Product Description

IFRA&MSDS Concentrated Perfume Oil Body Using Decadence TF Fragrance Oil For Perfume Making / Production With Free Sample

Product Code: LDZ-PL11704

The Concentrated Decadence TF Fragrance Oil is an exceptionally rich, luxury-grade raw material engineered specifically for artisan perfume making and custom cosmetic production. Inspired by opulent oriental-floral archetypes, it opens with a lavish and velvety fusion of luscious plum, exotic saffron, and powdery iris that instantly establishes a dark, decadent mood. As this initial intensity evolves, the heart reveals a deeply romantic and sophisticated floral core composed of creamy orris, intoxicating jasmine sambac, and rich Bulgarian rose. Finally, the fragrance anchors itself in a dense, earthy, and resinous dry-down featuring smoky vetiver, exotic papyrus, and warm liquid amber. Because of its high concentration and heavy fixative properties, this premium oil delivers extraordinary depth, skin tenacity, and projection, making it an ideal formulation choice for luxury evening perfumes, upscale roll-on body oils, and bespoke personal care lines.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with a rich, velvety fruit-and-spice combination featuring luscious plum, warm and exotic saffron, and powdery iris. This creates an immediate impression of dark, decadent luxury.
Middle Notes (Heart)	The heart shifts into a deeply opulent floral core dominated by creamy orris, intoxicating jasmine sambac, and romantic Bulgarian rose. This layer builds a dense, elegant, and intensely feminine character.
Base Notes (Foundation)	The scent concludes with a dark, earthy, and resinous dry-down anchored by smoky vetiver, exotic papyrus, and warm liquid amber/liquidambar. These heavy fixing agents provide exceptional depth, tenacity, and a lingering trail on the skin.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Decadence TF Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.885–1.050g/cm ³ @ 25°C
Refractive Index	1.475–1.505
Flash Point	>75°C
Dosage	Body Mist: 1%–5%; Eau de Parfum (EDP): 15–30%; Home Fragrance: 6%–10% Soap/wash-off: 1.5–4% Fine Perfume: 15–30%; Shower Gel & Shampoo: 0.2–1.0%; Body Oils/Lotions: 0.3–1%;
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water

IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

The primary function of this heavy, oriental-floral oil is to act as a powerful aromatic anchor and core scent-deliverer in luxury cosmetic and perfumery production. Chemically formulated with dense, high-purity resinous and earthy components, it functions as an exceptional natural fixative, significantly slowing down the evaporation rate of the entire blend and anchoring lighter volatile notes to the skin or fabric for extended wear. Functionally, it masks unrefined chemical odors in unscented cosmetic bases while imparting an opulent, multi-layered sensory identity. Its high concentration allows formulators to precisely control sillage and projection; a small percentage can transform a neutral base into a heavy, high-performance product. Furthermore, its rich composition is engineered to blend seamlessly with various solvents and carriers—such as perfumer's alcohol, fractionated coconut oil, or emulsified creams—ensuring stable integration, preventing

phase separation, and maintaining long-term chemical integrity across diverse batch productions without degrading its dark, sophisticated character over time.

This versatile, high-end fragrance oil is specifically engineered for a wide array of premium commercial and artisanal personal care manufacturing sectors. Its premier application lies in fine fragrance production, where it is blended with perfumer's alcohol and distilled water to craft luxurious evening-wear Eau de Parfums and extrait de parfums. Beyond traditional spray bottles, its oil-soluble nature makes it an exceptional choice for formulating alcohol-free roll-on body oils, solid perfumes, and artisanal perfume balms utilizing nourishing carrier mediums like jojoba or fractionated coconut oil. In the broader luxury cosmetics and grooming market, it is frequently utilized to scent high-end bath and body lines, such as rich body creams, decadent shower gels, and artisanal soaps, imparting a warm, sophisticated aura. Additionally, specialized home-fragrance creators leverage its robust, dense projection to produce premium reed diffusers and luxury scented candles, creating an enveloping, long-lasting atmosphere.

Industrial Applications

Primary applications include:

- Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
