Product Description

Fragrance Oil For Perfume The most wanted Fragrance Oil For Perfume Making/Production With Free Sample IFRA

Product Code: LDZ-PL12332

The most in-demand fragrance oils for commercial perfume production span timeless florals, warm gourmands, and rich, grounding anchors. At the foundation, classic florals like rich rose and velvety jasmine deliver deep, romantic elegance and universal consumer appeal. To add comforting sweetness and exceptional longevity, formulators heavily rely on warm gourmand notes such as creamy vanilla, roasted coffee, and salted caramel. Meanwhile, sophisticated unisex and luxury lines are anchored by resinous oud, creamy sandalwood, and clean cedar, which provide powerful projection and structural depth. Finally, bright citrus top notes like bergamot instantly invigorate a blend, while soft white musks create a lasting, skin-like finish that seamlessly ties the entire fragrance together.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	Bright, sparkling Bergamot opens the composition, delivering an immediate, invigorating splash of freshness that captures attention instantly upon application.
Middle Notes (Heart)	The heart unfolds into a lush, romantic bouquet. Rich, honeyed Rose and velvety, sweet-tart Jasmine blend seamlessly with subtle touches of roasted coffee and warm accords, creating an opulent and captivating floral-gourmand core.
Base Notes (Foundation)	The dry-down settles into a deeply sensual, long-lasting foundation. Resinous, smoky Oud, creamy Sandalwood, and rich Vanilla combine with comforting White Musks, anchoring the fragrance with warm projection and a soft, skin-like finish.

Technical Specifications:

