Product Description

Body Wash Fragrance Olive Oil Flavoring Fragrance Oil For Shower gel & Shampoo & Scented Soap Making /Productions with High-Surfactant Stability

Product Code: LDZ-PL21245

Olive Oil Flavoring Fragrance Oil is a distinctive fragrance solution developed for shower gels, shampoos, scented soaps, and other personal-care formulations seeking a natural-inspired and comforting sensory identity. Inspired by the characteristic aroma associated with olive oil and fresh olive-derived ingredients, this fragrance combines soft green, slightly fruity, creamy, and subtly earthy nuances to create a smooth and sophisticated profile.

Unlike conventional fruity or floral fragrances, its Mediterranean-inspired character can give personal-care products a more botanical, nourishing, and premium impression. The fragrance is designed to complement cleansing formulations without creating an excessively sweet or overpowering aroma. Its balanced character can help transform a basic shower or bathing routine into a more pleasant sensory experience while providing a recognizable signature for the finished product.

For manufacturers, Olive Oil Fragrance Oil offers versatility across different personal-care concepts. It can be used in shower gels, shampoos, body washes, liquid soaps, scented bar soaps, and other compatible rinse-off products. Its green and creamy character can also be blended with citrus, herbs, woods, musk, or floral accords to create differentiated fragrance variations.

For OEM and ODM projects, this fragrance can serve as a foundation for customized scent development according to brand positioning and target consumers.

PZAN

Fragrance Profile & Characteristics:

Top notes	Crisp bergamot, zesty lemon, and fresh air accords provide an immediate, uplifting burst of cleanliness.
Middle notes	Crushed green leaves, olive branches, and herbal nuances form the botanical heart, capturing the authentic essence of a Mediterranean grove.
Base notes	Clean skin-musks, subtle cedarwood, and warm undertones ground the fragrance, leaving a comforting, long-lasting dry-down on skin and hair.

Technical Specifications:

Product Name	Olive Oil Flavoring Fragrance Oil
Fragrance Profile	Floral-Fruity-Woody aroma
Appearance	Clear, colorless to pale yellow liquid
Relative Density	0.928 to 1.028 g/cm³ @ 25°C
Flash Point	Up to 93.5°C (200°F)
Refractive Index (RI)	1.450 to 1.512(at 20°C)
Phthalate-Free	Yes
Shelf Life	36 Months (Store away from light)
IFRA Compliance	Adheres to IFRA standards
Solubility	Soluble in surfactant-based systems

Recommended Usage Rates

Application	Usage Rate
Shampoo/Body Washes:	1% - 3%
Shower Gel:	1% - 2%
Liquid Soap:	0.3–0.8%;
Bar Soap (CP/MP):	2% - 3%
Facial Cleanser:	0.1–0.5%

Functions and Applications:

Olive oil fragrance oil serves multiple sensory and functional purposes in personal care formulations. Primarily, it imparts a rich, authentic, and comforting aroma that mimics the natural, earthy, and subtly sweet scent of fresh olives. Olfactory appeal is a major driver in consumer choices, and this fragrance creates a soothing, spa-like experience during use, elevating the perceived luxury of everyday hygiene routines.

Beyond sheer aroma, high-quality fragrance oils are engineered to bind effectively with surfactant bases like shower gels and shampoos without causing phase separation or degrading the product matrix. In scented soap production, a robust fragrance withstands the high-pH environment of saponification, ensuring long-lasting scent retention from the first wash to the last sliver. Furthermore, a natural-profile scent often evokes associations with nourishment, skin health, and Mediterranean wellness, which enhances consumer trust. It successfully masks the unflavored base chemical odors of surfactants and oils, leaving a clean, lingering freshness on skin and hair without being overpowering.

Applications:

Shower Gels & Body Washes: It blends smoothly into liquid cleansing bases, providing a rich aromatic lather that gently envelops the skin. The scent lingers lightly post-rinse, offering a subtle, hydrating aura throughout the day.

Shampoos & Conditioners	Formulated to complement hair care products, the fragrance adds a clean, revitalizing note to scalp treatments and daily washes. It leaves hair smelling fresh without weighing down the strands or conflicting with natural styling products.
Cold & Hot Process Soaps	Ideal for artisan and commercial soap makers, it performs exceptionally well in bar soaps. It maintains chemical stability during the curing process, resisting the heat of hot-process or the alkalinity of cold-process manufacturing.
Bath Bombs & Liquid Hand Soaps	It can also be utilized in specialty bath items and sink-side liquid hand soaps to create a cohesive, spa-themed product collection.

Packaging Options

Pack Type	QTY	Specification	Volume
Plastic Bottle	5kgs	L41*W28*H33.5cm (5kg*4 bottle per carton)	0.038cbm
Metal Barrel	25kgs	D30*H45cm	0.032cbm
Jerry Can	20-25kgs	L29.5*D29.5*H41cm	0.33cbm
