Product Description

IFRA Fragrance Oil For Perfume Lanvin Éclat d'Arpège Fragrance Oil For Perfume Making/Production With Free Sample

Product Code: LDZ-PL12399

Cheirosa #68 (inspired by Sol de Janeiro's iconic Beija Flor profile) is a vibrant, lush, and modern floral-fruity fragrance that balances bright effervescence with a warm, comforting dry-down. For perfume production, it acts as a high-impact, crowd-pleasing accord characterized by a joyful, tropical sweetness.

The fragrance opens with a sparkling, juicy burst of Brazilian jasmine and fresh pink dragonfruit, delivering an exotic, crisp fruitiness that immediately captures attention. As the initial brightness settles, the heart reveals a soft, airy floral bouquet dominated by delicate hibiscus and clean aquatic undertones, adding a sophisticated lightness rather than heavy powder. The base grounds the composition with a creamy, touchable warmth featuring sheer vanilla and subtle sun musk, which imparts a smooth, skin-hugging longevity ideal for fine fragrances, body oils, and lotions.

Fragrance Profile:

Fragrance Notes	Description
Top Notes (Opening)	The fragrance opens with an effervescent, fruity burst of Brazilian jasmine and lush pink dragonfruit. This pairing delivers an immediate tropical, slightly exotic freshness that is bright, modern, and energetic.

Middle Notes (Heart)	As the initial fruitiness softens, the heart emerges with a delicate airy floral bouquet led by hibiscus and clean, refreshing marine/aquatic undertones. This layer provides a breezy, sophisticated lightness rather than heavy powder.
Base Notes (Foundation)	The dry-down grounds the composition with a warm, comforting finish of sheer vanilla and subtle sun musk. This imparts a smooth, creamy, skin-hugging longevity that lingers delicately.

Technical Specifications:

Parameter	Specification
Fragrance Notes	Cheirosa #68 Fragrance Oil
Appearance	Transparent to amber liquid
Relative Density	0.776–0.985g/cm³ @ 25°C
Refractive Index	1.505–1.596
Flash Point	>93.3°C (200°F)
Dosage	Personal Care: 1%–5%; Body Mist: 4–9%; Fine Perfume: 15–25%; Home Fragrance: 6%–10% Shower Gel & Shampoo: 0.2–1.0%; Eau de Parfum (EDP): 12–25%;
Diffusion Ability	Excellent aroma
Long-lasting Fragrance	8-12 hours (paper strip test)
Solubility	Soluble in ethanol and oils; insoluble in water
IFRA Compliance	Conforms to International Fragrance Association safety standards

