Product Description

IFRA Concentrated Perfume Encre Noire A L'Extreme Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL11962

Concentrated Perfume Encre Noire À L'Extrême Fragrance Oil for Perfume Making/Production is a sophisticated fragrance essence designed for manufacturers seeking a dark, intense, and distinctive woody scent profile. Inspired by the mysterious character of modern woody perfumery, this fragrance combines earthy vetiver, smoky woods, and warm resinous nuances to create a deep and elegant olfactory experience. The opening may introduce aromatic freshness with subtle citrus-like accents, providing a restrained contrast to the darker elements that follow. As the fragrance develops, earthy vetiver and cypress-inspired accords can create a dry, green, and slightly smoky character, adding complexity and masculine sophistication. The base may reveal rich incense, warm amber, and smooth woody notes, producing a resinous finish with a mysterious, enveloping quality. This fragrance oil is suitable for perfume manufacturers developing bold, contemporary compositions for consumers who appreciate intense woods and understated elegance. It can be evaluated for concentrated perfume oils, alcohol-based perfumes, and other compatible fine-fragrance formulations, subject to stability and safety assessments. Its distinctive profile also offers blending possibilities with leather, patchouli, amber, or additional smoky accords, enabling brands to create customized fragrance variations. For private-label manufacturers and OEM/ODM projects, this essence provides a compelling foundation for premium fragrance collections with a refined, atmospheric character. The actual scent profile, intensity, and performance depend on the supplied formulation and finished product concentration.

Encre Noire A L'Extreme LDZ-PL11962

LDZ-PL31573

Seasalt

Production Date: April 16, 2026

Production Batch No.: 260416568

Shelf Life: 2 years

Specifications: 5kg/drum

Product Standard No.: GB/T22731 Daily Fragrance

Net Weight: 5kg

Application: Daily Fragrance

Usage: Add in appropriate amounts as needed in production

Shake well before use, and use as soon as possible after opening

Storage conditions: Store in a cool, dry, and wellventilated place, sealed

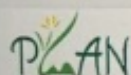

Crystallization may occur when stored in a low temperature environment. Please dissolve in a 50°C water bath and shake well before use.

Supplier: Guangzhou Plant Fragrance Co., LTD

Address: No. 1, Keyuan Road, Baiyun District, Guangzhou, Guangdong, 510540, China

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with fresh, aromatic cypress and subtle citrus nuances, creating a crisp introduction that contrasts with its darker woody character. These green, slightly resinous accents establish an elegant atmosphere, preparing the senses for the earthy depth that unfolds at the heart.
Middle Notes (Heart)	As the fragrance develops, earthy vetiver takes center stage, delivering a dry, smoky, and slightly root-like character. Incense introduces a mysterious resinous quality, while refined woody accords add structure and depth. Together, these elements create a sophisticated heart that feels intense, atmospheric, and understated rather than sweet or overtly floral. The balance between green freshness and smoky earthiness gives the composition its distinctive personality.
Base Notes (Foundation)	The dry-down reveals warm benzoin-like resins, rich woods, and subtle amber nuances that soften the darker notes without diminishing their intensity. Smooth, balsamic undertones create a deep, enveloping finish, making the fragrance suitable for bold, contemporary perfume concepts. Its overall profile emphasizes earthy vetiver, smoky incense, and elegant woods, appealing to consumers who appreciate complex, mysterious scents. These notes are an indicative description inspired by the fragrance style; the exact profile depends on the supplied fragrance oil formulation.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Encre Noire A L'Extreme Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.930–1.053 g/cm³ @ 25°C
Refractive Index	1.505–1.535
Flash Point	>90°C (200°F)
Dosage	EDP:15–30% EDT:8–18% Grooming Products:0.3–1.0% Perfume Oil:20–40% Body Mist:3–8%

Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

Encre Noire À L'Extrême Fragrance Oil offers perfume manufacturers a distinctive aromatic foundation characterized by earthy vetiver, smoky woods, and deep resinous nuances. Its dark, sophisticated scent profile helps create fragrances with a bold identity, appealing to consumers who prefer understated elegance over conventional sweetness. One of its main functions is to establish depth and contrast within a perfume composition. Earthy and green accords can provide a dry, natural character, while smoky and amber-like elements contribute warmth and complexity. This combination also makes the fragrance oil a useful blending component for developing customized woody, aromatic, or oriental-inspired perfume concepts. Formulators can experiment with complementary notes such as leather, patchouli, incense, or sandalwood to adjust the composition's intensity and character. For private-label brands, the fragrance provides a creative starting point for premium collections positioned around mystery, sophistication, and contemporary masculinity. Its actual diffusion, persistence, and development depend on the complete formulation and concentration. Manufacturers should conduct stability and compatibility testing and follow supplier documentation and applicable IFRA requirements before commercial production.

