Product Description

IFRA Fragrance Oil Perfume ANOTHER #13 Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL10594

It is a distinctive fragrance essence designed for perfume manufacturers seeking a modern, refined, and versatile scent profile. Inspired by contemporary niche perfumery, this fragrance offers a sophisticated balance of fresh, woody, musky, and subtly warm aromatic nuances. Its opening may introduce clean, airy accords with gentle citrus-like freshness, creating a bright and understated first impression. As the fragrance develops, delicate floral and aromatic elements can add softness and complexity, while transparent woody notes contribute a smooth, elegant character. The dry-down may reveal warm musk, soft amber, and subtle woody nuances, creating a clean yet enveloping finish. Rather than relying on excessive sweetness or heavy spices, its overall character emphasizes simplicity, balance, and modern elegance. This fragrance oil can be evaluated for concentrated perfume oils, alcohol-based perfumes, eau de parfum, and other compatible fine-fragrance formulations, subject to application-specific testing. Its versatile aromatic structure also provides creative blending opportunities with white musk, sandalwood, amber, or fresh floral accords, allowing manufacturers to develop customized fragrance variations. For private-label brands and OEM/ODM projects, ANOTHER #13 offers an appealing foundation for minimalist, contemporary, and unisex-inspired perfume collections. The exact fragrance profile and performance depend on the supplied formulation and finished product concentration.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	It opens with a delicate combination of fresh pear, crisp apple, and subtle citrus nuances. These fruity accents create a clean, airy introduction with a slightly juicy sweetness. Rather than presenting a strong fruity character, the opening feels transparent and understated, establishing the fragrance's modern minimalist personality.

Middle Notes (Heart)	As the fragrance develops, soft jasmine, ambrette, and amyl salicylate-inspired accords create a smooth, musky-floral heart. These elements contribute a gentle floral softness and a slightly warm, skin-like quality. The heart maintains an elegant balance between freshness and subtle sensuality, giving the composition its distinctive contemporary character.
Base Notes (Foundation)	The dry-down is built around ambrox, clean musk, and delicate mossy woody nuances. These accords provide a warm, smooth, and slightly mineral-like finish with a sophisticated skin-scent effect. The overall composition is clean, understated, and modern, making it suitable for unisex perfume collections and minimalist fragrance concepts.

Technical Specifications:

Parameter	Specification
Fragrance Notes	ANOTHER #13 Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.930–1.053 g/cm³ @ 25°C
Refractive Index	1.505–1.535
Flash Point	>90°C (200°F)
Dosage	EDP:15–30% Grooming Products:0.3–1.0% Perfume Oil:20–40% EDT:8–18%Body Mist:3–8%
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards

Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

Applications & Functions:

It is designed to provide perfume manufacturers with a distinctive clean, musky, and contemporary scent identity. Its understated combination of airy fruity nuances, delicate floral accords, and smooth woody musk creates a subtle yet recognizable aromatic character. One of its main functions is to bring a soft, skin-like quality to perfume formulations, making it particularly appealing for consumers who prefer minimalist fragrances rather than overly sweet or intensely floral compositions. Its musky foundation can also help create a harmonious connection between fresh top notes and warmer base accords, contributing to a balanced overall fragrance structure. For professional formulators, this essence offers flexibility as both a signature scent and a blending ingredient. It can be combined with amber, sandalwood, citrus, or floral accords to develop customized variations with different levels of freshness and warmth. Its modern unisex character makes it suitable for brands seeking understated luxury and distinctive everyday fragrance concepts. Final fragrance performance depends on concentration and formulation, so manufacturers should conduct stability and compatibility testing and follow supplier documentation and applicable IFRA requirements.

It is primarily intended for evaluation in fine-fragrance manufacturing, especially products featuring clean musk, transparent woods, and subtle skin-like aromatic characteristics. Potential applications include concentrated perfume oils, alcohol-based perfumes, eau de parfum, eau de toilette, and customized unisex fragrance formulations, subject to compatibility and safety assessment. Its minimalist personality makes it suitable for niche-inspired perfume collections, modern lifestyle fragrances, everyday wear concepts, and premium private-label products. Manufacturers may use it as the central fragrance accord or combine it with white musk, amber, sandalwood, citrus, or soft floral notes to create distinctive scent variations for different consumer preferences. It may also be explored for selected fragranced body-care products if the supplier confirms its suitability for the intended application. During product development, formulators should assess solubility, clarity, color stability, and fragrance evolution in the finished base. The recommended dosage must be established according to the product category, supplier's technical documentation, and applicable IFRA restrictions. Suitability for fine fragrances should not automatically be assumed for candles, reed diffusers, soaps, or other applications; separate confirmation and testing are necessary.

