Product Description

High Concentrated Perfume Oil For Fragrance Hidden Fantasy Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10117

High Concentrated Hidden Fantasy Fragrance Oil is a versatile fragrance concentrate developed for perfume manufacturers seeking a distinctive, expressive scent profile with strong commercial appeal. Inspired by the idea of a mysterious and playful fragrance, it combines bright fruity freshness with soft floral nuances and a warm, comforting dry-down, creating an aroma that feels youthful, feminine, and intriguingly layered. The composition is designed to evolve gradually on the skin, offering a lively opening before transitioning into a smoother and more sensual character.

Its concentrated format makes it suitable for developing a variety of fine-fragrance products, including Eau de Parfum, Eau de Toilette, body perfume, perfume oils, body sprays, and customized fragrance creations. Manufacturers can adjust the dosage according to the desired intensity, product format, and target-market positioning. The fragrance can also serve as a foundation for private-label collections, allowing brands to create their own interpretation with modifications to fruitiness, floral softness, sweetness, musk, or warmth.

For B2B buyers, this perfume oil provides flexibility for OEM/ODM projects, sample evaluation, and customized scent development. Free samples can be provided for preliminary olfactory assessment and formulation testing. Final dosage, stability, compatibility, and applicable IFRA requirements should be confirmed before commercial production.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a lively blend of juicy tropical fruits, sparkling citrus, and delicate green nuances. Bright fruity accents create an energetic first impression, while subtle sweetness gives the opening a playful and inviting character without feeling overly dense.
Middle Notes (Heart)	The heart develops into a soft floral-fruity bouquet, where gentle jasmine-like florals and delicate floral accords are complemented by smooth fruity nuances. A light powdery touch adds femininity and refinement, creating a seamless transition from the vibrant opening toward the warmer dry-down.

Base Notes (Foundation)	The scent moves from **bright and fruity** to **softly floral** , then finishes **warm, musky, and subtly sweet** . This layered structure makes it suitable for Eau de Parfum, body fragrance, perfume oils, body sprays, and customized fine-fragrance creations.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Hidden Fantasy Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.930–1.010 g/cm ³ @ 25°C
Refractive Index	1.460–1.510
Flash Point	>75°C
Dosage	Home Fragrance: 6%–10% Body Mist: 1%–5%; Eau de Parfum (EDP): 15–25%; Body Oils/Lotions: 0.3–1%; Shower Gel & Shampoo: 0.2–1.0%; Fine Perfume: 15–30%; Soap/wash-off: 1.5-4%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)

Evaporation Rate	Slow evaporation ensures smoother fragrance evolution
------------------	---

Applications & Functions:

High Concentrated Hidden Fantasy Fragrance Oil functions as a versatile scent ingredient for creating a recognizable and emotionally engaging fine-fragrance experience. Its layered fruity, floral, sweet, and musky character can provide a strong olfactory identity while allowing the fragrance to evolve naturally from the initial spray to the dry-down. One important function is to enhance the sensory appeal of perfume formulations, helping manufacturers create products with greater personality and a distinctive fragrance signature. The concentrate can also serve as a flexible fragrance base for adjusting sweetness, fruitiness, floral softness, warmth, or musk according to different market preferences. Its concentrated format supports formulation flexibility, enabling perfume developers to fine-tune fragrance intensity across various product types. For private-label and OEM projects, it can provide a useful starting point for developing customized interpretations rather than relying on a one-dimensional scent profile. The fragrance is particularly appropriate for concepts emphasizing youthful elegance, playful femininity, confidence, or a mysterious personal style. Final concentration should be optimized according to the perfume base, intended product format, stability requirements, sensory testing, and applicable IFRA standards.

High Concentrated Hidden Fantasy Fragrance Oil is suitable for a broad selection of fine-fragrance and personal scent products. It can be used in Eau de Parfum, Eau de Toilette, perfume oils, body perfumes, body mists, fragrance sprays, scented lotions, and other perfumed

personal-care products, subject to appropriate formulation and regulatory requirements. For perfume manufacturers, its fruity-floral and warm musky character provides a flexible foundation for developing feminine, youthful, romantic, or contemporary fragrance collections. It can also be incorporated into private-label and OEM/ODM projects where brands require a distinctive scent direction that can be further customized for their target market. Developers may modify the balance of fruity brightness, floral softness, sweetness, musk, or woody warmth to create different variations within the same fragrance concept. The oil is also suitable for sampling and preliminary formulation evaluation, allowing buyers to assess its olfactory performance before larger-scale production. When used commercially, dosage should be determined according to the selected carrier, perfume concentration, skin-contact application, stability, packaging compatibility, and the latest IFRA requirements for the specific finished product category.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

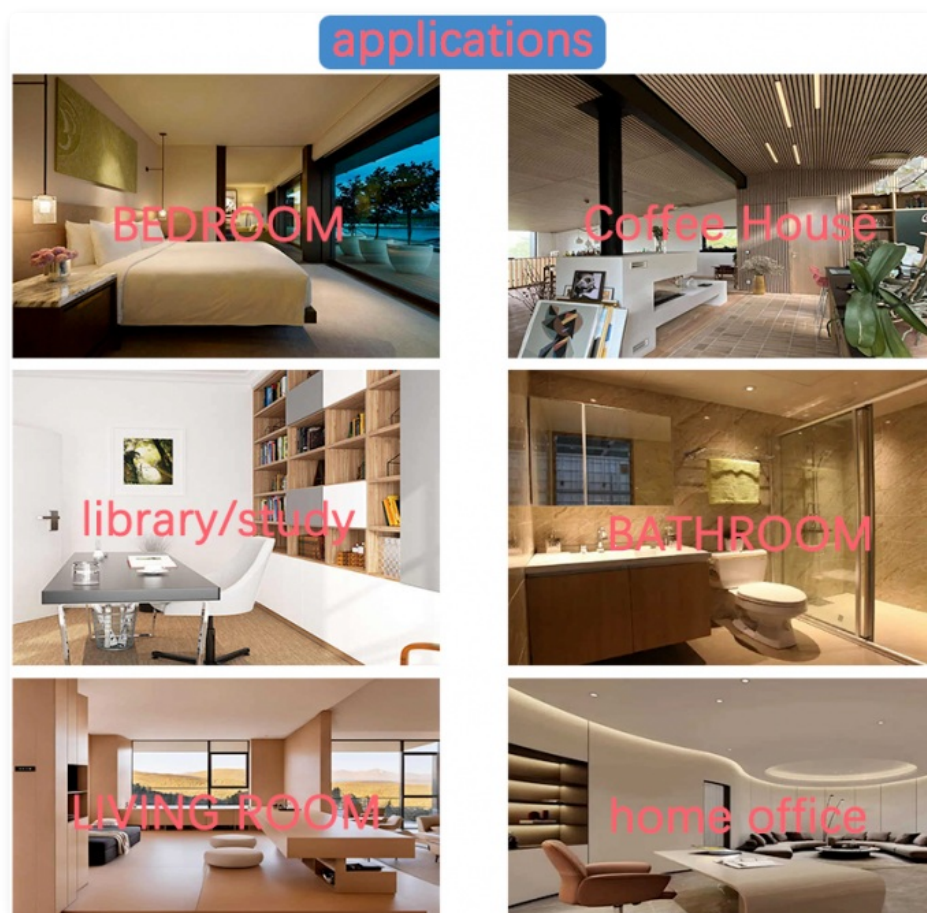

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, HACCP, IFRA, SPEC
