

Oil Burner Fragrances Fig Flavoring Fragrance Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production With Free Sample

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plant
- Certification: COA, MSDS, IFRA, CE, ISO
- Model Number: LDZ-PL30171
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum, 4 Drum/carton, 20kgs/carton (41*28*33.5cm); Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm) (0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C, T/T, Western Union
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Description

Oil Burner Fragrances Fig Flavoring Fragrance Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production With Free Sample

Product Code: LDZ-PL30171

Premium fragrance essence for diffusers, reed sticks, scented candles, and home spray productions

Product Overview:

This fig fragrance oil is a versatile, premium-grade aromatic designed specifically for cold-scented candles, reed stick diffusers, and artisanal production. Beyond its balanced profile of fresh green fruit and ripe sweetness, it features an optimized high flash point for safe heating and a carefully balanced viscosity that ensures smooth capillary action in diffusers without clogging.

Because fruit-inspired scents can occasionally interact with certain bases, a preliminary patch test is recommended to monitor for potential UV-induced ambering. Creatively, the oil serves as a fantastic standalone luxury scent or a dynamic base that pairs seamlessly with earthy vetiver, warm sandalwood, or crisp citrus notes. Its natural, sophisticated character makes it exceptionally easy to transition across seasonal collections and elevate with minimalist, botanical branding.

LDZ-PL30967

Coconut & Vanilla Fragrance

Production Date: April 25, 2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., LTD

Address: No. 1, Xeyuan Road, Baiyun District, Guangzhou, Guangdong, 510540, China

Tel: 86-19924190535

Fragrance Profile & Characteristics:

Fragrance Notes	Description
Top Notes	The opening delivers an immediate burst of crisp green accords, fresh fig leaves, and bright fruit hints (such as subtle red fruit or citrus zests). This provides a clean, uplifting, and slightly sharp botanical introduction.
Middle Notes	At the heart lies the rich, lactonic character of ripe fig fruit, often blended with creamy coconut milk, soft florals, or green sap. This core balances a natural, velvety sweetness with earthy vegetal nuances.
Base Notes	The dry-down settles into a warm, grounded foundation featuring amber, tonka bean, cedarwood, and soft sandalwood. These elements anchor the lighter fruit facets, ensuring a lasting, cozy, and sophisticated ambiance in candles and diffusers.

Technical Specifications:

Parameter	Specification
Product Name	Fig Flavoring Fragrance Oil
Appearance	Colorless to light yellow transparent liquid
Relative Density	0.995–1.015g/cm³ @ 25°C
Refractive Index	1.450–1.485@ 20°C
Flash Point	>93°C-100°C
Ingredients	Natural & Synthetic Aromatic Compounds
Recommended Dosage	Aroma Sachets: 3–8% Cold Process Candles: 6–10%; Room Spray: 2–6%; Hot Process Candles: 5–8%; Wax Melts: 6–10%; Reed Diffuser: 15–30%;
Volatilization Rate	Maintains continuous fragrance for 20-30 days, covering 15-25 square meters
Solubility	Easily soluble in ethanol and propylene glycol
Compatibility	Compatible with most anionic, nonionic, and zwitterionic surfactants
Shelf Life	12-24 months when stored in cool, dark place in sealed container
Standard Compliance	IFRA compliant with passed skin irritation testing

Functions & Applications:

The Fig Flavoring Fragrance Oil is meticulously engineered for versatile multi-industry manufacturing, finding its primary application in home fragrance curation, artisanal crafting, and ambient scent production. In candle making, it integrates seamlessly into cold-scented wax formulations, traditional container candles, and decorative wax melts utilizing soy, paraffin, or coconut wax bases. For passive scent distribution, it serves as an optimal solution for reed stick diffusers, capillary flower diffusers, and unheated ambient room fresheners, requiring only a compatible solvent base. Beyond home decor, crafters frequently utilize this oil in small-batch production lines for

specialized items such as customized room mists, ceramic scent stones, drawer sachet refreshers, and decorative plaster diffusers. Its balanced chemistry also allows it to be adapted into select personal care and cosmetic goods, including melt-and-pour soap bases, bath salts, and body lotions, provided it adheres to strict maximum skin-safe usage percentages. Whether utilized by independent artisans or commercial production facilities, the oil adapts smoothly across a wide array of wax, oil, alcohol, and surfactant mediums without losing core aromatic stability.

Primary Applications:

The primary function of this fig fragrance oil is to deliver a long-lasting, sophisticated, and true-to-nature olfactory experience that transforms living environments. Olfactorily, it functions as a complex atmospheric enhancer, utilizing its crisp green top notes to instantly refresh a room, its rich fruity heart to provide warm sweetness, and its woody base notes to ground the environment with a cozy, luxurious ambiance. Functionally, within reed diffusers, it acts as an active diffusing agent; its controlled viscosity allows the liquid to travel smoothly upward through porous rattan or synthetic reeds via capillary action, ensuring a consistent and steady release of fragrance into the air over several weeks or months. In candle production, it functions as both a cold throw and hot throw enhancer, binding effectively with melted wax molecules to emit a robust scent profile whether the candle is unlit on a shelf or actively burning. Furthermore, it serves a strategic branding function for product makers, helping establish a Mediterranean, earthy, or upscale botanical identity that appeals to consumer preferences for natural, calming, and stress-relieving home fragrances.

Our Advantages:

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

Support and Services

Our R&D team includes PhDs and senior engineers, with established laboratories in partnership with universities. We integrate global technology to maintain product advantage through continuous innovation.

Comprehensive Support Services

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

Packaging and Shipping

Product Packaging Options

Pack Type	Quantity	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Shipping Information

Production time: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photos or samples for confirmation before shipping. Shipping options include ship, air, truck, and express delivery.