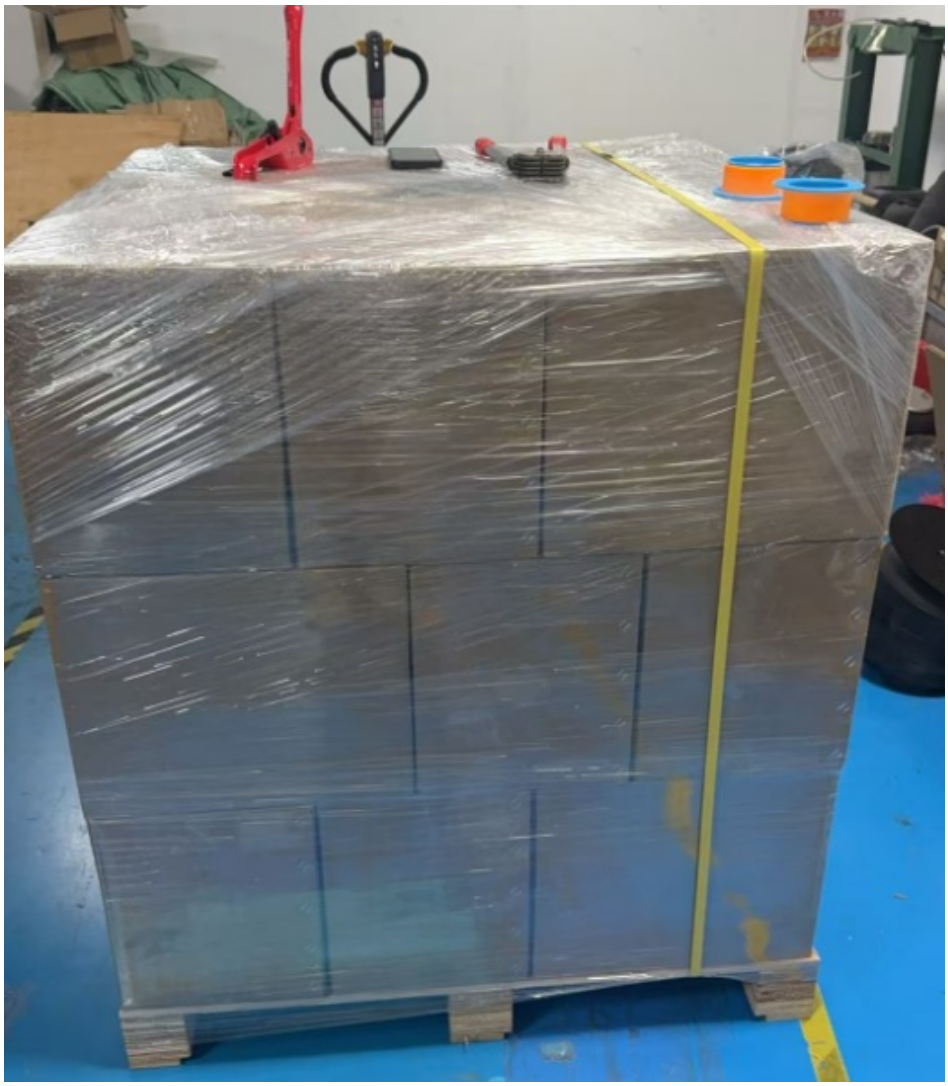

Heat Resistance	Stable at 100°C with no noticeable discoloration or odor change
Lightfastness	Good (avoid long-term direct sunlight)
Evaporation Rate	Slow evaporation ensures smoother fragrance evolution

MS 2223

Applications & Functions:

Cheirosa #68 functions primarily as a high-diffusing, multi-purpose fragrance oil accord designed to impart an upbeat, tropical, and modern fruity-floral identity into diverse consumer goods. Functionally, it acts as a mood-enhancing aromatic agent that bridges bright, effervescent top fruits with a soft, comforting base. In formulation chemistry, it serves to mask base-product chemical odors while providing strong scent retention across various mediums. Its balanced composition allows it to function flexibly as a standalone signature scent or as a complex modifier that lifts heavier gourmand and amber bases. Furthermore, it functions effectively to evoke a sun-drenched, airy ambiance, utilizing clean marine and floral notes to prevent the sweet tropical fruits from becoming cloying. This makes it

structurally sound for products targeting a youthful, energetic, and clean sensory experience.

In manufacturing and production, Cheirosa #68 is widely applied across fine perfumery, body care, and home fragrance systems. Its primary applications include alcohol-based fine fragrances, body mists, and hair perfumes, where its high diffusion shines. In personal care, it is heavily utilized to scent rich body creams, lotions, body washes, and liquid soaps. For craft and industrial candle making, it performs well in soy, paraffin, and coconut waxes, producing strong hot and cold throws ideal for spring and summer collections. Additionally, it is incorporated into surfactant-based items like bath bombs, shampoos, and room sprays. Because formulation limits vary—ranging from lower percentages in face creams to higher loads in candles and ambient sprays—formulators routinely cross-reference IFRA guidelines for each specific product category.

