Product Description

Concentrated Perfume Oil Body Using Dalal Fragrance Essence Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10100

It is a sophisticated fragrance essence developed for manufacturers seeking a distinctive, elegant, and long-lasting aromatic profile for personal fragrance products. Its carefully balanced composition combines luminous floral nuances with soft fruity touches and a warm, sensual foundation, creating a refined scent that develops naturally from the first application through the dry-down. The fragrance opens with a bright and inviting impression, offering a delicate combination of fresh, sweet, and subtly fruity facets. As it evolves, the heart reveals a graceful floral character with a smooth, feminine elegance, adding richness without becoming overpowering. The base gradually introduces creamy woods, soft musk, and warm amber-like nuances, leaving a comfortable and lingering aromatic trail on the skin.

Designed as a concentrated perfume oil, Dalal Fragrance Essence Oil provides formulators with flexibility when developing different perfume concepts and fragrance strengths. It can be incorporated into perfume oils, eau de parfum, body fragrances, roll-on perfumes, and other personal scent products, subject to formulation compatibility and applicable safety requirements.

Its versatile character makes it suitable for private-label perfume collections, customized fragrance development, and OEM/ODM production. For brands seeking a polished signature scent with a balance of freshness, floral softness, and warm depth, Dalal offers a versatile foundation for modern perfume formulations.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance begins with a bright, sweet, and inviting opening, combining delicate fruity nuances with a soft fresh character. The initial impression is lively yet smooth, creating an appealing introduction without excessive sharpness.
Middle Notes (Heart)	As the top notes settle, the composition develops into a graceful floral heart. Soft floral accords blend with subtle powdery and creamy facets, giving the fragrance a refined, feminine character. The heart maintains a pleasant balance between sweetness and elegance, making the transition toward the deeper notes seamless.
Base Notes (Foundation)	The dry-down reveals a warm and comforting foundation of smooth woods, soft musk, gentle amber, and subtle vanilla-like sweetness. These deeper accords provide body and persistence while leaving a polished, sensual trail on the skin. Overall, Dalal presents a harmonious combination of fruity brightness, floral softness, creamy warmth, and musky depth, making it adaptable to different perfume formulations and target markets.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Dalal Fragrance Essence Oil
Appearance	Transparent to amber liquid
Relative Density	0.900–1.050g/cm ³ @ 25°C
Refractive Index	1.440–1.500
Flash Point	>60°C
Dosage	Body Mist: 1%–5%; Home Fragrance: 6%–10%; Body Oils/Lotions: 0.3–1%; Shower Gel & Shampoo: 0.2–1.0%; Eau de Parfum (EDP): 15–30%; Soap/wash-off: 1.5–4%; Fine Perfume: 15–30%;

Long-lasting Fragrance	8–12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Dalal Concentrated Body Perfume Oil is designed to provide a distinctive and refined fragrance identity for personal fragrance formulations. Its main function is to deliver a well-rounded aromatic experience that develops gradually from a bright opening to a soft floral heart and a warm, lingering base. The concentrated format enables perfume manufacturers to adjust fragrance intensity according to the positioning and style of the finished product. It can also serve as a flexible fragrance foundation for developing customized perfume accords, allowing formulators to combine it with fruity, floral, woody, musky, or amber ingredients. In addition, its balanced composition can help create a smooth transition between different olfactory stages, contributing to a more complete and sophisticated scent profile. For brands, Dalal can be used to establish a recognizable signature aroma across a fragrance collection. It is particularly valuable for private-label and OEM/ODM projects where consistent fragrance performance, formulation flexibility, and differentiated scent character are important considerations during product development and commercial production.

Dalal Fragrance Essence Oil can be incorporated into a variety of personal fragrance products, making it a versatile option for perfume manufacturers and private-label brands. Its concentrated character is suitable for body perfume oils, eau de parfum, eau de toilette, roll-on perfumes, concentrated perfume, body mists, and selected scented personal-care products, subject to appropriate formulation testing. It can be used as the principal fragrance component or blended with complementary accords to create customized scent profiles for different consumer groups. The fragrance is suitable for feminine, unisex, or customized perfume concepts depending on the final formulation and dosage. Manufacturers can also use it for seasonal fragrance launches, boutique perfume collections, promotional products, and OEM/ODM development. Its adaptable profile allows brands to explore different fragrance directions while maintaining a recognizable aromatic foundation. Before commercial production, formulators should evaluate compatibility, stability, dosage, and applicable safety requirements to ensure the finished product performs appropriately in its intended application.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

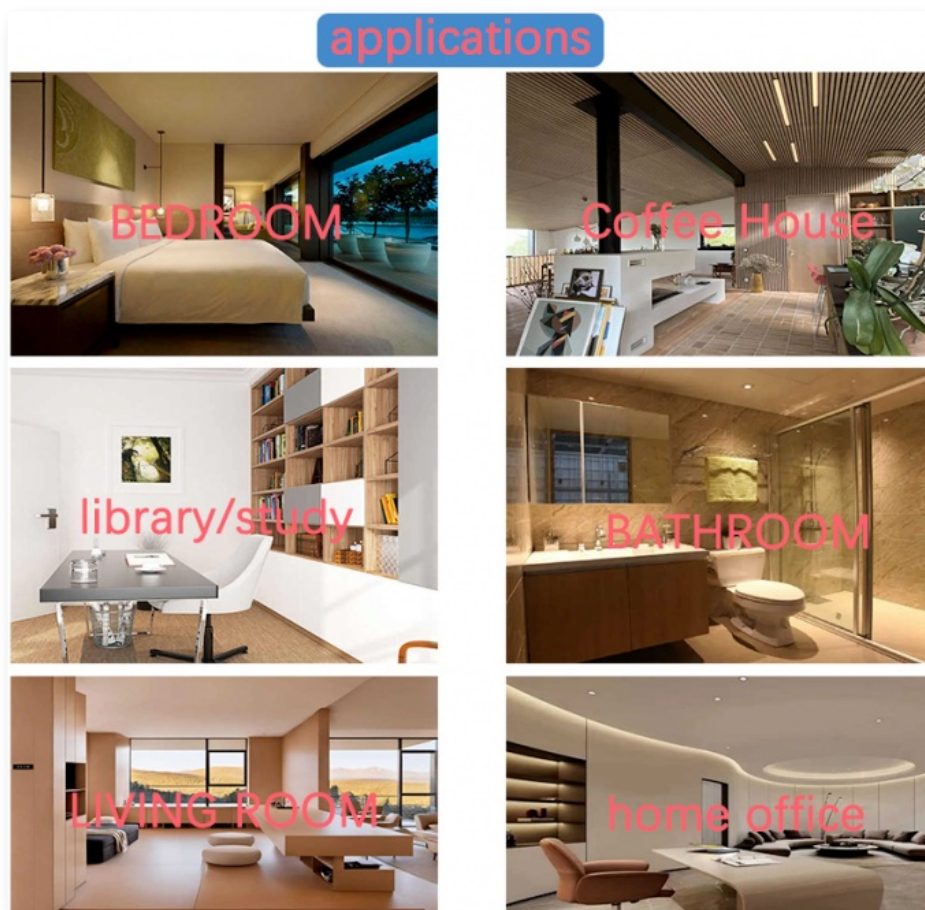

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, HACCP, IFRA, SPEC
