Product Description

High Concentrated Perfume Oil Body Using Sparkling Lychee Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL11971

The Sparkling Lychee Fragrance Oil For Perfume Making/Production is a vibrant and modern fragrance essence developed for manufacturers seeking a distinctive fruity scent with a refreshing, sophisticated character. Inspired by the juicy sweetness of ripe lychee, this fragrance combines sparkling fruit accords with delicate floral nuances and a smooth, sensual foundation. The opening delivers a lively burst of succulent lychee, accompanied by subtle citrus-like brightness that creates an immediate feeling of freshness. As the fragrance develops, soft floral touches and gentle fruity sweetness add dimension, preventing the composition from becoming overly sugary. A delicate musky base, complemented by creamy woody undertones, rounds out the scent with a clean and elegant finish. This balanced combination makes Sparkling Lychee Fragrance Oil an appealing choice for contemporary perfume concepts that emphasize youthful energy, playful sophistication, and fruity elegance. Designed for professional perfume making, the concentrated essence can be evaluated for use in eau de parfum, eau de toilette, perfume oils, and customized body fragrance formulations. Its versatile aromatic profile also provides opportunities for blending with rose, white musk, vanilla, or fresh citrus accords. Suitable for private-label collections and OEM/ODM projects, this fragrance offers manufacturers a lively foundation for developing memorable fruity perfume products.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a sparkling burst of juicy lychee, delivering a succulent, slightly sweet, and refreshing fruity impression. Delicate citrus-like accents add brightness, creating a lively introduction that feels playful and contemporary. This vibrant opening immediately establishes the fragrance's fruity identity without becoming excessively sugary.
Middle Notes (Heart)	As the initial freshness softens, a delicate floral heart emerges, blending soft rose-like nuances with fresh, sweet fruit accords. The floral character adds elegance and smoothness, balancing the juicy richness of lychee. Subtle watery facets enhance the airy quality, giving the heart a transparent, luminous character that works beautifully in modern fruity perfume compositions.
Base Notes (Foundation)	The dry-down reveals clean white musk, gentle creamy woods, and a soft, sweet undertone. These accords provide warmth and depth while maintaining the fragrance's fresh, fruity personality. Rather than creating a heavy finish, the base leaves a smooth and elegant impression that complements the sparkling opening. Overall, Sparkling Lychee combines juicy fruitiness, delicate floral softness, and understated musky warmth, making it suitable for youthful, sophisticated, and contemporary perfume creations.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Sparkling Lychee Fragrance Oi
Appearance	Transparent to amber liquid
Relative Density	0.950–1.050g/cm³ @ 25°C
Refractive Index	1.450–1.500
Flash Point	>70°C
Dosage	Home Fragrance: 6%–10% Body Mist: 1%–5%; Body Oils/Lotions: 0.3–1%; Eau de Parfum (EDP): 15–30%; Shower Gel & Shampoo: 0.2–1.0%; Soap/wash-off: 1.5–4% Fine Perfume: 15–30%;

Long-lasting Fragrance	8–12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Sparkling Lychee Fragrance Oil is designed to bring a lively, fruit-inspired character to modern perfume formulations. Its juicy sweetness, refreshing brightness, and delicate floral nuances create a distinctive scent profile that feels energetic without becoming excessively sugary. One of its main functions is to establish an appealing fruity identity that can help perfume brands differentiate their products from conventional floral or woody fragrances. The concentrated essence allows formulators to adjust the fragrance intensity according to the desired product style, subject to applicable safety limits. Its balanced composition also provides flexibility for fragrance blending, pairing naturally with rose, citrus, white musk, vanilla, or creamy woods to create more complex olfactory experiences. In addition, the fragrance can support the development of coordinated perfume collections featuring youthful freshness and contemporary elegance. For manufacturers, it offers a versatile starting point for signature scent creation, seasonal launches, and customized fragrance projects. Proper formulation testing helps establish stability, compatibility, and suitable usage levels, supporting consistent product quality throughout commercial production.

