

Body Wash Fragrance Fresh Scent Fragrance Oil For Shower gel & Scented Soap & Shampoo Making /Productions with High-Surfactant Stability

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Plan
- Certification: COA,MSDS,IFRA,CE,ISO
- Model Number: LDZ-PL21163
- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Description

Body Wash Fragrance Fresh Scent Fragrance Oil For Shower gel & Scented Soap & Shampoo Making /Productions with High-Surfactant Stability

Product Code: LDZ-PL21163

Fresh scent fragrance oils are versatile, synthetic or blended aromatic compounds engineered specifically for personal care formulations, including body wash, shower gels, liquid and bar soaps, and shampoos. Characterized by crisp, clean, and invigorating olfactory profiles—often featuring aquatic, citrus, ozone, or green herbal notes—these oils are formulated to remain stable when exposed to surfactants and varying pH levels found in cleansers. When utilized in production, high-grade cosmetic fragrance oils disperse evenly through liquid surfactant bases without heavily disrupting viscosity or causing premature separation. Makers typically incorporate them at recommended usage rates ranging from 0.5% to 2% for rinse-off products like body wash and shampoo, ensuring an aromatic experience that is neither overpowering nor irritating to the skin. Because fresh profiles rely heavily on volatile top notes, quality manufacturing processes ensure good longevity on the skin and hair post-rinse. When formulating, producers must verify IFRA compliance for wash-off cosmetics to guarantee safety, while also checking for potential discoloration issues—such as those caused by trace vanillin—to keep the final crystal-clear or colored shower product visually appealing.

PLAN

PLAN

Fragrance Profile & Characteristics:

Crisp and invigorating, fresh scent fragrance oils are structured to deliver a clean, aquatic olfactory experience designed for daily personal care products.

Top Notes	Citrus: Sparkling lemon zest, bergamot, and juicy grapefruit providing an immediate, energetic burst of brightness. Ozone & Air: Crisp mountain air, marine accords, and dewy rain notes that mimic an open-air atmosphere.
Middle Notes	Green & Herbal: Crushed mint leaves, cucumber water, and fresh-cut grass adding a natural, botanical crispness. Floral: Light, watery florals like white lotus, lily of the valley, and soft muguet that soften the sharp edges.
Base Notes	Woody & Clean: Sheer cedarwood, white amber, and clean musk anchoring the blend to skin and hair after rinsing. Mossy: Subtle oakmoss or subtle green moss providing depth and longevity without heavy sweetness.

Technical Specifications:

Product Name	Fresh Scent Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.940 to 0.998 g/cm³ @ 25°C
Flash Point	Up to 93.5°C (200°F)
Refractive Index (RI)	1.445 to 1.485(at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shampoo/Body Washes:	1% - 3%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

The primary function of this fresh scent fragrance oil is to deliver an invigorating, clean sensory profile that effectively neutralizes base-formula odors while elevating the overall user experience in rinse-off hygiene products. Engineered with high surfactant stability, it functions to disperse seamlessly across complex chemical matrices without destabilizing viscosity, separating oil phases, or causing premature clouding in clear formulations. It acts as an active aromatic agent designed to withstand aggressive surfactant systems—such as those found in sodium lauryl sulfate or milder glucosides—ensuring the delicate balance of top, middle, and base notes remains intact during dilution and lathering. Furthermore, it functions as a mood-enhancing component, leveraging crisp aquatic and citrus elements to impart a revitalizing psychological effect during the bathing process. By utilizing balanced volatility rates, the oil functions to release an immediate burst of aroma upon contact with warm shower water while simultaneously depositing subtle, long-lasting anchor notes that linger pleasantly on the skin and hair post-rinse. It also serves as a critical compliance-safe additive that meets strict dermal safety thresholds, functioning safely within specified concentration limits to prevent skin sensitization or irritation in daily-use personal care items.

Applications:

This versatile fragrance oil finds its primary industrial and artisan applications within the broad spectrum of personal care manufacturing, specifically tailored for rinse-off cleansers like body washes, moisturizing shower gels, and foaming bath liquids. It is extensively utilized in hair care production lines for formulating clarifying, volumizing, and daily-use shampoos where a clean, long-lasting scent profile enhances consumer appeal. In solid and liquid soap manufacturing, it is applied across both commercial syndet bar production and traditional cold-process or hot-process artisan soap making, provided the formula accounts for trace acceleration and discoloration risks. Beyond standard wash-off formulas, formulators apply this oil in specialty items such as hand washes, bubble baths, and invigorating body scrubs where surfactant compatibility and water-dispersibility are essential. Contract manufacturers and boutique cosmetic brands alike leverage its stable chemical profile to create cohesive, whole-body fragrance lines—unifying shampoos, conditioners, and body cleansers under a single, signature crisp aromatic identity.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