Encre Noire À L'Extrême Fragrance Oil is primarily intended for evaluation in fine-fragrance manufacturing, particularly for products featuring intense woody, earthy, and smoky characteristics. Potential applications include concentrated perfume oils, alcohol-based perfumes, eau de parfum, and eau de toilette, subject to formulation compatibility and safety assessment. Its refined, atmospheric profile can suit premium men's fragrances, unisex woody collections, evening perfumes, and niche-inspired scent ranges. Manufacturers may use it as the central accord in a dark vetiver composition or blend it with leather, amber, patchouli, incense, or smooth woods to create distinctive variations for different target markets. It can also support private-label development and OEM/ODM projects seeking a recognizable fragrance identity. Before scaling up production, formulators should evaluate solubility, clarity, color stability, and scent evolution in the selected base. The recommended dosage must be established according to the intended product category, supplier guidance, and applicable IFRA documentation. Suitability for fine fragrance does not automatically establish suitability for candles, reed diffusers, soaps, or other applications; separate supplier confirmation and product-specific testing are necessary before use.

Industrial Applications

Primary applications include:

Attars and Concentrated Perfume Oils (CPO): Ideal for alcohol-free, highly potent luxury oils

Fine Fragrances: Used in "Intense" or "Nuit" perfume versions requiring heavy sillage

Premium Home Fragrancing: Top-tier choice for Bakhoor and luxury incense production

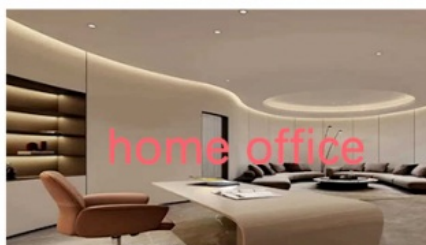

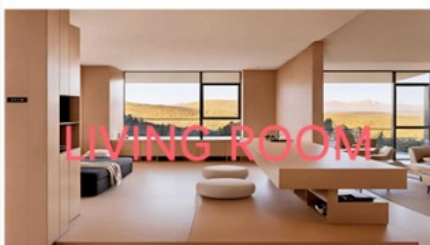

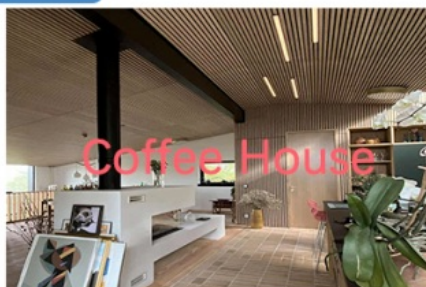

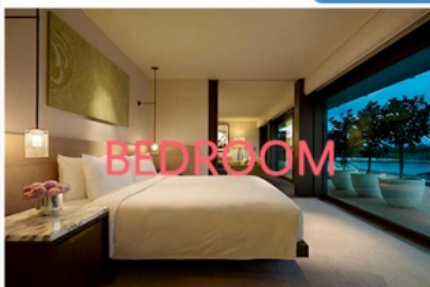

Hospitality Sector: Utilized in high-output nebulizers for hotel lobbies and boutiques

Personal Care: Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

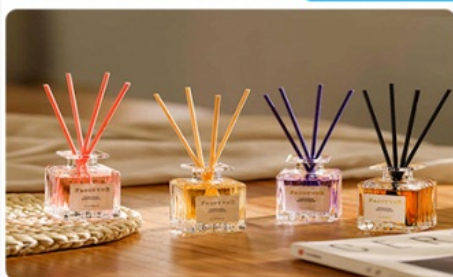

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
