Product Description

Factory Directly Concentrated Amouage Guidance Fragrance Oil For Perfume Making/Production With Free Sample IFRA &MSDS Certifications

Product Code: LDZ-PL12457

It is an elegant, sophisticated fragrance inspired by the captivating contrast between fruity sweetness, delicate florals, and warm woody accords. It opens with a distinctive combination of juicy pear, creamy hazelnut, and aromatic frankincense, creating an inviting first impression that balances freshness with a subtle nutty richness. As the fragrance develops, a graceful floral heart emerges, where soft osmanthus, romantic rose, and precious saffron intertwine to produce a refined, slightly spicy character. This layered composition gives the scent an intriguing balance of femininity, warmth, and modern luxury.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The opening combines the juicy sweetness of ripe pear with the creamy, nutty aroma of hazelnut. Frankincense introduces a delicate resinous and slightly smoky nuance, adding depth to the fruity freshness. This combination creates a distinctive first impression that is simultaneously soft, warm, and intriguing.
Middle Notes (Heart)	The heart unfolds into an elegant floral arrangement. Romantic rose brings velvety richness, while jasmine sambac contributes a creamy white-floral character. Osmanthus introduces subtle apricot-like sweetness, and saffron adds a sophisticated spicy and slightly leathery dimension. Together, these notes create a luxurious and beautifully layered floral personality.
Base Notes (Foundation)	The dry-down reveals a warm, sensual foundation. Creamy sandalwood blends with smooth vanilla and the resinous warmth of cistus. Akigalawood adds a refined woody-spicy touch, while ambergris provides a soft, elegant ambery character. The result is a rich, long-lasting finish with comforting warmth and sophisticated depth.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Amouage Guidance Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.758–1.052 g/cm³ @ 25°C
Refractive Index	1.450–1.520
Flash Point	>93.3°C (200°F)
Dosage	Personal Care: 1%–5%; Body Mist: 4–9%; Fine Perfume: 15–25%; Shower Gel & Shampoo: 0.2–1.0%; Home Fragrance: 6%–10% Eau de Parfum (EDP): 12–25%;
Diffusion Ability	Excellent aroma