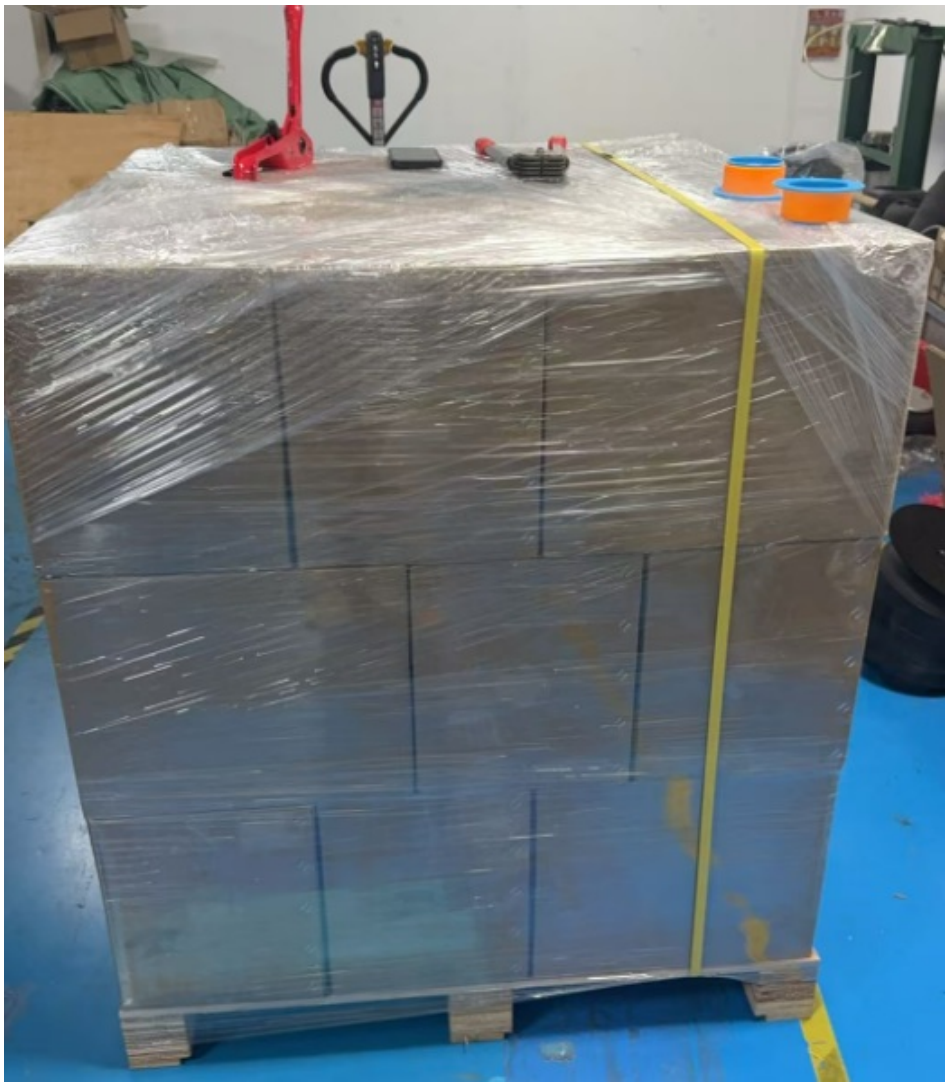

Parameter	Specification
Fragrance Notes	The most wanted Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.885–1.048 g/cm³ @ 25°C
Refractive Index	1.450–1.520
Flash Point	>93.3°C (200°F)
Dosage	Home Fragrance: 6%–10% Personal Care: 1%–5%; Body Mist: 4–9%; Fine Perfume: 15–25%; Shower Gel & Shampoo: 0.2–1.0%; Eau de Parfum (EDP): 12–25%;
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

MS 2223

Applications & Functions:

The overall function of The Most Wanted fragrance oil is to project bold confidence, magnetic warmth, and long-lasting seduction. Built as an intense woody-spicy and gourmand profile (featuring cardamom, toffee/caramel, amberwood, and vanilla), it functions primarily to create a strong, memorable scent trail with powerful projection. It acts as a comforting yet daring shield of warmth, using rich sweet and resinous compounds to slow evaporation and cling tenaciously to the skin and fabrics.

In terms of applications, this fragrance oil is predominantly utilized in the production of high-end, designer masculine and unisex evening

fragrances. It is ideally formulated for cooler seasons—such as autumn and winter—where heavy, cozy notes thrive. Commercially, it is heavily applied in upscale men's grooming lines, including intense aftershaves, rich body washes, luxury scented candles, and intimate winter-wear perfumes designed specifically for date nights, formal evening events, and social nightlife settings.