Sparkling Lychee Fragrance Oil is suitable for developing a range of personal fragrance products, including eau de parfum, eau de toilette, concentrated perfume, roll-on perfume oils, and alcohol-based body fragrances, provided the finished formulation meets applicable safety requirements. Its juicy, sparkling character makes it particularly suitable for fruity perfume collections, spring and summer launches, youthful fragrance concepts, and modern everyday scents. Manufacturers can use it as the principal fragrance component or blend it with complementary floral, citrus, musky, or sweet accords to develop customized scent variations. For private-label brands, the essence offers

an opportunity to create distinctive fruity fragrances with a fresh and polished personality. It may also be evaluated for selected scented personal-care products when the fragrance is suitable for the intended application. During product development, formulators should assess solubility, color stability, scent evolution, and compatibility with the chosen carrier. The final concentration must follow the applicable IFRA requirements and product-specific safety assessment. These checks help manufacturers develop consistent, market-ready fragrance products for different customer preferences and commercial positioning.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

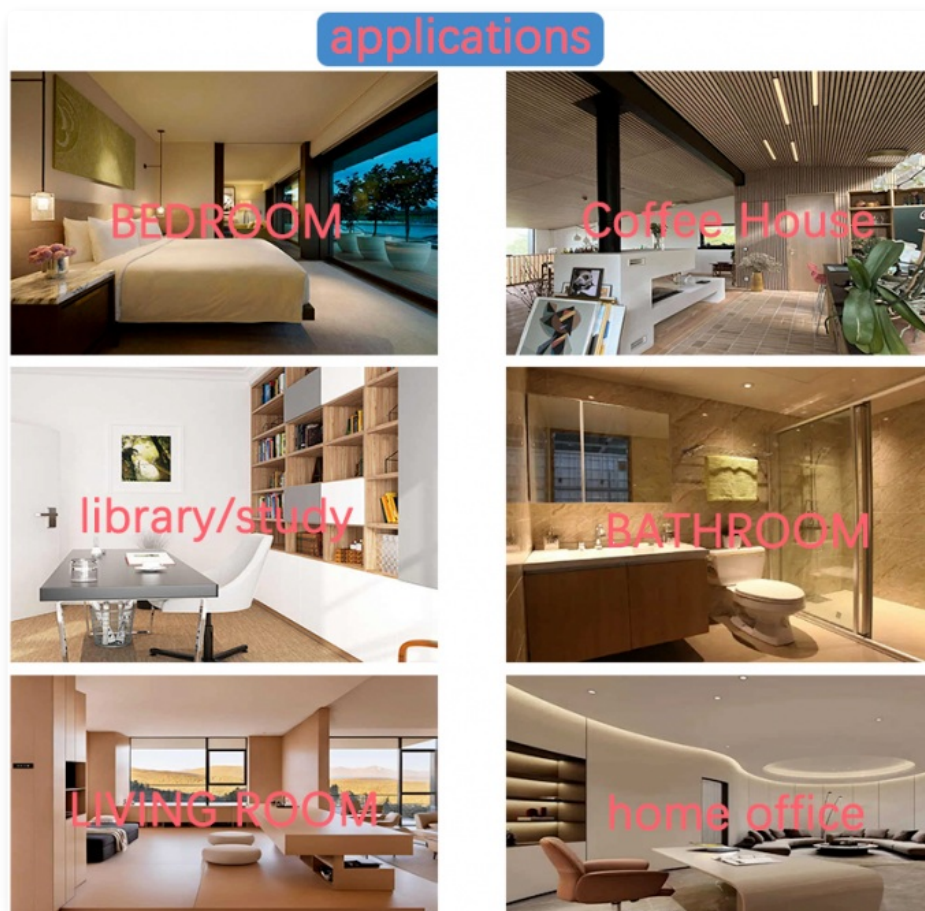

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal
