## Product Description

### Free Sample Hotel & Home Diffuser Aroma Bamboo Fragrance Scent Flavoring Essence Oil For Reed Stick & Cold Scented Candle & Diffuser Fragrance Making/Production

Product Code: LDZ-PL30195

Premium fragrance essence for diffusers, reed sticks, scented candles, and home spray productions

#### Product Overview:

Aroma Bamboo Fragrance Essence Oil is a refreshing and nature-inspired fragrance developed for manufacturers seeking to bring a sense of tranquility and understated elegance to ambient scent products. Inspired by the clean character of bamboo groves, this fragrance combines green botanical freshness with delicate woody nuances to create a balanced, contemporary scent profile. Its distinctive character evokes the feeling of walking through a peaceful bamboo garden after a gentle rain. The fragrance opens with crisp green notes and a subtle watery freshness, delivering a light, airy impression that helps create an inviting atmosphere. As the scent develops, soft herbal nuances blend with natural woody accords, adding depth without overwhelming the surrounding space. A smooth musky undertone rounds out the composition, providing a clean and comforting finish.

Designed for professional fragrance manufacturing, Aroma Bamboo Essence Oil is suitable for reed stick diffusers, cold-process scented candles, aroma diffusers, and other compatible home fragrance products. Its fresh, understated character makes it particularly suitable for bedrooms, living rooms, spas, offices, boutique stores, and hospitality environments. The fragrance can also serve as a foundation for customized scent development, pairing well with green tea, citrus, white musk, or sandalwood accords. For brands seeking a versatile botanical-inspired aroma, this essence offers an appealing option for modern home fragrance collections and private-label projects.

PLAN

LDZ-PL30967

Coconut & Vanilla Fragrance

Production Date: April 25,2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

**Fragrance Profile & Characteristics:**

| Fragrance Notes | Description                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top Notes       | The opening introduces crisp green accords accompanied by watery freshness and subtle citrus-like nuances. These notes create a light, airy impression reminiscent of fresh bamboo leaves and morning dew, bringing an immediate sense of clarity to the surrounding space.                                                                                                                                                                       |
| Middle Notes    | As the fragrance develops, delicate herbal and leafy accords emerge, supported by gentle floral undertones. The heart captures the natural elegance of bamboo vegetation, combining botanical freshness with a smooth, slightly earthy character. This stage adds depth while maintaining the fragrance's transparent and uncluttered personality.                                                                                                |
| Base Notes      | The dry-down reveals soft woods, clean musk, and subtle earthy nuances. These elements provide a smooth foundation that balances the greener opening and creates a calm, natural finish. Rather than relying on heavy sweetness, the fragrance emphasizes freshness, simplicity, and understated warmth. The overall composition is ideal for contemporary ambient fragrance concepts inspired by nature, minimalism, and tranquil indoor spaces. |

Functions & Applications:

Aroma Bamboo Fragrance Essence Oil is designed to bring a refreshing botanical character to ambient fragrance products, offering an alternative to conventional sweet, fruity, or intensely floral scents. Its combination of crisp green notes, subtle herbal nuances, and smooth woody undertones helps create an atmosphere associated with cleanliness, balance, and natural simplicity. In reed diffuser formulations, the fragrance can contribute to a continuous aromatic experience, gradually introducing

a fresh, leafy impression into indoor spaces. When incorporated into compatible cold-process scented candles, it adds a nature-inspired dimension that complements quiet evenings, relaxation routines, and minimalist interior settings. Another important function is its versatility in fragrance development. Manufacturers can use the bamboo accord independently or combine it with green tea, citrus, white musk, or sandalwood notes to develop distinctive scent combinations. This flexibility makes the essence useful for brands seeking a recognizable botanical fragrance identity across different product collections. With appropriate formulation testing, it can support consistent scent development for contemporary home fragrance ranges, wellness-inspired products, and hospitality environments where a clean, understated aromatic profile is preferred.

### Primary Applications:

Aroma Bamboo Fragrance Essence Oil is suitable for developing a variety of ambient fragrance products, particularly reed stick diffusers, cold-process scented candles, and compatible home fragrance formulations. Its green and woody character works well in living rooms, bedrooms, bathrooms, offices, reception areas, spas, and boutique hotels where a fresh, natural atmosphere is desired. For reed diffuser production, the fragrance can be blended with a suitable diffuser base, with the concentration adjusted according to scent intensity, evaporation performance, and reed compatibility. In cold-process candle manufacturing, it can be evaluated in compatible wax systems to determine fragrance retention, product stability, and overall scent performance. The essence may also serve as a foundation for customized botanical collections, including bamboo and green tea, bamboo and citrus, or bamboo and soft musk concepts. These combinations allow manufacturers to differentiate their offerings for various customer preferences and market segments. It is also suitable for private-label, OEM, and ODM fragrance projects. Before commercial use, manufacturers should verify application-specific dosage, material compatibility, and relevant safety requirements for the finished product.

### Our Advantages:

## 100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, ISO22000, HACCP, IFRA, SPEC

### Support and Services

Our R&D team includes PhDs and senior engineers, with established laboratories in partnership with universities. We integrate global technology to maintain product advantage through continuous innovation.

### Comprehensive Support Services

- Product usage instructions and guidance
- Expert advice on fragrance selection
- Technical support for any issues or concerns
- Product customization services
- Assistance with regulatory compliance
- Training and education on fragrance formulation

## Packaging and Shipping

### Product Packaging Options