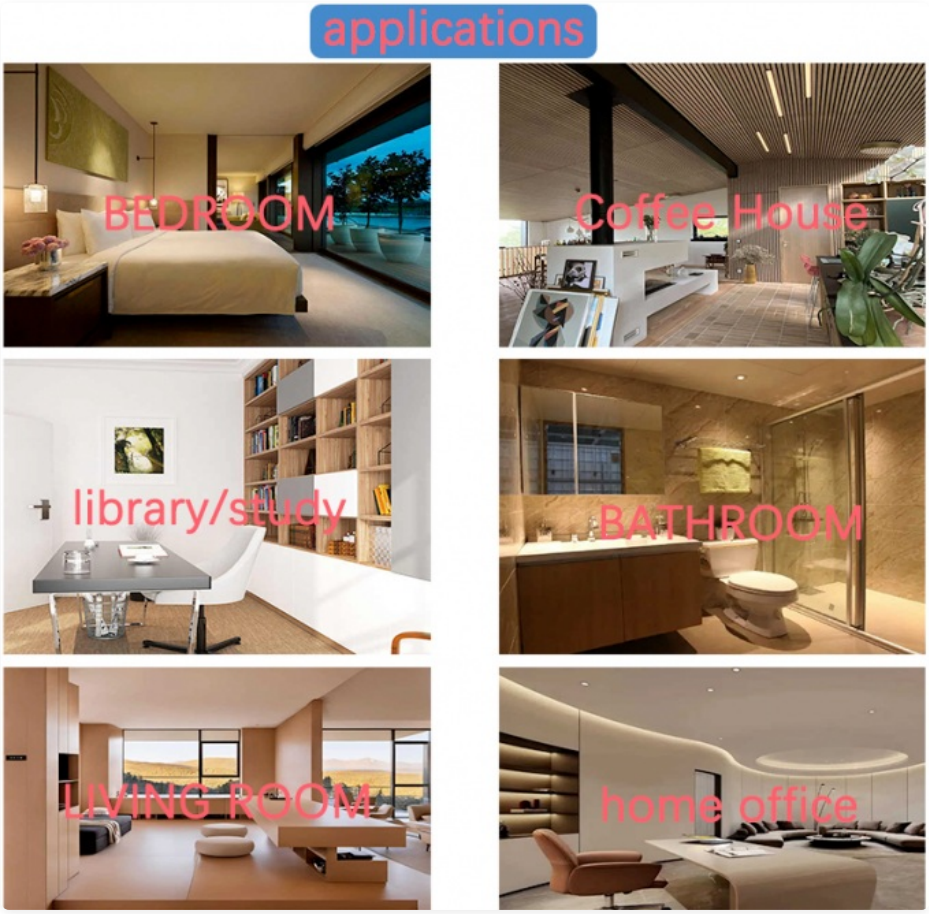

Industrial Applications

Primary applications include:

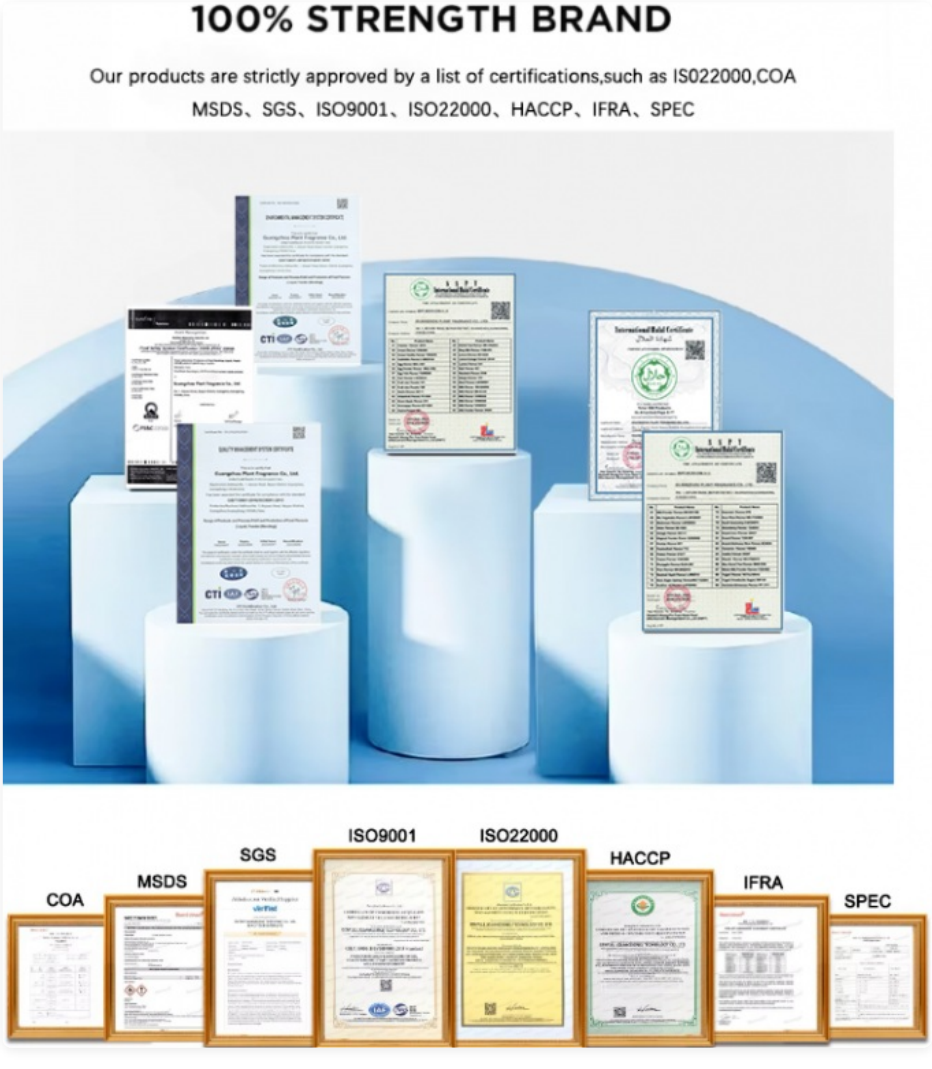

- **Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- **Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- **Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- **Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- **Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
