling citrus, delicate florals, and a soft woody-musky foundation. This structure gives fragrance compositions a sense of freshness and openness while maintaining sufficient depth for a comfortable dry-down.

As a formulation ingredient, it can serve as a main fragrance accord, supporting component, or blending foundation. Its green and citrus facets can brighten heavier compositions, while floral elements provide elegance and emotional warmth. The subtle woody and musky base helps connect the different layers and gives the finished fragrance greater smoothness and continuity.

The essence also supports product differentiation, particularly for brands developing fragrances inspired by botanical lifestyles, urban gardens, wellness, and modern nature. Perfumers can modify its personality by incorporating tea, herbs, aquatic materials, citrus, woods, or musk. This allows the same core fragrance to evolve into refreshing, elegant, minimalist, or softly sensual directions.

Rooftop Garden Fragrance Oil is primarily applied in fine fragrance and personal-care manufacturing, where its green-citrus-floral character can create a fresh and contemporary sensory experience. It is suitable for Eau de Parfum (EDP), Eau de Toilette (EDT), perfume oils, roll-on perfumes, body mists, hair fragrances, solid perfumes, and scented body oils, according to the requirements of the finished formulation.

Its botanical character also makes it appropriate for wellness-inspired and lifestyle fragrance collections, including products positioned around relaxation, freshness, urban greenery, and natural living. Manufacturers can incorporate the essence into coordinated product lines such as perfumes, body sprays, lotions, and hair fragrances to create a consistent scent identity.

For commercial fragrance development, it can be used in private-label perfume collections, boutique brands, seasonal launches, gift sets, travel-size fragrances, and OEM/ODM customized projects. Perfumers may combine it with bergamot, lemon, green tea, mint, basil, jasmine, peony, neroli, cedarwood, sandalwood, amber, or white musk to create differentiated variations.

Its adaptable character makes it especially useful for brands seeking a modern botanical theme, allowing manufacturers to develop products that feel fresh, airy, elegant, and connected with contemporary nature-inspired lifestyles.

## Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

## Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
