Product Description

Body Wash Fragrance Pheromone Fragrance Oil For Shower gel & Shampoo & Scented Soap Making / Productions

Product Code: LDZ-PL21157

Pheromone Fragrance Oil is a distinctive fragrance solution developed for personal care products that aim to combine a clean sensory experience with a more intriguing and memorable scent character. Rather than relying on an overly sweet or heavy profile, this fragrance can be designed around smooth, modern, skin-friendly aromatic impressions, creating a subtle balance between freshness, warmth, and softness. Its refined character makes it suitable for brands seeking a contemporary fragrance concept for daily-use cleansing products.

Formulated for versatility, Pheromone Fragrance Oil can be incorporated into shower gels, shampoos, body washes, liquid soaps, and scented soap products. It helps enhance the overall fragrance identity of a formulation while complementing cleansing and moisturizing concepts. The fragrance can also help mask the inherent odor of surfactants, botanical extracts, preservatives, and other functional ingredients, leaving a more pleasant scent after use.

For manufacturers, this fragrance provides opportunities to develop differentiated personal care collections, private-label products, and customized fragrance concepts. Its aromatic direction can be adjusted toward fresher, warmer, cleaner, muskier, or more sensual interpretations according to market positioning and consumer preferences. Suitable dosage should be determined through formulation, stability, compatibility, and sensory testing.

PLAN

PLAN

Fragrance Profile & Characteristics:

Top Notes	The fragrance opens with a clean, fresh combination of sparkling citrus, airy aldehydic nuances, and subtle green accents. These opening notes provide an immediate sense of freshness and cleanliness, creating a lively yet smooth first impression without becoming excessively sharp.
Middle Notes	At the heart, soft floral accords blend with transparent aromatic facets and delicate powdery nuances. Gentle jasmine, fresh lavender-like tones, and clean floral elements create a sophisticated transition from the bright opening to a warmer, more intimate character. The heart is designed to feel smooth and naturally refined on the skin.
Base Notes	The dry-down introduces soft musk, creamy woods, subtle amber, and warm skin-like nuances. This foundation gives the fragrance a comfortable, sensual, and lingering character while maintaining a clean personal-care impression. The musky-woody base also helps create a modern and memorable scent identity.

Technical Specifications:

Product Name	Pheromone Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.940 to 1.010 g/cm³ @ 25°C
Flash Point	Up to 93°C (200°F)
Refractive Index (RI)	1.450 to 1.480(at 20°C)
Phthalate-Free	Yes

Shampoo/Body Washes:	0.2% - 1%
Shower Gel:	0.2% - 1%
Liquid Soap:	0.3–1.5%;
Bar Soap (CP/MP):	0.5% - 2%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

Phormone Fragrance Oil serves as a sensory enhancement ingredient that gives personal care formulations a distinctive and memorable fragrance identity. Its balanced fresh, floral, musky, and warm character can enrich the user experience without making the product feel excessively heavy or sweet. One key function is to improve the overall olfactory profile of cleansing formulations by complementing functional ingredients and helping soften the inherent odors of surfactants, preservatives, botanical extracts, and other raw materials. Its clean yet subtly sensual character can also support product positioning around confidence, freshness, individuality, and modern self-care. For manufacturers, the fragrance offers flexibility in developing differentiated product lines, allowing the scent direction to be adjusted toward cleaner, warmer, softer, muskier, or more aromatic interpretations. It can further help establish consistency across a coordinated range of shower, hair-care, and soap products. With suitable formulation and stability testing, the fragrance can provide a pleasant scent during use and contribute to a more recognizable brand experience after cleansing. Final dosage should follow applicable safety and IFRA requirements.

Applications:

Phormone Fragrance Oil is designed for a broad range of rinse-off personal care products, making it a versatile choice for manufacturers developing contemporary cleansing collections. It can be incorporated into shower gels, body washes, shampoos, liquid hand soaps, cleansing products, and scented bar soaps. In shower gel and body wash formulations, its fresh and musky character can create a refined aromatic experience during bathing, while in shampoo it can provide a recognizable scent signature that complements daily hair-care routines. For liquid and solid soaps, the fragrance can add warmth and personality to otherwise

functional cleansing products. It is particularly suitable for private-label, OEM, and customized personal care ranges positioned around freshness, confidence, sophistication, or a more intimate skin-scent concept. Manufacturers may also blend it with floral, citrus, woody, amber, or aromatic accords to create differentiated variations for different markets. Recommended dosage should be optimized according to the formulation base, processing conditions, fragrance stability, packaging compatibility, and intended product category, with current supplier documentation and applicable IFRA standards reviewed before production.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm
