Product Description

Body Wash Fragrance Head & shoulders Scent Fragrance Oil For Shower gel & Shampoo & Scented Soap Making /Productions with High-Surfactant Stability

Product Code: LDZ-PL21238

Body Wash Fragrance Head & Shoulders Fragrance Oil is a fresh, clean, and recognizable fragrance solution developed for manufacturers of shampoo, shower gel, body wash, scented soap, and related personal-care products. Inspired by the crisp, invigorating character associated with modern hair-care fragrances, it is designed to give cleansing formulations a distinctive aromatic identity while creating a refreshing sensory impression during everyday use.

The fragrance opens with a bright and energetic freshness, creating an immediate perception of cleanliness and vitality. As it develops, subtle aromatic and floral nuances provide greater smoothness and balance, while the dry-down leaves a comfortable, clean character that complements the freshly washed feeling. This progressive scent development makes the fragrance suitable for products positioned around freshness, personal care, and daily grooming.

Beyond fragrance enhancement, this oil can help mask base odors from surfactants and other formulation ingredients, while providing a consistent scent direction across different product formats. It is suitable for liquid shampoos, shower gels, body washes, liquid soaps, and scented bar soaps, subject to formulation compatibility and application-specific requirements.

For private-label and customized personal-care collections, this fragrance offers a practical starting point for creating products with a familiar yet commercially appealing scent identity. Final dosage, stability, and regulatory compliance should be evaluated before production.

Fragrance Profile & Characteristics:

T o p N o t e s	The fragrance begins with a crisp citrus accord, cool mint, and refreshing green nuances, creating an immediate impression of cleanliness and revitalization. The opening feels bright and energetic, making it especially suitable for shower and hair-care products designed around a freshly washed sensation.
M i d d l e N o t e s	After the initial burst fades, the heart develops into a clean aromatic blend with subtle floral and herbal facets. Gentle lavender-like nuances add softness, while green and airy tones maintain the composition's invigorating character. This balanced middle stage prevents the fragrance from becoming overly sharp and gives it a smooth, contemporary personality.
B a s e N o t e s	The dry-down introduces soft woods, light musk, and subtle amber nuances, providing warmth and persistence without overpowering the clean character. These deeper elements help anchor the fresher opening and create a comfortable residual scent on hair or skin.

Technical Specifications:

Product Name	Head & shoulders Scent Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.950 to 1.050 g/cm³ @ 25°C
Flash Point	Up to 93.5°C (200°F)
Refractive Index (RI)	1.450 to 1.520 (at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards

Application	Usage Rate
Shampoo/Body Washes:	1% - 3%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

This fragrance oil is designed to give personal-care formulations a recognizable feeling of freshness, cleanliness, and everyday comfort. Its primary function is to enhance the overall sensory identity of shampoos, shower gels, body washes, and scented soaps while helping mask the inherent odors of surfactants, cleansing agents, and other raw materials. The fresh aromatic character can create a cooling and invigorating impression, making the finished product feel more refreshing during use. Beyond simple odor enhancement, the fragrance can contribute to product differentiation by establishing a clean, energetic scent profile that appeals to consumers seeking a crisp bathing experience. Its balanced structure also allows formulators to develop products with a pleasant fragrance impact without making the aroma excessively heavy. Depending on the formulation, it can support both functional cleansing products and premium personal-care concepts. The fragrance may also be adjusted through customized blending to achieve different levels of freshness, aromatic intensity, softness, or longevity according to specific brand positioning and market preferences.

Applications:

This fragrance oil is particularly suitable for rinse-off personal-care products where a fresh, clean, and invigorating aroma is desired. It can be incorporated into shampoos, anti-dandruff-style shampoos, shower gels, body washes, liquid soaps, and scented cleansing products. Its crisp aromatic direction works well with formulations positioned around freshness, daily cleansing, active lifestyles, or a refreshing shower experience. For shampoo applications, the fragrance can complement cooling or herbal product concepts, while in shower gels and body washes it can create a lively sensory impression from application through rinsing. It may also be used in liquid or bar soap formulations, depending on fragrance stability and compatibility with the soap base. For

manufacturers, the oil provides an opportunity to develop private-label or customized personal-care collections with a familiar fresh profile while adjusting intensity for different target markets. Recommended dosage should be determined through formulation trials, considering the base, processing conditions, fragrance stability, and applicable IFRA requirements for the intended product category.

Packaging Options

Pack Type	QTY	Specification	Volume
