Product Description

Concentrated Perfume Essence Oil Paco Rabanne Ultraviolet Scent Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10408

Concentrated Perfume Essence Oil Paco Rabanne Ultraviolet Scent Fragrance Oil is a professionally developed fragrance essence inspired by the distinctive oriental-floral character associated with Ultraviolet. Originally introduced in 1999 and created by perfumer Jacques Cavallier Belletrud, the fragrance is recognized for its unusual contrast between fresh spicy accents, powdery violet, fruity nuances, and a warm woody-amber foundation.

This concentrated oil opens with a lively combination of pepper, pimento, coriander, apricot, fresh almond, and rosewood, creating an energetic first impression with a subtly fruity and spicy character. The heart develops into a more expressive floral layer, where violet, Japanese osmanthus, rose, and jasmine create a soft, powdery, slightly exotic effect. Its dry-down becomes warmer and more enveloping through vanilla, amber, patchouli, and cedar, giving the composition greater depth and persistence.

As a concentrated perfume essence, this fragrance oil is suitable for perfume making, Eau de Parfum, perfume oils, body mists, and other personal fragrance formulations, depending on the intended application and permitted dosage. It offers manufacturers a distinctive foundation for developing memorable floral-oriental products, customized fragrance collections, and OEM/ODM perfume projects.

Coconut & Vanilla Fragrance

Production Date: April 25, 2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with an intriguing burst of pepper, orange pepper, pimento, coriander, apricot, fresh almond, and Brazilian rosewood. The spicy ingredients create a bright, energetic lift, while apricot introduces a soft fruity sweetness. Fresh almond and rosewood add a subtle creamy-woody texture, giving the opening a distinctive, contemporary character.
Middle Notes (Heart)	As the initial spice gradually softens, the composition transitions into an elegant floral heart centered around violet, Japanese osmanthus, rose, and jasmine. Violet provides the signature powdery and slightly cool impression, while osmanthus contributes a delicate fruity-floral nuance. Rose and jasmine enrich the heart with greater floral volume and smoothness, creating a balanced contrast against the peppery opening.
Base Notes (Foundation)	The dry-down develops into a warm, enveloping foundation of vanilla, amber, patchouli, and cedar. Vanilla contributes creamy sweetness, amber adds warmth and radiance, while patchouli introduces earthy depth. Cedar provides a clean woody structure that anchors the composition and gives the concentrated perfume oil a distinctive, lingering oriental-floral character. Overall, the profile combines spicy freshness, powdery florals, fruity softness, and warm woods in a memorable olfactory progression.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Paco Rabanne Ultraviolet Scent Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.900–0.980 g/cm³ @ 25°C
Refractive Index	1.450–1.500
Flash Point	>70°C (158°F)
Dosage	Cosmetic Bases: 1% to 2% EDP:15–30% EDT:8–18% Body Mist:3–8% Perfume Oil:20–40% Shampoo/Shower Gel:0.2–1.0%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Concentrated Perfume Essence Oil Paco Rabanne Ultraviolet Scent Fragrance Oil can be applied across a wide range of personal fragrance and scented-product formulations. Its distinctive spicy-floral and warm woody character makes it particularly suitable for perfume making, Eau de Parfum, perfume oils, Eau de Toilette, body sprays, and fragrance mists. It can also be incorporated into roll-on perfumes, solid perfumes, body lotions, creams, shower products, and hair fragrance formulations, provided the appropriate dosage and regulatory requirements are followed. For home and lifestyle fragrance development, the oil may be considered for reed diffusers, scented sachets, air-freshening products, and selected candle applications, depending on compatibility with the finished base. Its recognizable violet-floral identity provides an attractive option for manufacturers developing fragrance collections with a distinctive character rather than a conventional floral profile. It is also suitable for OEM/ODM projects, private-label perfume ranges, customized fragrance blends, and seasonal product launches, giving formulators flexibility to adapt the scent across different product formats while maintaining a consistent

olfactory direction.

Functions:

The primary function of this concentrated fragrance oil is to provide a distinctive olfactory signature to finished perfume and scented formulations. Its layered structure helps create a smooth transition from an energetic spicy opening to a powdery floral heart and a warm, woody-amber dry-down, giving products greater aromatic dimension. In perfume manufacturing, it can serve as a main fragrance concentrate, character accord, or blending component, allowing perfumers to modify intensity and combine it with complementary ingredients. The composition can also help establish a recognizable scent identity across multiple products within the same collection, supporting consistent brand positioning and fragrance recognition. Its concentrated format offers formulation flexibility, while the combination of violet, fruity, spicy, vanilla, patchouli, and woody facets can provide a useful foundation for creative perfume development. For manufacturers, another practical function is supporting custom fragrance development, where the accord can be adjusted to create different intensity levels or olfactory interpretations. Final performance depends on the formulation, dosage, substrate, and applicable IFRA requirements.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
