## Product Description

Free Sample Eco Friendly Aloe Scent Fragrance Oil For Laundry Detergent / Softener Production/Making  
Product Code: LDZ-PL50157

### Product Description:

It is a refreshing and versatile fragrance solution developed for laundry detergents, fabric softeners, and other fabric-care formulations. Inspired by the clean, watery character associated with aloe, this fragrance combines fresh green nuances with a soft, lightly aquatic impression to create a scent that communicates cleanliness, comfort, and gentle care. Its understated profile makes it an appealing alternative to stronger floral or intensely sweet laundry fragrances.

Designed for modern laundry products, the fragrance can help enhance the sensory identity of a formulation from the moment the package is opened through the washing experience and the finished-fabric stage. The balanced aromatic character is intended to complement detergent and softener bases without overwhelming their functional positioning. When properly formulated, it can contribute to a pleasant perception of freshly washed, naturally clean fabrics.

The eco-friendly positioning makes this fragrance particularly suitable for brands developing products around sustainability, mildness, fresh living, and environmentally conscious household care. Its aloe-inspired character can support product concepts such as sensitive-care laundry, botanical freshness, everyday family washing, and minimalist cleaning ranges.

For manufacturers, the fragrance offers flexibility across liquid detergents, fabric conditioners, concentrated laundry products, scent boosters, and fabric-refreshing solutions, subject to formulation compatibility and applicable regulatory requirements. It can also provide a foundation for customized fragrance development, allowing adjustments to freshness, greenery, aquatic character, or softness according to specific brand requirements.

## Sweet Orange Fragrance LDZ-PL50126

**Product Feature:**

It features a clean, green, and softly aquatic fragrance structure designed to give laundry products a fresh and comforting sensory identity. Its layered composition combines botanical freshness with a gentle, modern clean-laundry impression, making it suitable for detergent and fabric softener formulations.

|             |                                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top Notes   | The opening delivers a crisp burst of watery freshness blended with green aloe nuances and a subtle citrus lift. These notes create an immediate impression of coolness and cleanliness, giving the fragrance a light and invigorating beginning without becoming sharply acidic or overly herbal.                                                                                                      |
| Heart Notes | As the fragrance develops, the heart reveals a smooth aloe accord supported by delicate green leaves, soft aquatic florals, and a slightly dewy character. This stage provides the fragrance with its distinctive botanical personality. The combination feels fresh and naturally soothing, while maintaining enough brightness to complement the clean character of laundry-care products.            |
| Base Notes  | The dry-down settles into a gentle foundation of clean musk, soft woods, and subtle amber nuances. These elements add warmth and roundness while helping the fragrance transition smoothly from its watery-green opening. The overall profile is fresh yet understated, combining botanical inspiration with a polished fabric-fresh impression suitable for contemporary eco-conscious laundry brands. |

**Technical Parameter:**

| Key Parameters         |                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------|
| Fragrance Type         | Aloe Scent Fragrance Oil                                                                |
| Appearance             | Clear to Pale Yellow Liquid                                                             |
| Odor Profile           | Typical sweet orange fruit aroma with bright citrus notes and soft woody finish         |
| Flash point            | >93°C (200°F)                                                                           |
| Fragrance lasting time | After multiple washes, the scent lasts for more than 72 hours                           |
| Specific Gravity       | 0.930 - 1.030 g/mL                                                                      |
| Refractive Index       | 1.505 - 1.596 (20°C)                                                                    |
| Product Range          | Air Fresheners, Diffusers, Scented Candles, Room Sprays                                 |
| Solubility             | Easily soluble in ethanol, propylene glycol, surfactant system, and miscible with water |
| Recommended Usage Rate | Laundry detergent: 0.1% - 0.5% (w/w); Fabric softener: 0.05% - 0.3% (w/w)               |
| Storage conditions     | Store in a cool, dry, dark place, away from high temperature                            |
| Shelf time             | 24 Months from Manufacture (Properly Stored)                                            |
| Stability              | Good stability at high temperature (50°C, 30 days) and pH (3-10) conditions             |
| Safety                 | Complies with IFRA International Fragrance Association standards, non-irritating        |

#### FUNCTIONS & APPLICATIONS:

Primarily as a sensory fragrance ingredient that enhances the overall olfactory character of laundry-care formulations. Its fresh green and watery profile can help transform a basic detergent or softener base into a more appealing finished product with a recognizable botanical identity. The aloe-inspired character creates an impression of coolness, cleanliness, and gentle freshness, making it suitable for brands that want to move beyond conventional lemon, lavender, or generic “fresh” fragrance directions.

