## Product Description

### Concentrated Perfume Oil For Daily Use Pink Sugar Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10184

Pink Sugar fragrance oil is an iconic, ultra-sweet gourmand scent celebrated for its playful, nostalgic, and intensely confectionary character. Designed primarily for high-performance perfume making and body care productions, its rich profile captures the decadent aroma of a lively carnival.

The fragrance opens with an energetic, fruity burst of sparkling bergamot, sweet orange, raspberry, and green fig leaves. This vibrant introduction seamlessly transitions into a mouthwatering, sugary heart dominated by spun cotton candy, juicy red berries, delicate lily of the valley, and a touch of licorice, which adds a fascinating depth to the sweetness.

As the scent settles on the skin, the long-lasting base notes emerge with a warm, comforting embrace of rich caramel, creamy vanilla, powdery musk, exotic sandalwood, and a hint of soft tonka bean. This delectable combination creates a powerful, magnetic sillage that is both cozy and unapologetically bold. Because it is a highly concentrated formula, it delivers exceptional tenacity and longevity in alcohol-based perfumes, body sprays, and luxurious lotions, making it an ultimate favorite for formulators looking to create an irresistible, candy-sweet signature product line that captures attention everywhere effortlessly.

LDZ-PL31573

Seasalt

Production Date: April 16, 2026

Production Batch No.: 260416568

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

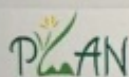

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

**Fragrance Profile:**

| Fragrance Notes         | Description                                                                                                                                                                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top Notes (Opening)     | The opening is a sharp, sparkling burst of aldehydes combined with fresh citrus notes of neroli, ylang-ylang, bergamot, and lemon. This creates an initial bright, effervescent, and slightly soapy impression that commands immediate attention.                          |
| Middle Notes (Heart)    | As the bright opening fades, a rich, luxurious floral bouquet emerges. The heart is dominated by opulent May rose, sheer jasmine, lush iris, lily-of-the-valley, and rosy orris. This complex floral core provides the timeless, powdery elegance the scent is famous for. |
| Base Notes (Foundation) | The dry-down is warm, sensual, and deeply grounding. A sophisticated blend of sandalwood, vetiver, amber, patchouli, and musk melds with sweet touches of vanilla and civet. This heavy base creates a lasting, skin-hugging warmth with an unforgettable powdery trail.   |

| Diffusion Ability      | Excellent aroma                                                                                                                                                                                |
| Long-lasting Fragrance | 8-12 hours (paper strip test)                                                                                                                                                                  |
| Solubility             | Soluble in ethanol and oils; insoluble in water                                                                                                                                                |
| IFRA Compliance        | Conforms to International Fragrance Association safety standards                                                                                                                               |
| Heat Resistance        | Stable at 100°C with no noticeable discoloration or odor change                                                                                                                                |
| Lightfastness          | Good (avoid long-term direct sunlight)                                                                                                                                                         |
| Evaporation Rate       | Slow evaporation ensures smoother fragrance evolution                                                                                                                                          |

## Applications & Functions:

The primary function of Pink Sugar fragrance oil in cosmetic and perfumery manufacturing is to deliver an intensely sweet, long-lasting, and comforting gourmand aroma that captures immediate attention. Engineered for high-performance formulation, its specialized functional role includes providing exceptional tenacity and fixative qualities, ensuring that the sugary, confectionery scent remains stable and projects strongly over extended periods. Because of its high concentration, it acts as a powerful odor-masking agent, efficiently neutralizing any chemical notes present in raw bases such as alcohol, surfactants, or lotion emulsions. Furthermore, it functions as a potent emotional trigger, evoking deep feelings of playfulness, nostalgia, and youthful joy. By blending rich notes of caramel, vanilla, and cotton candy, it transforms ordinary formulations into irresistible sensory experiences, boosting product appeal and establishing strong brand recognition through a distinctive, signature sweetness that resonates powerfully with consumers who adore decadent, confectionery fragrances in their daily self-care regimens worldwide, securing long-term customer loyalty and enthusiastic repeat purchases across various competitive retail markets without losing its rich aromatic integrity under challenging chemical environments or extended shelf-life storage conditions, maintaining absolute perfection always for everyone.