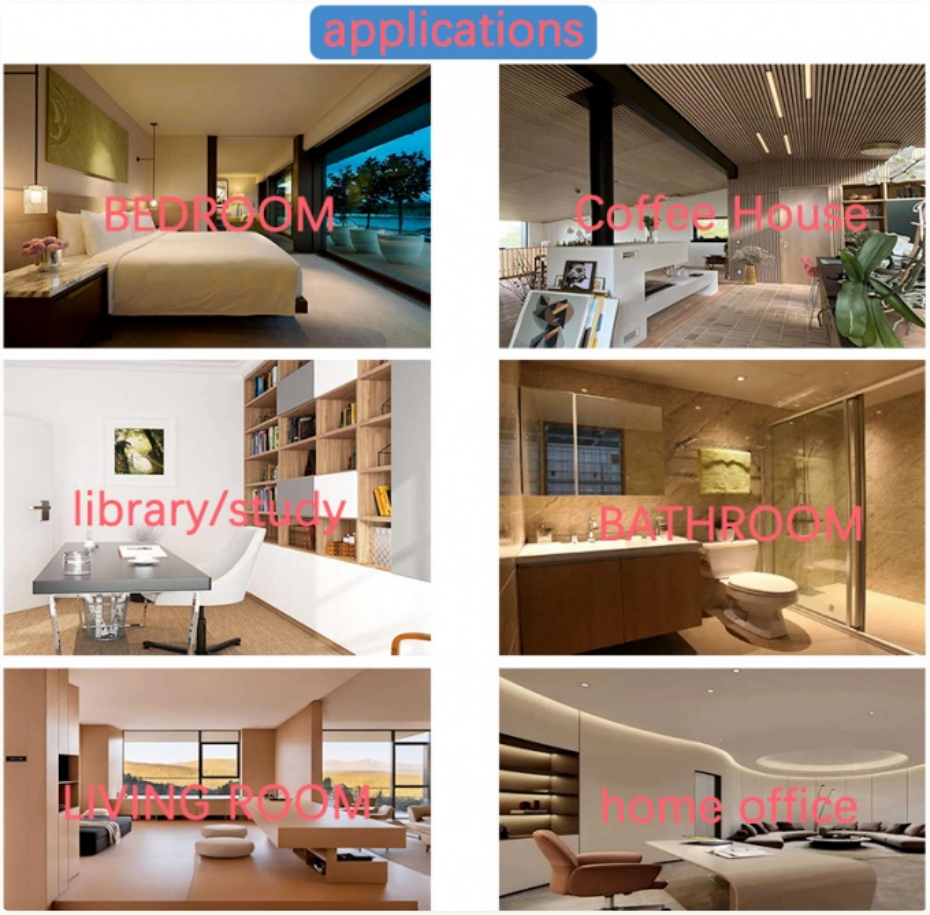

Industrial Applications

Primary applications include:

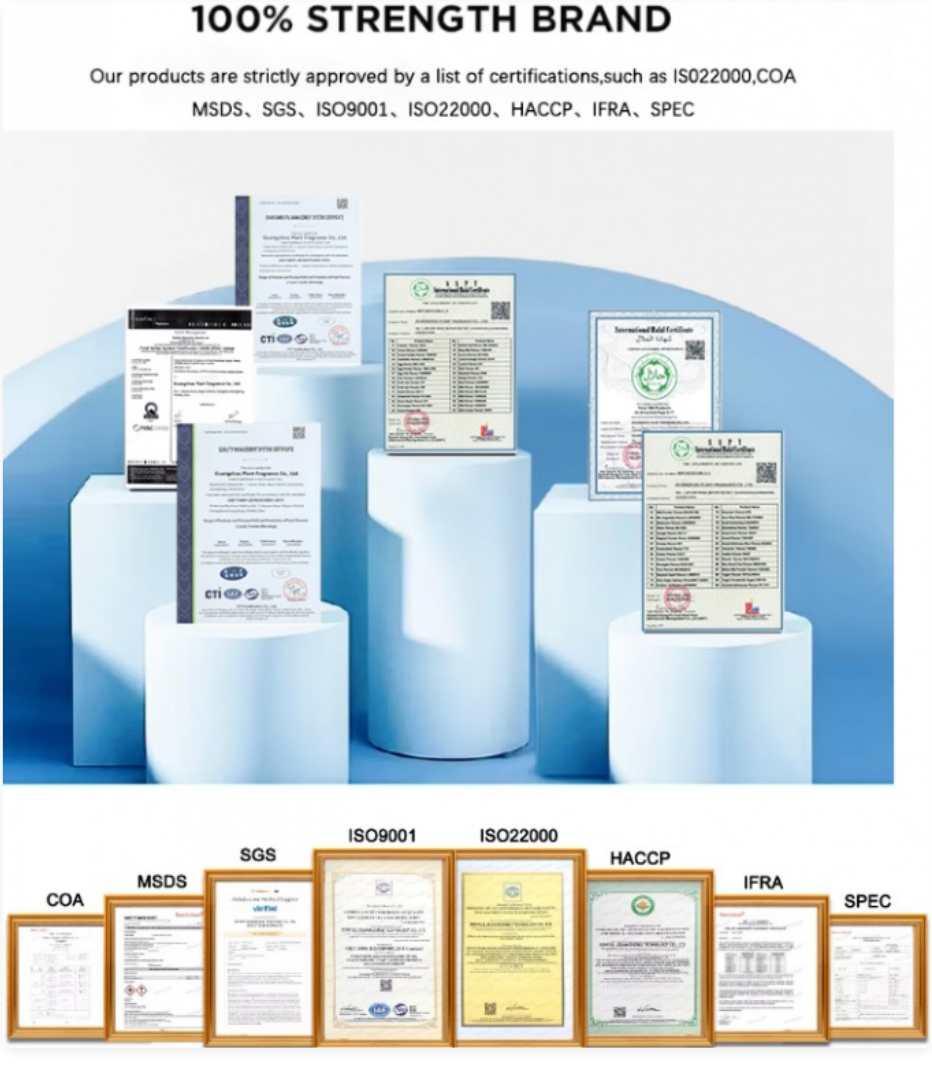

- **Attars and Concentrated Perfume Oils (CPO):** Ideal for alcohol-free, highly potent luxury oils
- **Fine Fragrances:** Used in "Intense" or "Nuit" perfume versions requiring heavy sillage
- **Premium Home Fragrancing:** Top-tier choice for Bakhoor and luxury incense production
- **Hospitality Sector:** Utilized in high-output nebulizers for hotel lobbies and boutiques
- **Personal Care:** Popular in Beard Oils and Hair Mists for long-lasting sophisticated appeal

Our Advantages

Our R&D team, consisting of PhDs and senior engineers, collaborates with universities to maintain product innovation and quality. We assist customers in improving product aroma, quality structure, and reducing production costs.
