Product Description

Perfume Oil For Daily Use Mar Eterna Ramón Béjar Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10131

Mar Eterna by Ramón Béjar is a sophisticated woody-aquatic fragrance oil designed for versatile daily wear and professional perfume production. Inspired by the boundless majesty of the open sea, it opens with an invigorating rush of crisp ozonic accords, fresh evergreen, yuzu, and zesty lime that mimic an energetic coastal breeze. This vibrant beginning gently unfolds into a clean, refined heart featuring delicate rose, lily of the valley, and exotic orchid. Finally, the composition settles into a deeply grounding, long-lasting dry-down of rich sandalwood, cedarwood, earthy moss, and sensual musk. Balancing revitalizing marine freshness with warm, sophisticated depth, this high-quality oil is exceptionally well-suited for crafting luxurious personal scents, boutique artisanal perfumes, or daily signature aromas that exude effortless elegance and timeless coastal charm.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The Kilian Angels' Share type fragrance oil opens with an unmistakable, opulent burst of rich, authentic top notes featuring natural, boozy that immediately mimics the warmth of fine aged spirits.
Middle Notes (Heart)	As this spirited opening begins to settle, it transitions gracefully into a complex heart. The middle notes introduce a spicy-sweet harmony combining aromatic cinnamon, earthy oak wood, warm tonka bean, and a touch of light hedione florals. This core builds an intoxicating, comforting atmosphere reminiscent of traditional liquor barrels.
Base Notes (Foundation)	The base notes envelop the senses with creamy vanilla, rich praline, smooth sandalwood, and sweet candied almond. This luscious foundation lingers seamlessly on the skin, delivering an intensely cozy, gourmand profile that balances sophisticated woodiness with deep, confectionery sweetness for an unforgettable impression.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Mar Eterna Ramón Béjar Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.940–0.985 g/cm³ @ 25°C
Refractive Index	1.450–1.490
Flash Point	70°C -95°C(approx. 158°F – 203°F)
Dosage	Home Fragrance: 6%–10% Eau de Toilette (EDT): 8% – 12% Shower Gel & Shampoo: 0.2–1.0%; Eau de Parfum (EDP): 15–20%; Body Oils/Lotions: 0.3–1%; Soap/wash-off: 1.5-4% Fine Perfume: 20–30%; Oil-Based Roll-ons / Carrier Oils: 15% – 25%

Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)

Evaporation Rate	Slow evaporation ensures smoother fragrance evolution
------------------	---

Applications & Functions:

The primary function of Mar Eterna by Ramón Béjar is to serve as an intricate, high-grade aromatic active component that delivers an immersive woody-aquatic sensory profile. Functionally, it acts as an evocative medium designed to replicate the crisp, invigorating essence of an ocean breeze interwoven with coastal vegetation. Chemically and compositionally, its function within a formulation is multi-tiered: the ozonic and coniferous top notes provide an immediate, bright, and refreshing opening impact; the middle floral bouquet of lily of the valley, rose, and orchid functions as a smooth bridging element that introduces elegance and clean depth; and the robust base of cedarwood, oakmoss, sandalwood, and musk functions as a powerful fixative. This fixative property anchors the volatile top notes, ensuring prolonged longevity and steady evaporation on the skin. Furthermore, it functions as a versatile gender-neutral profile that balances revitalization with calming, serene qualities, making it capable of transforming simple cosmetic bases into luxury signature scents.

Mar Eterna is extensively applied across various sectors of fine fragrance creation and luxury body care production. Its core application lies in niche perfume manufacturing, where it is compounded into high-end Extrait de Parfum or Eau de Parfum formats by diluting the oil into cosmetic-grade alcohol solvents. Because of its skin-safe formulation profiles when properly diluted, it is also utilized in alcohol-free roll-on perfumes and body oils, utilizing carriers like fractionated coconut or jojoba oil for intimate daily wear. Beyond personal wearable fragrances, artisan and commercial producers apply this oil to luxury cosmetic and grooming lines, including scented body lotions, refreshing shower gels, and premium hair perfumes that benefit from a clean, marine profile. Additionally, it is frequently employed in

ambient home-fragrancing products, such as high-end reed diffusers, luxury soy candles, and boutique room sprays, where its expansive ozonic and woody characteristics successfully evoke a serene, coastal atmosphere indoors.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

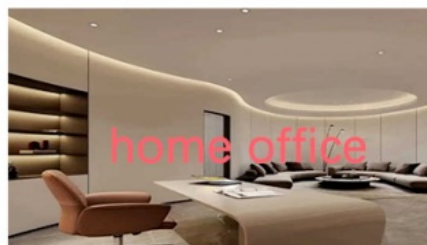

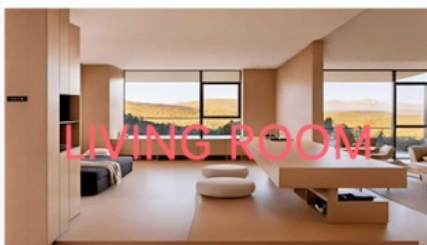

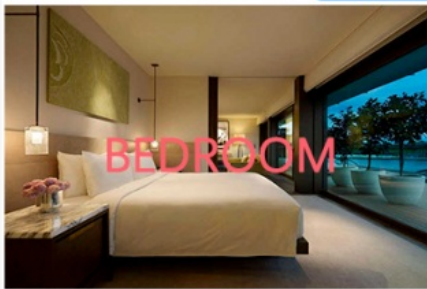

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
