

Body Wash Fragrance Floral Fruit Lux Scent Fragrance Oil Scent Fragrance Oil For Shower gel & Shampoo & Scented Soap Making /Productions with High-Surfactant Stability

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plan
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL21156
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

Body Wash Fragrance Floral Fruit Lux Scent Fragrance Oil Scent Fragrance Oil For Shower gel & Shampoo & Scented Soap Making / Productions with High-Surfactant Stability

Product Code: LDZ-PL21156

This fragrance oil blend is specifically formulated for personal care manufacturing, tailored for incorporation into shower gels, shampoos, and artisan soap productions. The profile combines bright, juicy fruit notes with delicate, blooming floral undertones, creating a balanced and refreshing scent architecture designed to appeal to contemporary consumers seeking an uplifting cleansing experience.

Engineered for cosmetic applications, the formulation demonstrates high compatibility with surfactant systems, ensuring it remains stable and maintains clarity within clear bases like liquid body washes and shampoos without causing undesirable viscosity thinning or phase separation. In cold-process or melt-and-pour soap making, the oil holds its integrity well through the saponification and curing stages, delivering a reliable scent throw that lingers on the skin post-rinse.

Safety and compliance remain central to its application, as the concentration levels must be calibrated according to standard industry guidelines—typically ranging from 0.5% to 2% for rinse-off products like shower gels and up to 3% for bar soaps, depending on the specific base chemistry and desired scent intensity. Proper testing for skin compatibility and preservative efficacy is recommended during the formulation phase to ensure a safe, high-performing final commercial product.

PLAN

Fragrance Profile & Characteristics:

Top Notes	The fragrance profile opens with a vibrant and energetic burst of top notes featuring crisp orchard pear, sparkling mandarin, and succulent red berries, delivering an immediate, refreshing fruit impression upon application.
Middle Notes	As the initial brightness softens, the heart transitions into a lush, romantic bouquet of middle notes showcasing velvety jasmine petals, dewy muguet, and soft pink peony, which add a sophisticated and classic floral depth to the formulation. The scent settles into a warm, grounding base of sheer musk, creamy sandalwood, and a subtle touch of golden amber, anchoring the lighter fruit and floral components while providing a clean, lingering trail on the skin.
Base Notes	This harmonious three-tier architecture ensures a dynamic olfactory experience that performs exceptionally well across various rinse-off bases, maintaining its multi-dimensional character from the bottle through the entire showering and bathing process.

Technical Specifications:

Product Name	Floral Fruit Lux Scent Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.965 to 0.985 g/cm³ @ 25°C
Flash Point	Up to 93°C (200°F)
Refractive Index (RI)	1.455 to 1.475(at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shampoo/Body Washes:	1% - 3%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

The Floral Fruit Lux Scent fragrance oil is expertly engineered for seamless integration across a diverse range of personal care and cosmetic manufacturing sectors. Its primary commercial application lies in the production of luxury shower gels and body washes, where its high surfactant compatibility prevents phase separation and maintains product clarity in transparent bases. In hair care manufacturing, it is widely utilized for formulating everyday and premium shampoos, imparting a clean, long-lasting aroma that clings delicately to the hair fiber without weighing it down. Additionally, the fragrance oil serves as a staple for artisan and commercial soap makers producing both cold-process and melt-and-pour artisan bar soaps. Its robust chemical stability allows it to withstand the rigorous saponification environment and high curing temperatures without degrading or turning acrid. Beyond these core uses, formulators frequently incorporate this versatile oil into complementary bath and body products such as foaming hand washes, bath salts, and body lotions, ensuring a cohesive and unified scent narrative throughout an entire product collection.

Applications:

The primary function of this fragrance oil is to deliver a sophisticated, multi-tiered sensory experience that elevates consumer perception and masks any inherent chemical base odors typical of raw surfactants and soap stocks. By releasing a bright, inviting aroma upon initial contact with water, it transforms an ordinary daily cleansing routine into an uplifting ritual of self-care. On a technical level, it functions as an active compounding agent designed to harmonize with complex cosmetic matrices, imparting consistent olfactory performance from the first pump of the bottle to the final post-rinse stage on the skin. Furthermore, its balanced formulation acts as a fixative carrier, anchoring volatile fruit and floral components so they linger pleasantly without overwhelming the user. For brand manufacturers, it functions as a critical market differentiator, providing a signature luxury identity that builds emotional connection, enhances perceived product value, and drives repeat consumer purchasing behavior across competitive retail landscapes.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
