Product Description

Concentrated Perfume Oils Happy Vanilla Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL11895

Happy Vanilla Fragrance Oil for Perfume Making/Production is a warm, sweet, and comforting fragrance essence designed for manufacturers seeking a versatile vanilla-centered scent for concentrated perfume oils and fine-fragrance formulations. Its inviting character combines creamy vanilla sweetness with soft gourmand nuances, creating a smooth and pleasant olfactory experience. The opening may feature delicate sugary accords and a subtle creamy impression, introducing the fragrance with an appealing sense of warmth. As it develops, richer vanilla notes emerge, bringing a velvety sweetness that can be complemented by hints of caramel, soft cream, or gentle floral nuances. In the dry-down, warm musk and subtle woody accords can provide additional depth, helping balance the sweetness and create a more rounded fragrance profile. This combination makes Happy Vanilla suitable for both minimalist vanilla perfumes and more complex compositions blended with amber, sandalwood, tonka-inspired accords, or fruity notes. For perfume manufacturers, the fragrance oil offers flexibility when developing customized scent collections for different consumer preferences. It can be evaluated for concentrated perfume oils, alcohol-based perfumes, and other compatible fine-fragrance products, subject to formulation testing and applicable safety requirements. Whether used as a central note or as a supporting accord, Happy Vanilla provides an appealing foundation for creating cozy, sweet, and contemporary fragrance concepts. Its final performance depends on the formulation, dosage, and compatibility of the finished product.

Tobacco Rose Fragrance Oil
LDZ-PL10690

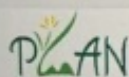

LDZ-PL30967

Coconut & Vanilla Fragrance

Production Date: April 25, 2026

Production Batch No.: 260425529

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and well-ventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., Ltd.

Address: No. 1, Xiyuan Road, Baiyun District, Guangzhou, Guangdong, 510540, China

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	Happy Vanilla Fragrance Oil opens with a gentle wave of sweet vanilla and creamy sugar accords. A delicate milky impression adds softness, while subtle hints of caramel-like sweetness create an inviting gourmand introduction. These opening nuances give the fragrance a cozy, cheerful personality without making the initial impression excessively rich.
Middle Notes (Heart)	At the heart, smooth vanilla becomes more prominent, offering a creamy, velvety character with a warm dessert-like quality. Soft tonka-inspired accords can introduce a subtle almond-like sweetness, while delicate floral nuances may add balance and prevent the fragrance from feeling overly sugary. This harmonious heart makes the scent appealing for both simple vanilla perfumes and more elaborate gourmand compositions.
Base Notes (Foundation)	The dry-down features warm musk, gentle amber-like accords, and soft woody nuances that complement the creamy sweetness. These deeper elements create a rounded finish and add sophistication to the fragrance's comforting character. The overall profile is suitable for developing sweet, warm, and approachable perfume concepts, particularly when blended with sandalwood, amber, or fruity accords. This description is indicative; the actual note profile depends on the supplied fragrance formulation.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Happy Vanilla Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.930–1.050 g/cm³ @ 25°C
Refractive Index	1.450–1.520
Flash Point	>93.3°C (200°F)

Dosage	Home Fragrance: 6%–10% Personal Care: 1%–5%; Shower Gel & Shampoo: 0.2–1.0%; Eau de Parfum (EDP): 12–25%; Body Mist: 4–9%; Fine Perfume: 15–25%;
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Happy Vanilla Fragrance Oil provides a warm, creamy, and sweet olfactory character for perfume manufacturers seeking to develop

inviting gourmand fragrance collections. Its vanilla-centered profile can bring softness, richness, and a comforting sweetness to concentrated perfume formulations. Depending on the finished composition, complementary sugary, musky, or woody accords can help create a more balanced scent with additional depth and complexity. One important function of this fragrance oil is to serve as the central aromatic theme in a vanilla perfume or as a supporting note that smooths the transitions between fruity, floral, and warm base accords. It can also help brands establish a recognizable scent identity for products designed around comfort, sweetness, and everyday wear. For fragrance developers, Happy Vanilla offers flexibility in blending trials, allowing adjustments to sweetness, warmth, and overall character to suit different market preferences. Its suitability for a particular formulation depends on compatibility, concentration, and performance testing.

Happy Vanilla Fragrance Oil is primarily intended for evaluation in fine-fragrance products where a creamy, sweet, and comforting vanilla character is desired. Potential applications include concentrated perfume oils, alcohol-based perfumes, eau de parfum, and eau de toilette, provided the fragrance oil is suitable for the selected formulation. It can be used as the main scent in a straightforward vanilla perfume or blended with fruity accords for a playful gourmand style, floral notes for a softer character, or amber and woods for a warmer, richer impression. Private-label perfume manufacturers may also explore this profile when developing seasonal collections, gift fragrances, or everyday scents aimed at consumers who appreciate sweet and cozy aromas. Body mists and fragranced lotions may be considered only when the supplier confirms suitability for those product types and the relevant safety limits are met. Before large-scale production, formulators should test solubility, color stability, scent consistency, and compatibility with the chosen base. The recommended concentration should be established according to the intended use, supplier guidance, and applicable IFRA documentation. Suitability for perfumes does not automatically mean the oil is appropriate for candles, diffusers, soaps, or other applications; each requires separate confirmation and testing.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