Pink Sugar fragrance oil is exceptionally versatile and widely utilized across a diverse range of personal care, beauty, and perfumery manufacturing productions to create captivating consumer products. In fine perfume making, it serves as the core base for creating high-end alcohol-based spray fragrances, concentrated roll-on oils, and refreshing body mists that offer incredible longevity. Beyond perfumery, it is heavily integrated into luxury bath and body care lines, including rich moisturizing body lotions, nourishing hand creams, and decadent

exfoliating sugar scrubs that leave skin delicately scented. It is also a popular choice for formulating daily shower gels, foaming hand washes, and bubbling bath bombs, turning an ordinary cleansing routine into a sweet, indulgent spa-like escape. Additionally, home fragrance artisans and candle makers incorporate this versatile oil into scented candles and room sprays, successfully extending its playful, confectionery warmth into living spaces and creating a cohesive, comforting lifestyle brand identity that appeals broadly to modern lifestyle buyers everywhere, driving exceptional market success and widespread commercial popularity across global retail sectors for multiple product categories during every single season reliably.

## Industrial Applications

Primary applications include:

**Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils

**Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

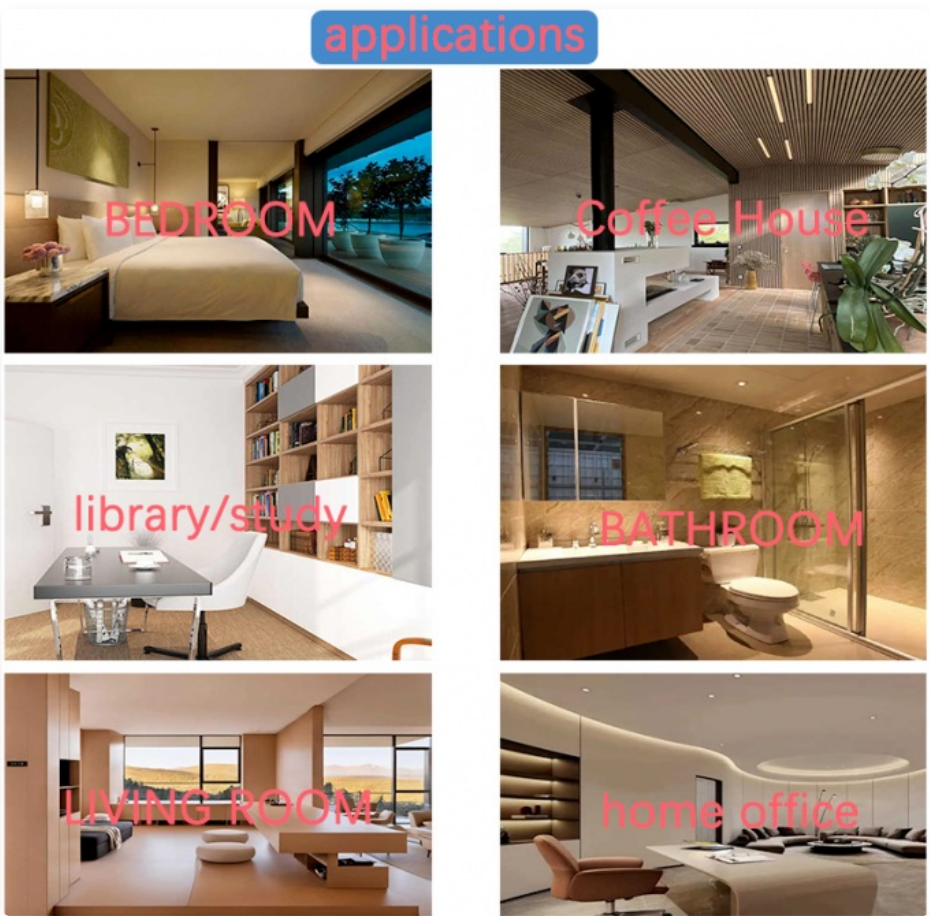

**Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production

**Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques

**Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

## Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

## applications

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, HACCP, IFRA, SPEC

## Support & Services

- OEM support for custom scents and classical flavors
- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

## Packaging & Shipping

| Pack Type      | Quantity  | Specification                             | Volume    |
|----------------|-----------|-------------------------------------------|-----------|
| Plastic Bottle | 5 kgs     | L41*W28*H33.5cm (5kg*4 bottle per carton) | 0.038 cbm |
| Metal Barrel   | 25 kgs    | D30*H45cm                                 | 0.032 cbm |
| Jerry Can      | 20-25 kgs | L29.5*D29.5*H41cm                         | 0.33 cbm  |

**Production Time:** 3-5 days for trial orders, 5-10 days for bulk orders. We provide photo confirmation before shipping and offer multiple shipping options including sea, air, truck, and express delivery.
