Product Description

Candle Fragrances Wholesale Chamomile and Vetiver Fragrance Oils For Hot / Cold Process Scented Candles Productions/Making

Product Code: LDZ-PL40501

Product Overview:

Chamomile and Vetiver wholesale fragrance oils provide a deeply grounding, earthy, and soothing olfactory profile specifically engineered for high-performance scented candle production. This sophisticated blend merges the gentle, herbaceous, and apple-like sweetness of calming chamomile with the rich, smoky, and woody complexity of exotic vetiver.

Designed for commercial and artisan candle makers, premium wholesale variations of this oil offer exceptional chemical stability across various wax mediums, including soy, paraffin, and coconut-soy blends. The formulation anchors securely into the wax matrix, preventing thermal degradation during high-temperature hot pouring and ensuring a reliable, consistent scent release. It delivers a remarkable cold throw for unlit display pieces and a rich, enveloping hot throw that gently fills a room without overwhelming the senses.

Free from harmful parabens and phthalates, this clean-burning oil is ideal for wellness-focused home collections. The soft, herbal chamomile top notes impart an immediate sense of tranquility, while the deep, grounding vetiver base creates a luxurious, spa-like ambiance reminiscent of high-end rustic retreats. It is an exceptional choice for evening relaxation lines, bedroom candles, and modern minimalist seasonal collections.

Fragrance Profile

Top Notes	The fragrance opens with a gentle, calming breath of fresh herbaceous chamomile, crisp green apple nuances, and a light splash of sparkling bergamot. This delicate, airy introduction creates an immediately inviting and tranquil cold throw.
Middle Notes (Heart)	As the bright opening settles, the heart reveals a rich, comforting blend of aromatic clary sage, sweet lavender blossoms, and warm bruised tea leaves. This botanical core introduces a gentle herbal warmth that adds complexity and depth to the unfolding aroma.
Base Notes	The foundation anchors the profile with deep, grounding, and luxurious earthy elements. Smoky vetiver, sun-drenched cedarwood, and soft ambergris combine to create a lingering, woody finish that ensures a rich, stable, and long-lasting hot throw when burned.

Technical Specifications

Fragrance Profile	Chamomile & Vetiver Fragrance Oils
Appearance	Clear to pale yellow liquid
Relative Density	0.890 to 0.940 g/cm³ @ 25°C
Refractive Index	1.465 - 1.495@ 20°C
Flash Point	>85°C (185°F)
Ingredients	Natural & Synthetic Aromatic Compounds
Phthalate-Free	Meets modern "clean scent" standards for luxury retail

Recommended Dosage

Application	Dosage
Soy / Coconut / Beeswax:	7% – 10%
Paraffin Wax:	6% – 8%
Wax Melts / Tarts:	10% – 12%
Soap Applications (CP/HP)	3% – 5% (Check IFRA Category 9 for safety limits).

Performance Characteristics

Thermal Diffusion	Excellent - Fills 20-30 square meters in 3-5 minutes after lighting
Thermal Stability	Engineered to resist degradation at standard candle-pouring temperatures (65°C - 80°C)

Cold Throw	Excellent - Noticeable aroma when unburned
Hot Throw	Excellent - Strong and steady aroma spread while burning
Wax Compatibility	Excellent - Blends seamlessly with soy wax, beeswax, coconut wax, paraffin wax, and blends
Solubility	100% oil-soluble; prevents sweating or oil pooling on candle surface
Shelf Life	24 months when stored in cool, dark place
IFRA Compliance	Complies with IFRA standards and passed skin irritation testing

Functions & Applications:

The primary function of the Chamomile and Vetiver fragrance oil is to provide superior aromatic performance and structural stability within various candle wax formulations. Engineered specifically for candle production, it acts as a stabilizing binding agent that integrates smoothly into soy, paraffin, and coconut wax matrices without causing oil separation, sweating, or surface pitting. The oil possesses a high flash point and robust thermal resistance, ensuring that delicate herbaceous top notes do not completely burn off or degrade under high pouring and burning temperatures. It functions to neutralize any unpleasant natural odors inherent in raw, untreated waxes while optimizing both the cold throw and hot throw. By releasing a steady, evenly dispersed aroma from the unlit state through to the full melt pool, it creates a lingering scent presence. Additionally, the complex blend of herbal and earthy compounds functions as an aromatherapy tool, designed to evoke deep relaxation, reduce stress, and foster a calm, meditative atmosphere in both domestic and professional spaces.

Primary Applications:

This fragrance oil is widely applied across artisan and commercial home fragrance manufacturing, specifically optimized for scented candle production using soy, beeswax, paraffin, and coconut-derived wax blends. It is a preferred choice for container candles, luxury pillar candles, and minimalist travel tins intended for bedrooms, bathrooms, and meditation spaces where tranquility is desired. Beyond traditional candles, the formulation is heavily applied in the creation of scented wax melts, flameless tart cubes, and contemporary wooden-wick candles that require a clean, steady release. In broader home fragrance lines, makers frequently utilize this wholesale oil to scent reed diffusers, room and linen sprays, and bath and body formulations like artisanal soaps. Boutique decor brands often feature this earthy, sophisticated profile in autumn and winter wellness collections or year-round luxury spa lines, appealing directly to consumers seeking grounding, nature-inspired aromatic identities for their home environments.

Our Advantages

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications,such as ISO22000,COA
MSDS、SGS、ISO9001、ISO22000、HACCP、IFRA、SPEC

Support & Services

Our R&D team includes PhDs and senior engineers with university partnerships, integrating global technology for continuous innovation. We assist customers in improving product aroma, quality structure, and reducing production costs with tailored solutions.

Comprehensive Support Includes:

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- OEM support for custom scents
- Training and education on fragrance formulation

Packaging & Shipping

Product Packaging

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm 5kg*4 bottle per carton	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Shipping Information: Production begins immediately after payment. Lead times: 3-5 days for trial orders, 5-10 days for bulk orders. We provide photo confirmation or bulk samples before shipping via ship, air, truck, or express according to client requirements.
