- Minimum Order Quantity: 1KGS/To Be Negotiated
- Price: 1-49 Kilograms \$20.00, To Be Negotiated
- Packaging Details: Carton Drum Packing :5kgs/drum,4 Drum/carton,20kgs/carton(41*28*33.5cm);Iron Drum Packing: 25 Kg/drum (D: 30cm, H: 45cm)(0.032cbm)
- Delivery Time: 3-5 Working Days For Trial Order; 5-10 Working Days For OEM Order
- Payment Terms: L/C,T/T,Western Union
- Supply Ability: 2000 Kilogram/Kilograms Per Day

Product Specification

- Highlight: Concentrated Perfume Oil Incanto Shine, IFRA Certified Fragrance Oil, Perfume Making Fragrance Oil

Product Description

Concentrated Perfume Oil Body Using Incanto Shine Fragrance Oil For Perfume Making / Production With IFRA Certification

Product Code: LDZ-PL11967

Concentrated Perfume Oil Body Using Incanto Shine Fragrance Oil For Perfume Making/Production is a vibrant and cheerful fragrance essence designed for manufacturers seeking a youthful, fruity-floral scent with a radiant and refreshing personality. Inspired by the sparkling charm of a sunlit garden, this fragrance blends juicy tropical fruit nuances with delicate floral accords and a soft, comforting base. The opening presents a lively combination of pineapple-like sweetness, fresh fruity brightness, and subtle citrus accents, creating an energetic first impression. As the fragrance develops, graceful floral notes emerge, adding a feminine softness that balances the playful fruitiness. Gentle freesia-like and jasmine-inspired nuances can bring additional elegance and a smooth transition toward the dry-down. The base introduces clean musk and delicate woody sweetness, creating a rounded finish that complements the fragrance's bright character without making it feel heavy. Suitable for professional perfume manufacturing, Incanto Shine Fragrance Oil can be evaluated for eau de parfum, eau de toilette, perfume oils, and customized body fragrance formulations. Its cheerful fruity-floral profile offers flexibility for blending with citrus, white musk, soft woods, or sweet floral accords. For private-label brands and OEM/ODM manufacturers, this essence provides an appealing foundation for developing lively, approachable perfume collections designed around freshness, optimism, and everyday elegance.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	It opens with a lively burst of juicy pineapple, fresh passion fruit, and bright citrus accords. These sparkling fruity nuances create a cheerful, sun-kissed impression that feels refreshing, playful, and full of energy. The initial sweetness is balanced by a light tangy character, giving the fragrance an inviting introduction without becoming overly heavy.
Middle Notes (Heart)	As the fragrance develops, delicate floral accords emerge to soften the tropical fruitiness. Freesia-inspired notes contribute a fresh, airy quality, while jasmine-like nuances add gentle floral richness and a feminine touch. Subtle peach and other soft fruity impressions can enhance the smooth transition between the bright opening and the warmer dry-down. This heart creates a harmonious balance between juicy sweetness and graceful floral elegance.
Base Notes (Foundation)	The dry-down settles into a soft combination of clean musk, delicate woods, and gentle sweet accords. These elements provide a smooth, comforting foundation that rounds out the brighter top and middle notes. The overall character remains light, youthful, and approachable, making it suitable for everyday fragrance concepts. For perfume manufacturers, this fruity-floral profile offers a versatile starting point for developing body perfumes, concentrated perfume oils, and customized fragrance blends.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Incanto Shine Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.900–1.050g/cm³ @ 25°C
Refractive Index	1.440–1.500
Flash Point	>60°C
Dosage	Body Mist: 1%–5%; Soap/wash-off: 1.5-4% Home Fragrance: 6%–10% Body Oils/Lotions: 0.3–1%; Shower Gel & Shampoo: 0.2–1.0%; Eau de Parfum (EDP): 15–30%; Fine Perfume: 15–30%;

Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Incanto Shine Fragrance Oil is designed to give perfume formulations a bright, youthful, and cheerful fruity-floral identity. Its lively tropical fruit character, delicate floral heart, and soft musky base can help create a balanced scent that feels refreshing without losing its sweet, feminine appeal. For perfume manufacturers, this fragrance oil offers a versatile aromatic foundation for developing products aimed at consumers who enjoy energetic, approachable, and easy-to-wear fragrances. The interplay between juicy fruit accords and gentle floral nuances can add personality to a formulation, while the smooth base helps round out the overall scent experience. It can also serve as a blending component when developing customized fragrances, particularly when combined with citrus, white musk, light woods, or complementary floral notes. Depending on the intended product and formulation, the fragrance may contribute to a pleasant sensory experience in daily-use body perfumes and concentrated perfume oils. Its recognizable fruity-floral style can support a cohesive product identity for private-label collections and seasonal launches. The final scent performance, stability, and suitability depend on the complete

formula, fragrance concentration, and compatibility testing. Manufacturers should confirm the recommended usage level and applicable safety documentation before commercial production.

It is primarily intended for evaluation in fine-fragrance formulations, especially products that benefit from a vibrant fruity-floral scent profile. It may be considered for concentrated perfume oils, alcohol-based perfumes, eau de parfum, and eau de toilette, subject to compatibility and formulation testing. Its cheerful character can suit everyday fragrance collections, youthful product concepts, and private-label perfume lines designed around freshness and approachable sweetness. For brands developing a coordinated range, the fragrance may also be explored in selected scented body-care products, such as body mists or fragranced lotions, provided the oil is specifically suitable for the intended application and complies with relevant usage restrictions. Formulators can evaluate it alongside citrus accords, soft florals, musk, or light woody notes to create distinctive variations for different target markets. Before scaling up production, manufacturers should assess solubility, clarity, color stability, odor development, and performance in the finished base. If the fragrance is intended for products applied directly to skin, confirm the supplier's documentation and the applicable IFRA category and maximum permitted concentration. Do not assume that suitability for fine fragrance automatically extends to candles, diffusers, soaps, or other product types; each application requires separate suitability confirmation and testing.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
