Product Description

Free Sample Herbal Mint Flavoring Scent Fragrance Oil For Shower gel & Shampoo & Scented Soap Making / Productions with High-Surfactant Stability

Product Code: LDZ-PL20314

Herbal Mint Flavoring Scent Fragrance Oil is a refreshing fragrance essence developed for shower gel, shampoo, scented soap, and personal-care product manufacturing. It combines the crisp, cooling character of mint with green herbal nuances, creating a clean and invigorating scent concept that feels particularly suitable for daily cleansing products. Unlike a simple mint fragrance, its herbal dimension adds greater natural character and olfactory depth.

This fragrance oil is suitable for shower gels, shampoos, conditioners, liquid soaps, bar soaps, hand washes, body washes, bath products, cleansing creams, and other fragranced personal-care formulations, subject to appropriate dosage and application-specific requirements. Its profile works particularly well for products positioned around freshness, cleanliness, active lifestyles, botanical care, and spa-inspired experiences.

With its cool mint freshness and layered herbal character, this essence provides a distinctive alternative to conventional single-note mint fragrances and can help brands develop more recognizable personal-care collections.

Fragrance Profile & Characteristics:

Herbal Mint Fragrance Oil presents a crisp, refreshing, and botanical mint-green aromatic profile, designed to create an immediate feeling of cleanliness and vitality. The composition combines cool mint with fresh herbs and subtle citrus facets, giving it more dimension than a straightforward mint scent. Its development moves from an invigorating opening into a green herbal heart before settling into a clean, softly woody base.

To p No tes	The fragrance opens with peppermint, spearmint, lemon, bergamot, and fresh green leaves. Peppermint delivers a pronounced cooling sensation, while spearmint provides a smoother, slightly sweet mint nuance. Citrus notes add sparkling brightness and prevent the opening from becoming overly sharp.
Mi dd le No tes	The heart features rosemary, basil, eucalyptus, green tea, and lavender. Rosemary and basil create an aromatic herbal character, while eucalyptus reinforces the refreshing quality. Green tea adds a clean, airy dimension, and lavender contributes a gentle floral-herbal softness.
Ba se No tes	The dry-down combines soft musk, cedarwood, light amber, mossy nuances, and subtle woody accords. These elements provide stability and a comfortable finish while preserving the fragrance's fresh botanical identity.

Technical Specifications:

Product Name	Herbal Mint Flavoring Scent Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.930 to 1.030 g/cm³ @ 25°C
Flash Point	Up to 100°C (220°F)
Refractive Index (RI)	1.442 to 1.505(at 20°C)
Phthalate-Free	Yes

Shampoo/Body Washes:	0.8% - 1.5%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

Herbal Mint Fragrance Oil functions as a refreshing and versatile fragrance ingredient for personal-care formulations that require a clean, invigorating, and botanical scent identity. Its main function is to deliver a distinctive combination of cool mint freshness, aromatic herbs, green nuances, and subtle citrus brightness, helping finished products create an immediate impression of cleanliness and vitality.

As a formulation component, it can serve as a primary fragrance accord, refreshing top-note enhancer, or botanical supporting ingredient. The mint facets provide a crisp sensory character, while rosemary, basil, eucalyptus, and green tea nuances introduce greater complexity and prevent the composition from smelling like a simple single-note mint. Soft woody and musky elements help round out the fragrance and create a smoother finish.

The essence can also support product differentiation and sensory positioning. Its profile is suitable for concepts associated with freshness, active lifestyles, botanical care, spa experiences, and everyday cleanliness. Perfumers can customize its personality by combining it with lemon, cucumber, lavender, eucalyptus, green tea, citrus, or soft musk accords.

Overall, Herbal Mint Fragrance Oil provides a practical way to enhance the freshness, aromatic complexity, and recognizable sensory identity of shampoos, shower products, soaps, and other cleansing formulations.

Applications:

Herbal Mint Fragrance Oil is primarily applied in personal-care and cleansing product manufacturing, particularly where a crisp,

green, and refreshing fragrance is desired. It is suitable for shower gels, shampoos, conditioners, liquid soaps, bar soaps, hand washes, body washes, bath products, cleansing creams, and fragranced personal-care formulations, subject to the appropriate dosage and application-specific safety requirements.

Its cooling botanical character makes it especially suitable for freshness-focused, spa-inspired, sports, wellness, herbal-care, and daily cleansing product concepts. Manufacturers can incorporate the fragrance into coordinated product ranges, such as matching shampoo, shower gel, body wash, and soap collections, creating a consistent aromatic identity across multiple formats.

The essence is also appropriate for private-label personal-care brands, hotel and spa amenities, promotional gift sets, seasonal launches, OEM/ODM projects, and customized fragrance development. It can be blended with peppermint, spearmint, eucalyptus, rosemary, basil, lemon, bergamot, cucumber, green tea, lavender, or white musk to develop different sensory directions.