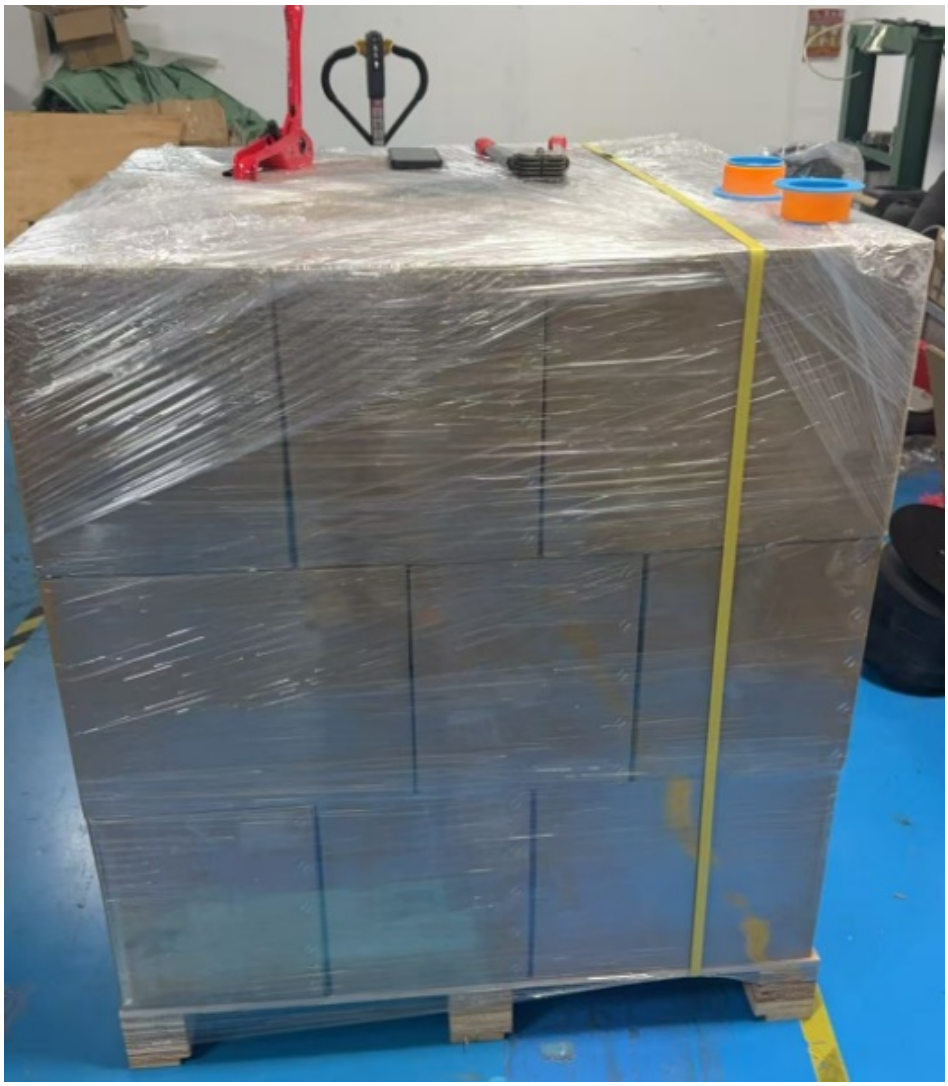

Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards
Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

MS 2223

Applications & Functions:

The Fragrance Oil is developed for creating sophisticated personal fragrance products with a distinctive balance of fruity, floral, nutty, and woody accords. Its rich aromatic structure combines juicy pear, delicate rose, creamy sandalwood, warm vanilla, and resinous nuances, offering perfume formulators considerable creative flexibility. The concentrated formula helps deliver a recognizable fragrance character without requiring a large proportion of fragrance oil in the finished composition, subject to formulation testing and applicable safety limits. Its layered scent profile provides an attractive transition from a refreshing fruity opening to a smooth floral heart and a warm, lingering dry-down. This makes it suitable for developing premium fragrances that communicate elegance, individuality, and contemporary luxury. It can

also serve as a reference direction for custom perfume development, allowing manufacturers to adjust sweetness, floral intensity, woody depth, and overall fragrance projection according to market preferences. With its sophisticated olfactory character, this fragrance oil helps brands create distinctive perfume collections for customers who appreciate complex, memorable, and luxurious scents.

It is suitable for developing a variety of premium personal fragrance products. Its complex fruity-floral and woody composition makes it particularly attractive for eau de parfum, extrait de parfum, perfume sprays, and roll-on perfume oils. In alcohol-based perfume formulations, its pear, rose, and vanilla nuances can create an elegant scent identity, while the warm sandalwood and amber-like accords contribute depth to the overall composition. It can also be incorporated into concentrated perfume oil blends and customized signature fragrances for niche perfume brands, boutique fragrance collections, and private-label manufacturers. For product developers seeking a distinctive market position, this fragrance direction offers opportunities to create feminine, unisex, or modern oriental-inspired perfume concepts. The fragrance may also inspire matching scented body products, including body mists, perfumed lotions, and shower gels, provided the formula is suitable for each application. Recommended usage levels should be determined through formulation trials, IFRA compliance checks, and stability testing for the intended product category.

Industrial Applications

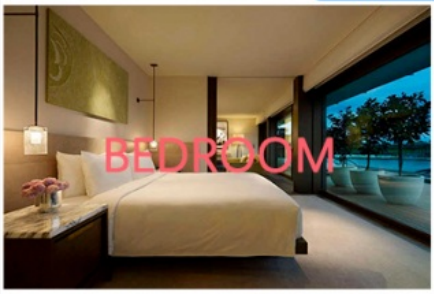

Primary applications include:

- **Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- **Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- **Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- **Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- **Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