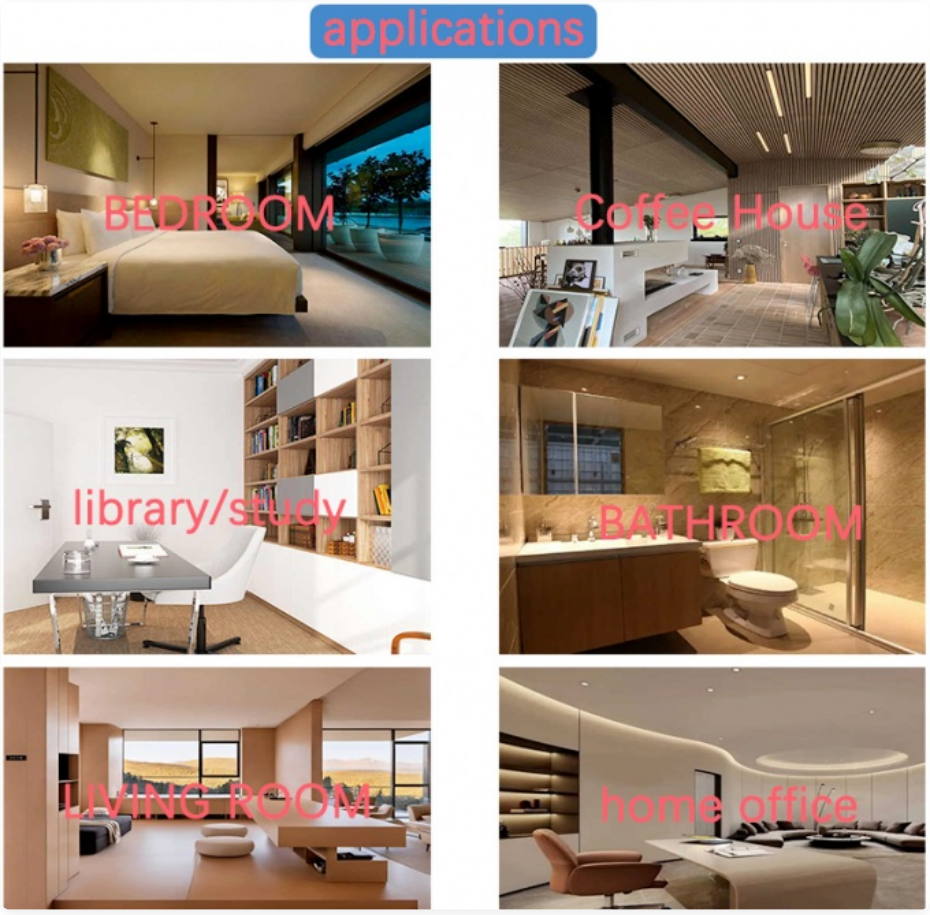

Industrial Applications

Primary applications include:

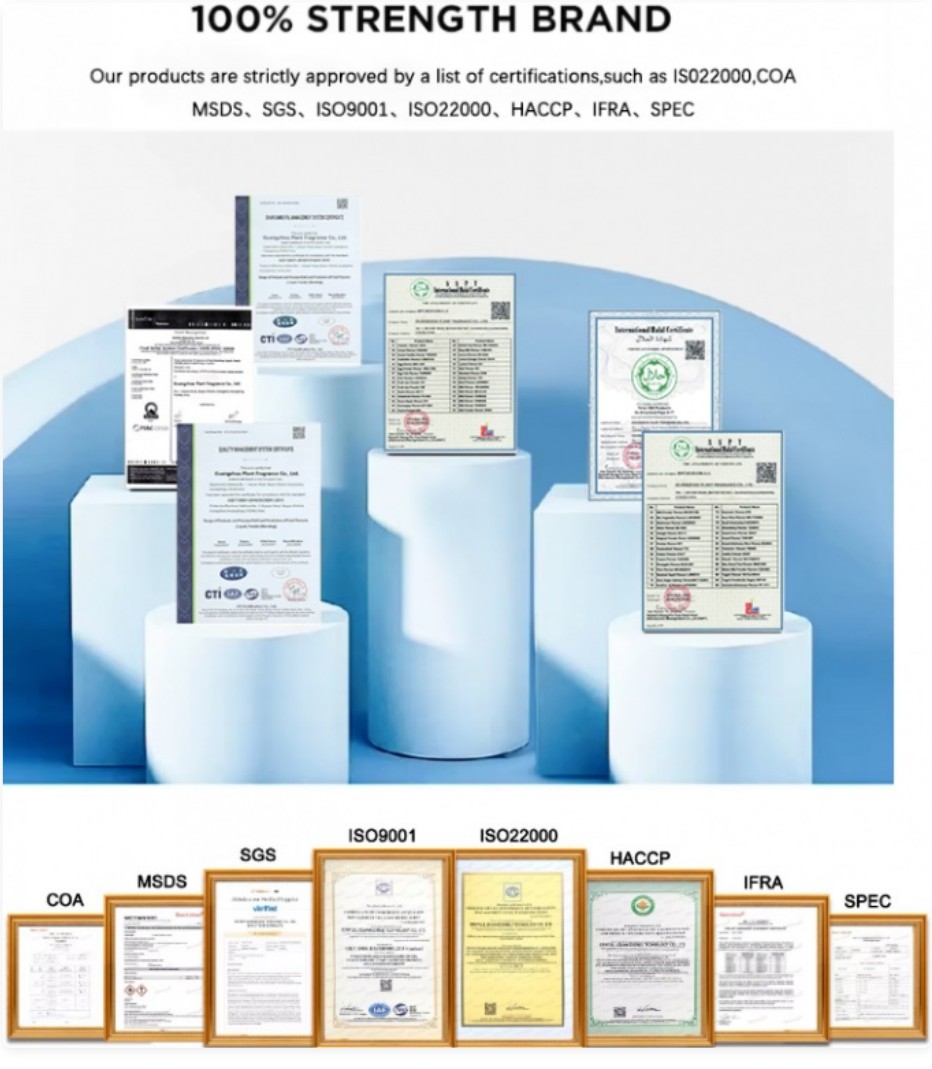

- **Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- **Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- **Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- **Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- **Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
