Product Description

Concentrated Perfume Oil For Daily Use Pink Sugar Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10182

Miss Di-or Blooming Bouquet Fragrance Oil is a refined floral fragrance essence designed for perfume manufacturers seeking a fresh, romantic, and delicately sophisticated scent profile. Inspired by the graceful character of a blooming garden, this composition combines sparkling fruity freshness with an elegant floral heart and a soft, musky foundation. Its light, feminine character makes it an appealing choice for contemporary perfume collections that emphasize freshness, charm, and understated luxury.

The fragrance opens with bright, juicy fruity nuances that create a lively and uplifting first impression. As it develops, a graceful bouquet of fresh flowers introduces a soft, airy elegance, giving the composition its recognizable romantic personality. The dry-down reveals gentle musk and subtle woody undertones, providing a smooth finish without overwhelming the delicate floral character.

Designed for professional perfume production, this concentrated fragrance oil can be evaluated for use in eau de parfum, eau de toilette, perfume oils, and customized personal fragrance formulations. Its balanced profile offers flexibility for private-label collections, boutique perfume brands, and OEM/ODM development projects.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with sparkling fruity freshness, featuring juicy mandarin-like nuances and a delicate hint of bergamot. These bright accents create a cheerful, airy introduction that feels refreshing rather than overly sweet, setting the stage for an elegant floral composition.
Middle Notes (Heart)	At the heart, a graceful bouquet of peony and rose brings a soft, romantic character. Peony contributes a light, dewy floral impression, while rose adds gentle sweetness and classic sophistication. Subtle fresh-green nuances enhance the natural impression of freshly opened blossoms, giving the heart a delicate yet expressive personality. This floral combination makes the fragrance especially appealing for modern, feminine perfume concepts.
Base Notes (Foundation)	As the fragrance settles, white musk introduces a clean, velvety softness, supported by subtle powdery and woody nuances. The base provides a smooth finish that complements the airy floral heart without making the composition feel heavy. Overall, the fragrance balances fruity brightness, blooming florals, and understated musk, creating a polished and graceful scent profile suitable for refined everyday perfumes and premium fragrance collections.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Miss Di-or Blooming Bouquet Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.900–0.980 g/cm³ @ 25°C
Refractive Index	1.450–1.500

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Miss Di-or Blooming Bouquet Fragrance Oil is designed to provide perfume formulations with a fresh, graceful, and delicately floral identity. Its combination of fruity brightness, soft peony and rose accords, and clean musky undertones creates a balanced aromatic profile suitable for modern fragrance development. One of its key functions is to establish a recognizable scent character that feels romantic and sophisticated without excessive sweetness or heaviness. The concentrated essence allows perfumers to adjust fragrance intensity according to the desired product style and target market. It can also serve as a foundation for customized perfume creation, pairing well with complementary floral, fruity, powdery, or musky ingredients. For fragrance manufacturers, this versatility supports the development of coordinated collections with consistent olfactory characteristics. The essence is particularly suitable for brands seeking an elegant everyday fragrance concept that combines freshness with floral refinement. Before commercial production, formulators should evaluate stability, compatibility, and applicable IFRA usage limits to ensure the fragrance is appropriate for its intended application.

Miss Di-or Blooming Bouquet Fragrance Oil is suitable for developing a variety of personal fragrance products, including eau de parfum, eau de toilette, concentrated perfume, alcohol-based body fragrance, and oil-based perfume, subject to formulation compatibility and safety assessment. Its airy floral character makes it particularly appropriate for daytime fragrances, spring-inspired collections, romantic perfume concepts, and elegant everyday scent products. Manufacturers can use the essence as the primary fragrance component or combine it with complementary accords to create customized variations for different customer preferences. For private-label brands, it offers a useful starting point for developing coordinated perfume collections with a fresh and feminine-inspired identity. It can also be

evaluated for selected scented personal-care products when the fragrance is suitable for the intended product category. During development, formulators should test solubility, clarity, color stability, and scent evolution in the chosen carrier. The final dosage must comply with applicable IFRA standards and product safety requirements.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

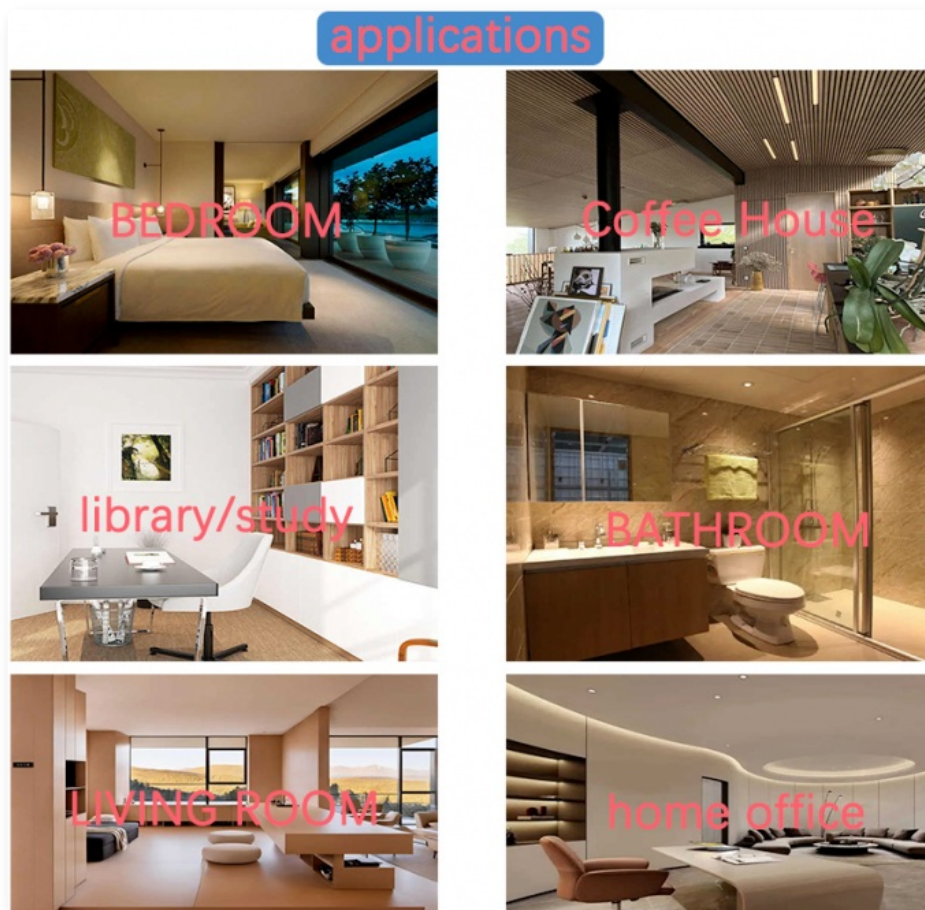

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.

applications

100% STRENGTH BRAND

Our products are strictly approved by a list of certifications, such as ISO22000, COA, MSDS, SGS, ISO9001, HACCP, IFRA, SPEC
