Product Description

Concentrated Body Using Perfume Oil Oh Ma Belle Fragrance Essence Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL10118

This fragrance Oil for Perfume Making/Production is a charming, feminine fragrance essence developed for manufacturers seeking a sweet, fruity-floral scent with a youthful and elegant personality. Designed for concentrated body perfume formulations, this fragrance oil offers a harmonious combination of sparkling fruit accords, delicate blossoms, and a soft, warm foundation. The opening may feature juicy pear, refreshing citrus, and sweet fruity nuances, creating a bright and inviting first impression. As the fragrance unfolds, graceful floral accords bring a romantic dimension, adding softness and sophistication while maintaining the lively character of the fruity opening. Gentle rose-like or jasmine-inspired notes may enhance the floral heart, creating a balanced transition toward the dry-down. The base can introduce creamy vanilla, clean musk, and subtle woody sweetness, giving the composition a smooth and comforting finish. This fragrance essence provides perfume manufacturers with a versatile starting point for developing everyday feminine perfumes, romantic scent collections, and customized private-label products. It can be evaluated for concentrated perfume oils, alcohol-based perfumes, and other compatible fine-fragrance formulations, subject to appropriate testing and safety requirements. Its sweet and graceful character also offers blending possibilities with fruity, floral, musky, or gourmand accords, allowing brands to create distinctive variations for different target markets. The exact fragrance profile and performance depend on the supplied formulation and finished product concentration.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	It opens with a bright, refreshing combination of juicy pear, sparkling citrus, and delicate fruity sweetness. These lively accords create a cheerful first impression, adding freshness and a playful quality to the fragrance. The fruity opening feels light and inviting, establishing a smooth introduction to the more delicate floral heart.
Middle Notes (Heart)	As the fragrance develops, an elegant floral bouquet emerges, featuring rose-inspired softness and jasmine-like richness. These floral nuances contribute a romantic, feminine character while balancing the sweetness of the opening fruits. Subtle powdery accords may add a silky texture, creating a graceful transition from the sparkling top notes to the warmer base. The heart feels harmonious and approachable, making it suitable for contemporary feminine perfume concepts.
Base Notes (Foundation)	The dry-down combines creamy vanilla, clean musk, and gentle woody sweetness. These elements provide warmth and softness, rounding out the fruity-floral composition without overwhelming its delicate character. The resulting scent profile is sweet, elegant, and youthful, offering perfume manufacturers a versatile foundation for everyday fragrances and romantic scent collections. The notes described are indicative; the exact profile depends on the supplied fragrance oil formulation.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Oh Ma Belle Fragrance Essence Oil
Appearance	Transparent to amber liquid

Relative Density	0.950–1.050g/cm³ @ 25°C
Refractive Index	1.485–1.515

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Oh Ma Belle Fragrance Essence Oil is designed to provide perfume formulations with a bright, feminine, and sophisticated fruity-floral identity. Its carefully balanced combination of juicy fruit accords, elegant floral nuances, creamy vanilla, and soft musk creates a layered fragrance experience that evolves smoothly from the first impression to the lingering dry-down. As a concentrated perfume oil, it gives manufacturers greater flexibility when adjusting fragrance intensity and developing products for different consumer preferences. The composition can serve as a signature fragrance or as a versatile blending base, pairing naturally with citrus, rose, jasmine, white musk, or gourmand accords to create customized perfume concepts. Its youthful yet refined character makes it suitable for brands seeking to develop romantic, everyday, or premium-inspired fragrance collections with a recognizable scent identity. The fragrance is formulated to support consistent aromatic performance throughout product development while offering creative freedom for private-label and OEM/ODM projects. Before commercial production, manufacturers should conduct compatibility, stability, and performance evaluations and determine the appropriate usage level according to the supplier's technical documentation and applicable IFRA requirements for the intended perfume category.

Oh Ma Belle Fragrance Essence Oil is suitable for professional perfume manufacturing and can be evaluated for a variety of fine-fragrance applications, including concentrated perfume oils, eau de parfum, eau de toilette, roll-on perfumes, and alcohol-based body fragrances, subject to formulation compatibility and applicable safety requirements. Its sweet fruity-floral profile makes it particularly suitable for feminine perfume collections, romantic everyday fragrances, seasonal launches, and boutique private-label products targeting consumers who appreciate elegant yet approachable scents. Manufacturers can use it as the principal fragrance accord or blend it with complementary notes such as vanilla, white musk, soft woods, citrus, or delicate florals to create distinctive product variations for different market segments. It may also be considered for selected fragranced personal-care products when the supplier confirms suitability for the intended application. During formulation development, perfumers should evaluate solubility, color stability, fragrance evolution, and compatibility with the chosen perfume base. The final dosage should be established according to product-specific testing, supplier guidance, and applicable IFRA standards to ensure consistent quality and regulatory compliance throughout commercial production.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

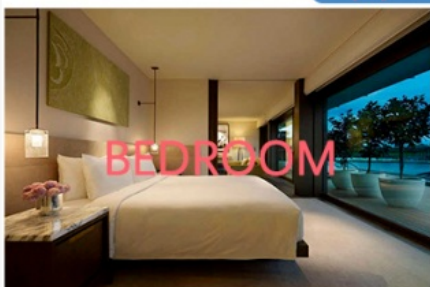

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

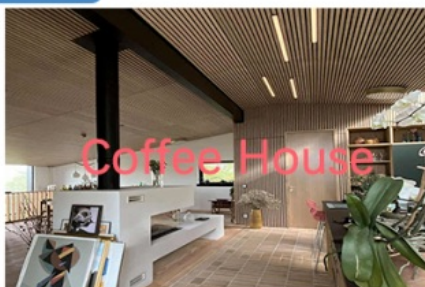

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
