Product Description

Body Using Concentrated Perfume Oil Martin (MFK) Perfumes Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10294

Concentrated Perfume Oil Martin (MFK) Perfume Oil For Perfume Making/Production is a refined fragrance essence created for perfume manufacturers seeking a sophisticated, elegant, and highly recognizable olfactory character. Inspired by the modern luxury fragrance style associated with Martin (MFK), this concentrated perfume oil combines luminous freshness, delicate floral nuances, smooth sweetness, and a warm, polished base to create a scent that feels both contemporary and timeless.

The fragrance opens with a clean and radiant impression, gradually developing into a graceful heart where soft floral and subtly aromatic facets bring depth and elegance. As the fragrance settles, creamy woods, gentle amber nuances, and a smooth musky finish create a long-lasting and comforting dry-down. The carefully balanced composition allows the scent to evolve naturally from the first application to the final lingering impression.

Designed for professional perfume making and production, this concentrated oil can serve as a versatile fragrance base for eau de parfum, perfume oils, body fragrances, and customized personal-care scent products. Its concentrated character offers formulation flexibility, allowing manufacturers to adjust the dosage according to product positioning and desired intensity. It is particularly suitable for private-label perfume collections, signature scent development, and customized fragrance projects that require a polished and premium aromatic identity.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a bright, airy impression featuring fresh citrus facets, delicate aromatic nuances, and a clean, radiant accord. The opening creates an immediate sense of refinement without becoming overly sharp or intense.
Middle Notes (Heart)	As the fragrance develops, the heart reveals a smooth floral character blended with soft powdery and slightly sweet nuances. These middle notes add elegance and body, creating a sophisticated transition between the fresh opening and the warmer dry-down.
Base Notes (Foundation)	The dry-down becomes creamy, warm, and subtly sensual, with soft woods, amber-like accords, musk, and gentle vanilla nuances. This balanced base provides depth and persistence while leaving a polished, comfortable trail on the skin. Overall, the composition combines freshness, floral softness, and warm woody richness, making it suitable for modern premium perfume concepts.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Martin (MFK) Perfumes Oil
Appearance	Transparent to amber liquid
Relative Density	0.950–1.050g/cm ³ @ 25°C
Refractive Index	1.450–1.500
Flash Point	>70°C
Dosage	Home Fragrance: 6%–10% Fine Perfume: 15–30%; Body Mist: 1%–5%; Soap/wash-off: 1.5–4% Body Oils/Lotions: 0.3–1%; Eau de Parfum (EDP): 15–30%; Shower Gel & Shampoo: 0.2–1.0%;

Long-lasting Fragrance	8–12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Concentrated Perfume Oil Martin (MFK) functions as a high-impact fragrance ingredient for developing elegant and memorable personal fragrance products. Its principal function is to provide a distinctive aromatic identity while supporting a smooth transition between opening, heart, and dry-down stages. The balanced combination of fresh, floral, woody, musky, and subtly sweet facets can help formulators create perfumes with a sophisticated and layered olfactory profile. Its concentrated format also allows manufacturers to fine-tune fragrance intensity according to different product concepts and target markets. When incorporated into an appropriate perfume base, it can contribute to a persistent scent experience and a polished overall character. The oil is also suitable for customized fragrance development, allowing brands to modify the final formulation through dosage adjustments or complementary fragrance ingredients. For manufacturers, it offers a practical fragrance foundation for developing signature scents, private-label collections, seasonal launches, and premium-inspired perfume products while maintaining consistency across production batches.

This concentrated perfume oil is suitable for a broad range of perfume-making and personal fragrance applications. It can be formulated into eau de parfum, eau de toilette, concentrated perfume, perfume oil, roll-on fragrance, body mist, and other alcohol- or oil-based fragrance products, subject to formulation compatibility and applicable safety requirements. For perfume manufacturers, it can be used as a core fragrance component or combined with other accords to create customized scent profiles for different collections. Its sophisticated character makes it appropriate for women's fragrances, men's fragrances, and unisex perfume concepts depending on the final composition. It can also support private-label and OEM/ODM fragrance projects where brands require a recognizable yet adaptable

aromatic direction. During product development, formulators can adjust the concentration to achieve different levels of projection and intensity. This versatility makes the fragrance oil useful for both small-batch sampling and larger-scale commercial perfume production.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

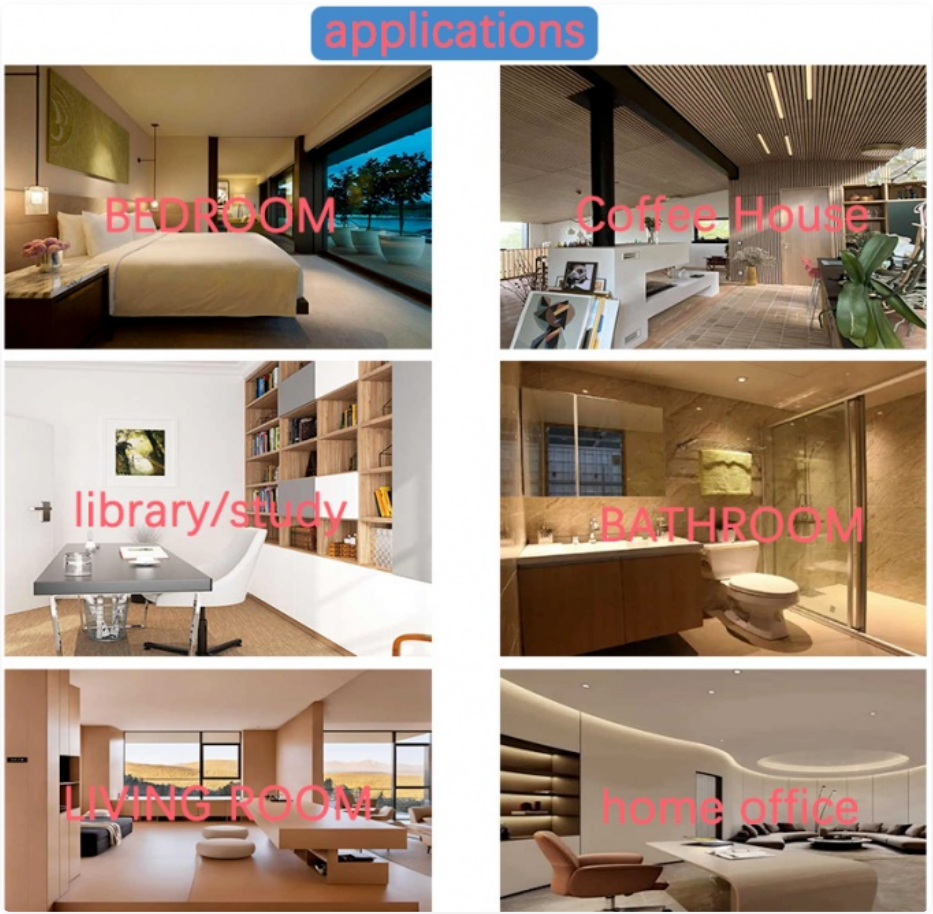

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, HACCP, IFRA, SPEC
