Product Description

Body Wash Fragrance Rejoice Fragrance Oil (tea tree) Fragrance Oil For Shampoo & Shower gel & Scented Soap Making /Productions with High-Surfactant Stability

Product Code: LDZ-PL21233

The Rejoice Fragrance Oil featuring tea tree is a specialized cosmetic-grade aromatic blend engineered specifically for crafting personal care items such as shampoos, shower gels, and scented soaps. It delivers a crisp, clean, and invigorating herbal aroma reminiscent of fresh tea tree leaves, providing an energizing and spa-like sensory experience for the end user. Expertly formulated to integrate smoothly into both liquid surfactant bases and solid soap matrices, this oil maintains excellent stability without causing premature separation or disrupting product consistency. It is ideal for producers and makers looking to design clarifying hair treatments, refreshing body washes, and purifying bar soaps that impart a long-lasting, revitalizing scent connoting health and cleanliness. By combining the appealing aromatic profile of tea tree with reliable cosmetic-grade performance, it offers a consistent and versatile solution for high-foaming cleansing products.

For formulators seeking an alternative to pure essential oils, this component provides a reliable, cost-effective scent option that withstands the saponification process and surfactant mixing without losing its core identity. It bypasses common batch-discoloring hurdles while ensuring that items like clarifying washes or daily shampoos maintain a uniform olfactory profile from the first use to the last drop.

PLAN

Fragrance Profile & Characteristics:

Top Notes	The fragrance opens with a sharp burst of fresh green herbs, cool eucalyptus-like nuances, and a subtle citrus-terpene lift. This energetic opening creates an immediate impression of cleanliness and freshness without excessive sweetness.
Middle Notes	The heart highlights the distinctive tea tree accord, combining herbal, slightly medicinal, camphoraceous, and leafy-green nuances. A soft aromatic character adds body, making the fragrance feel invigorating while retaining its botanical identity. This stage forms the main personality of the fragrance and works particularly well in cleansing-oriented personal-care products.
Base Notes	The dry-down develops into a subtle woody, earthy, and soft musky foundation, which rounds out the sharper herbal facets and provides greater depth. The overall composition is clean, refreshing, botanical, and modern, making it suitable for shampoo, shower gel, and scented soap formulations.

Technical Specifications:

Product Name	Rejoice Fragrance Oil (tea tree) Fragrance Oil
Fragrance Profile	Floral-Fruity- aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.950 to 1.050 g/cm³ @ 25°C
Flash Point	Up to 93°C (200°F)
Refractive Index (RI)	1.450 to 1.520(at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shampoo/Body Washes:	1% - 3%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

Rejoice Fragrance Oil (Tea Tree) functions as a refreshing fragrance ingredient that gives personal-care formulations a distinctive herbal and clean sensory identity. Its crisp tea tree character can help enhance the overall fragrance experience of shampoo, shower gel, and scented soap, creating an impression of freshness immediately after opening and during use. The aromatic profile combines green, herbal, cool, and subtly camphoraceous facets, helping prevent the finished product from smelling flat or overly sweet. It can also be used as a fragrance-building component in more complex compositions, where its invigorating character can complement citrus, mint, eucalyptus, floral, woody, or soft musky accords. For manufacturers, this makes it useful for developing cleansing-oriented products with a botanical or refreshing positioning. The fragrance can contribute to brand differentiation by providing an alternative to conventional fruity or floral profiles.

Applications:

It is primarily designed for personal-care products requiring a fresh, herbal, and clean fragrance direction. It can be incorporated into shampoos, shower gels, body washes, liquid soaps, and scented bar soaps, subject to formulation compatibility and applicable fragrance-use requirements. Its botanical character is particularly suitable for cleansing products positioned around freshness, revitalizing shower experiences, and contemporary herbal scent concepts. Manufacturers can also explore the fragrance in scalp-care-inspired shampoos, men's grooming products, sports-oriented shower products, hand washes, and other rinse-off formulations where a crisp aromatic impression is desired. For broader product ranges, the tea tree profile can be combined with citrus, mint, eucalyptus, lavender, woods, or musk to create differentiated fragrance variations. In OEM and ODM development, it can serve as either a recognizable signature accord or one component within a more complex fragrance composition.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm

Production begins immediately after payment (3-5 days for trial orders, 5-10 days for bulk orders). We provide photos or samples for confirmation before shipping via ship, air, truck, or express according to customer requirements.
