Product Description

Manufacturer of Flavour & Fragrance Women's Perfume(Mid-east) Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL11893

It is a sophisticated fragrance essence developed for manufacturers seeking to create elegant women's perfumes inspired by the rich olfactory traditions of the Middle East. Its character can combine opulent floral accords, warm amber nuances, sweet spices, and sensual woody notes to deliver a distinctive fragrance experience with depth and complexity. The opening may feature sparkling citrus, aromatic spices, or fruity sweetness, creating an inviting first impression. As the scent develops, luxurious floral notes such as rose, jasmine, or orange blossom can introduce feminine elegance, while the heart may be enriched by smooth, resinous accords. The base can feature amber, musk, sandalwood, or oud-inspired notes, providing warmth and a rich, lingering character. This versatile fragrance oil offers perfume manufacturers a foundation for developing premium scent collections tailored to consumers who appreciate expressive, long-lasting fragrance styles. It can be evaluated for concentrated perfume oils, alcohol-based perfumes, and customized fine-fragrance formulations, subject to compatibility and safety testing. Its Middle Eastern-inspired profile also offers creative blending possibilities with vanilla, saffron, patchouli, or woody accords to establish a unique brand identity. Suitable for private-label development and OEM/ODM projects, this fragrance essence supports the creation of distinctive women's perfumes that balance floral sophistication with warm oriental richness. The exact scent profile and performance depend on the supplied formulation.

LDZ-PL31573

Seasalt

Production Date: April 16,2026

Production Batch No.: 260416568

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., LTD

Address: No. 1, Keyuan Road, Baiyun District, Guangzhou,Guangdong,510540,China

Tel: 86-19924190039

Email: plan@662n.com

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a captivating blend of sparkling citrus, sweet fruity nuances, and aromatic spices. Bright bergamot-like accords may introduce freshness, while subtle saffron-inspired warmth adds an exotic touch. This opening creates an elegant first impression, balancing vibrant freshness with the richness associated with Middle Eastern perfumery.

Middle Notes (Heart)	At the heart, luxurious rose and jasmine accords can contribute floral depth and feminine sophistication. Orange blossom nuances may introduce a delicate sweetness, while warm spicy notes create additional character and complexity. These elements combine to form a rich, harmonious heart that feels opulent without relying entirely on sweetness. The floral-spicy balance makes the fragrance suitable for developing distinctive women's perfume compositions.
Base Notes (Foundation)	The dry-down may feature warm amber, sensual musk, creamy sandalwood, and deep oud-inspired woody accords. Hints of vanilla or resinous sweetness can soften the darker woods, creating a rounded and comforting finish. This rich foundation gives the fragrance its characteristic oriental-inspired personality and supports blending with complementary notes such as patchouli or incense.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Women's Perfume(Mid-east) Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.940–0.995 g/cm³ @ 25°C
Refractive Index	1.495–1.510
Flash Point	>93°C
Dosage	Body Mist: 3–8%; Eau de Parfum (EDP): 12–25%; Diffuser: 25% Fine Perfume: 15–30% Shower Gel & Shampoo: 0.2–1.0%; Body Lotion/Cream: 0.3–1.0% Candles: 2–10%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

It is designed to provide a rich, expressive scent foundation for perfume manufacturers developing sophisticated feminine fragrance collections. Its Middle Eastern-inspired character can combine floral elegance, warm spices, amber-like sweetness, and woody depth to create a distinctive olfactory identity. One of its key functions is to establish a layered fragrance profile that balances an inviting opening with a fuller heart and a warm, smooth dry-down. This structure offers formulators flexibility when creating perfumes for different consumer preferences, from soft floral-oriental styles to more intense, sensual compositions. The fragrance oil can also serve as a blending base, working alongside complementary notes such as rose, vanilla, musk, patchouli, or sandalwood to develop customized scent variations. For private-label brands, it offers a creative starting point for positioning products within premium, evening-wear, or culturally inspired fragrance collections. Its final scent intensity, diffusion, and longevity depend on the complete perfume formula, concentration, and raw materials used. Manufacturers should conduct stability and compatibility tests and follow supplier guidance and applicable IFRA

requirements before commercial production.

It is primarily intended for evaluation in fine-fragrance manufacturing, particularly for products inspired by the richness and warmth of Middle Eastern perfumery. Potential applications include concentrated perfume oils, alcohol-based perfumes, eau de parfum, and eau de toilette, subject to formulation compatibility and safety assessment. Its floral, spicy, and warm woody character can suit premium women's fragrance collections, evening perfumes, special-occasion scents, and customized private-label products. Manufacturers may explore different blends by pairing it with rose or jasmine for a floral emphasis, vanilla for a sweeter impression, or amber and sandalwood accords for added warmth. It may also be evaluated for selected body mists or fragranced body-care products if the supplier confirms its suitability for the intended application. Before production, formulators should assess solubility, clarity, color stability, and scent performance in the chosen base. The fragrance concentration must be determined according to the intended product category, supplier documentation, and applicable IFRA restrictions. Suitability for fine fragrance does not automatically establish suitability for candles, diffusers, soaps, or other product types; separate confirmation and testing are necessary for each application.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