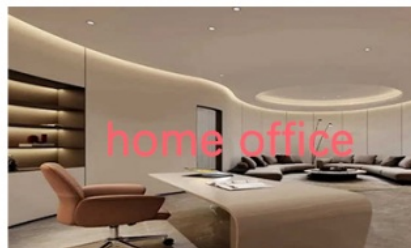

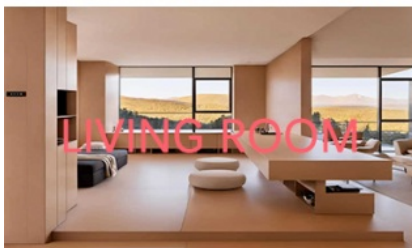

In addition to improving fragrance appeal, it can help create a consistent scent experience throughout product use. Depending on the formulation, concentration, and processing conditions, the fragrance can contribute aromatic freshness during washing and leave a soft, clean impression on fabrics after laundering. Its balanced composition is designed to complement rather than overpower the functional character of laundry products.

The fragrance can also support product differentiation and sensory branding. An aloe-based scent provides a natural-inspired concept that can reinforce positioning around freshness, mild care, and environmentally conscious living. It may therefore contribute both to the sensory performance and market identity of modern household-care products.

#### Applications Of Our Products:

It is formulated for use in a variety of laundry and fabric-care products where a fresh botanical fragrance is desired. Its principal applications include liquid laundry detergents, concentrated detergents, fabric softeners, fabric conditioners, and other compatible washing formulations. The clean aloe direction is particularly suitable for products positioned around gentle freshness, botanical inspiration, everyday care, or environmentally conscious household cleaning. Beyond conventional detergent and softener products, it may also be explored in laundry scent boosters, fabric-refreshing sprays, washing beads, and selected household-care formulations, provided that compatibility and applicable regulatory requirements are satisfied. Manufacturers can use the fragrance across complementary products to establish a unified scent identity, helping consumers associate the aloe profile with a particular product range. For OEM and ODM development, this fragrance can serve as a flexible foundation for customized scent concepts. Its green, aquatic, floral, or musky aspects can potentially be adjusted to create different sensory directions according to the target market and brand positioning. Before mass production, manufacturers should conduct dosage, stability, compatibility, and sensory evaluations in the intended base formula to determine the optimal application level.

## applications

Our Advantages:

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

## Support and Services:

We definitely have the fragrance essence oils you need!

The Plant Flavours & Fragrance company has a R&D team consisting several PH.Ds and senior engineers, and has established associated laboratory with many universities and college. Meanwhile the company integrates global technology, information and resource to keep advantage of our products and services by continuous innovation on natural ingredients. The company has always been closed to assist customers to improve the aroma of products and structure of the quality and reduce production costs, tailored to customers, to meet the aroma needs of different daily necessities, we are one of the best enterprises of cost and services in the industry.

**Fragrance Oil for perfume making, We Support OEM Your Own Scent Or Other Classical flavor. Contact Us For Inquiry NOW.**

Where there are fragrance, there are plant flavor.

The reason why our enterprise develops so rapidly is that we gradually meet the demands of our customer by improving the quality of their products and shortening their good deliver time. In case of urgent demands of customers, we adopt our contingency measures to help our customers solve the problem in time.

Meantime, we offer Training and Education on fragrance formulation and usage for the customized who interested in our fragrance.

Our Fragrance Oil product comes with comprehensive technical support and services to ensure that our customers have a seamless experience.

We offer:

- 1.Product usage instructions and guidance;
2. Expert advice on fragrance selection;
3. Technical support for any issues or concerns;
4. Product customization services;
- 5.Assistance with regulatory compliance.

### Packing and Shipping:

#### Product Packaging:

| Pack Type      | QTY      | Specification                              | Volume   |
|----------------|----------|--------------------------------------------|----------|
| Plastic Bottle | 5kgs     | L41*W28*H33.5cm<br>5kg*4 bottle per carton | 0.038cbm |
| Metal Barrel   | 25kgs    | D30*H45cm                                  | 0.032cbm |
| Jerry Can      | 20-25kgs | L29.5*D29.5*H41cm                          | 0.33cbm  |

#### Shipping:

After the payment, we'll arrange the production of your order ASAP. Normally, It will take 3-5days for trial order with small quantity, around 5-10 days for bulk order. Before shipping out, we'll take photos of the goods for confirmations with clients, or supply bulk sample for confirmation as well.

We offer shipping goods by ship, by air ,by truck , and by express, according to the clients requirements.
